

Samsung **KNOX**

Samsung *My* **KNOX**

Take Control of Your Mobile Device for Work

As a professional employee, you can take control of your mobile device for work. Samsung My KNOX provides a fast and simple way to get your mobile device setup for work without requiring IT. You can get access to your work email and key business apps to improve business productivity while protecting your privacy. Also, if your device is lost or stolen you can remotely lock, find or wipe your device with the My KNOX web console.

To get started today:
download **My KNOX** app from Google Play

Use the familiar Android user experience to securely access your work email, business apps and corporate data, while also protecting your personal data.

Overview

Secure work email inside the separate workspace with simple web-based management

My KNOX is currently available on Galaxy S5
(More devices will support My KNOX soon)
