BESPOKE

Designed for you, by you

Installation guide

A fridge that is
stylishly unique.

Introduction

The Bespoke Fridge. So uniquely you.

Introducing the refrigerator that can stand out or blend in. With our Bespoke Refrigerator range you can now choose your preferred style, colour and finish to create the fridge of your dreams.

Tap into your 'interior designer' and bring your personal vision to life. Our Bespoke Refrigerator range comes in modular or free-standing style and is available in a range of colours and finishes, giving you an exciting blank canvas to work with.

The great thing about Bespoke is that it can grow with you. Integrate new modules when you need more fridge or freezer space for the ultimate versatility in size and style.*

Complimenting the innovations in form are the thoughtful features in function. Our Bespoke refrigerators feature our most efficient cooling technologies, with Triple Cooling™ and All-around Cooling™ that helps to keep food fresh for long. Flexible shelving, Auto-fill Water Jug** and Convertible Freezer Zones deliver convenience.

These are just some of the innovations we've added to our Bespoke range, and it only gets better from here. Welcome to your Bespoke home.

* Only available for Modular models with the stacking kit. Excludes the French Door with beverage centre model RF65A9675AP/SA.

** Automatic re-fill is only available with the French Door with Beverage Centre™, RF65A9675AP/SA and subject to the unit being plumbed.

The refrigerator that is
designed to be seen.

Examples of modular configurations

NOTE: the French Door Fridge (673mm) is deeper than the Single Door (647mm).
These are the most commonly expected combinations, not all possible combinations

Modular French Door Fridge + Single Door Fridge or Freezer

Physical specifications

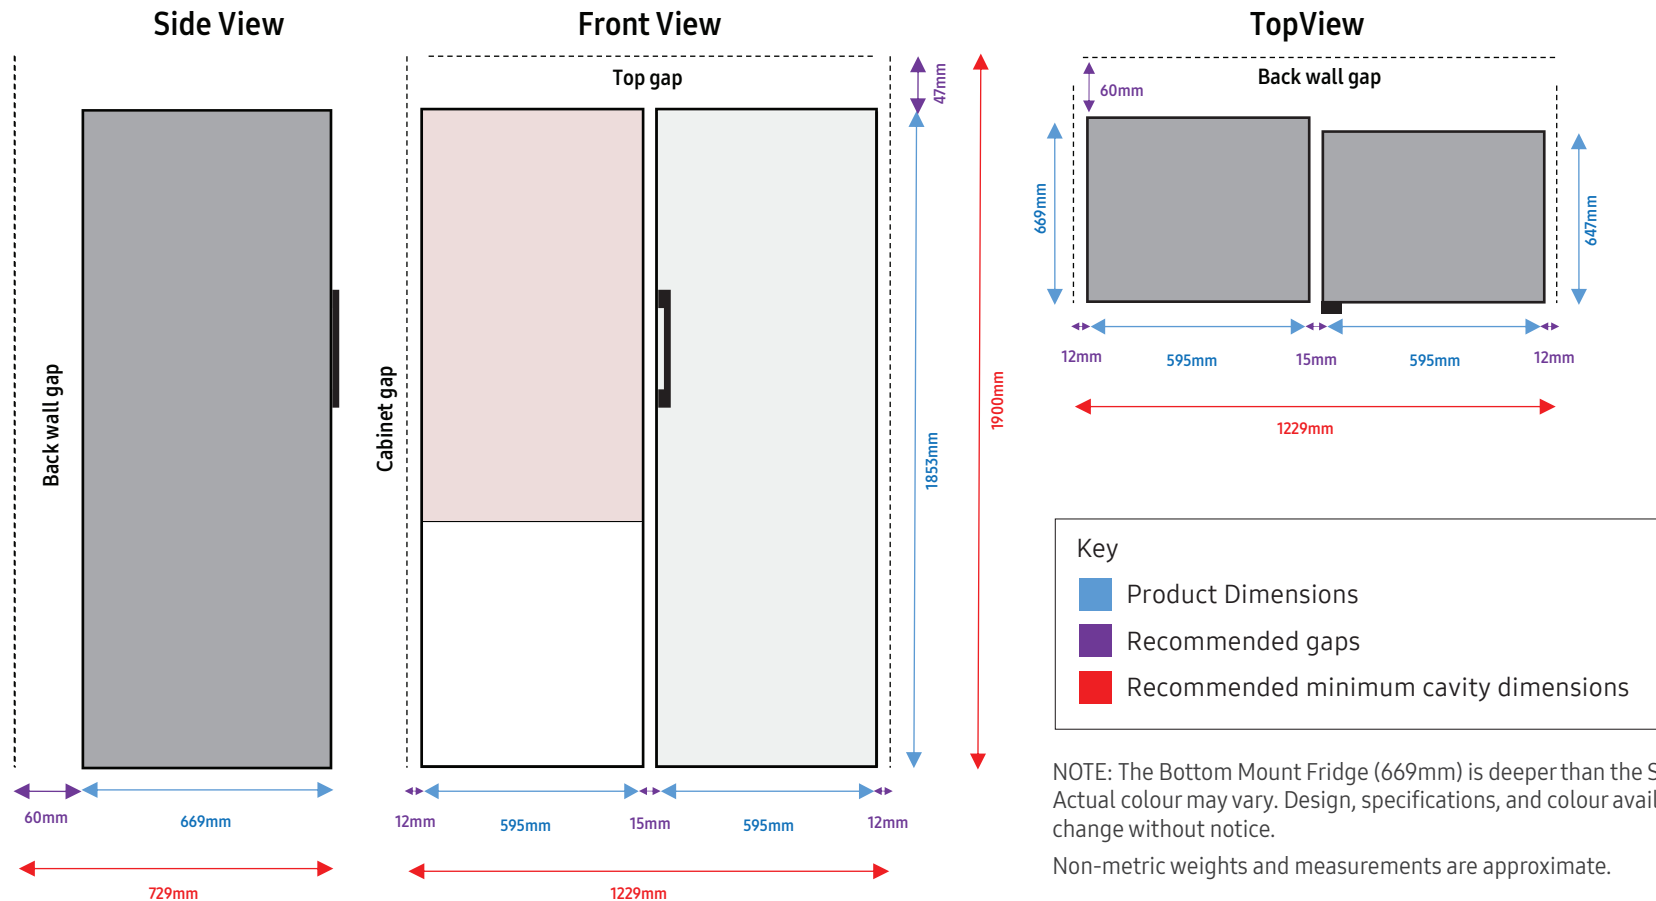

Recommended distance from back wall	60 mm
Recommended gap from sides of the cabinet	12 mm
Recommended gap between refrigerator units	15 mm
Recommended gap from the top of the fridge to the cabinet	47 mm

Examples of modular configurations

The Bottom Mount Fridge (669mm) is deeper than the Single Door (647mm)
 These are the most commonly expected combinations, not all possible combinations

Modular Bottom Mount Fridge + Single Door Fridge or Freezer

Physical specifications

Recommended distance from back wall	60 mm
Recommended gap from sides of the cabinet	12 mm
Recommended gap between refrigerator units	15 mm
Recommended gap from the top of the fridge to the cabinet	47 mm

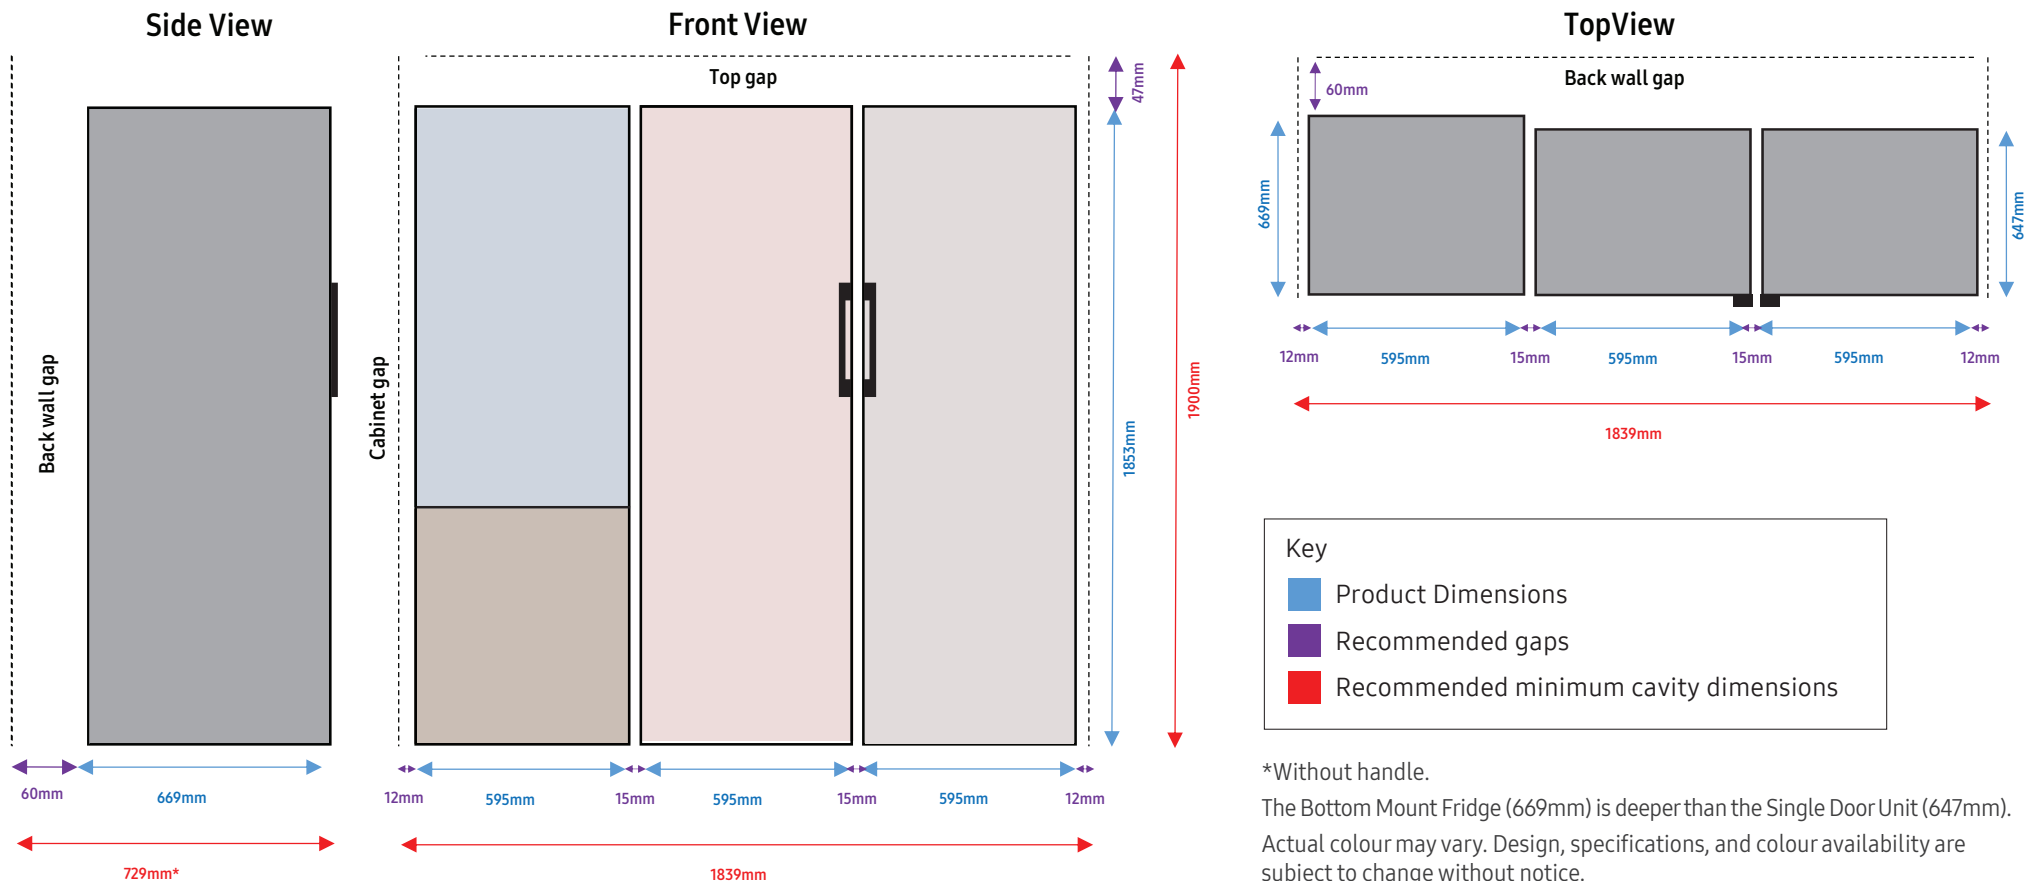

The best style of refrigerator
...Is your style

Examples of modular configurations

The Bottom Mount Fridge (669mm) is deeper than the Single Door (647mm). These are the most commonly expected combinations, not all possible combinations.

Modular Bottom Mount Fridge + 2 Single Door Units

*Without handle.

The Bottom Mount Fridge (669mm) is deeper than the Single Door Unit (647mm).

Actual colour may vary. Design, specifications, and colour availability are subject to change without notice.

Non-metric weights and measurements are approximate.

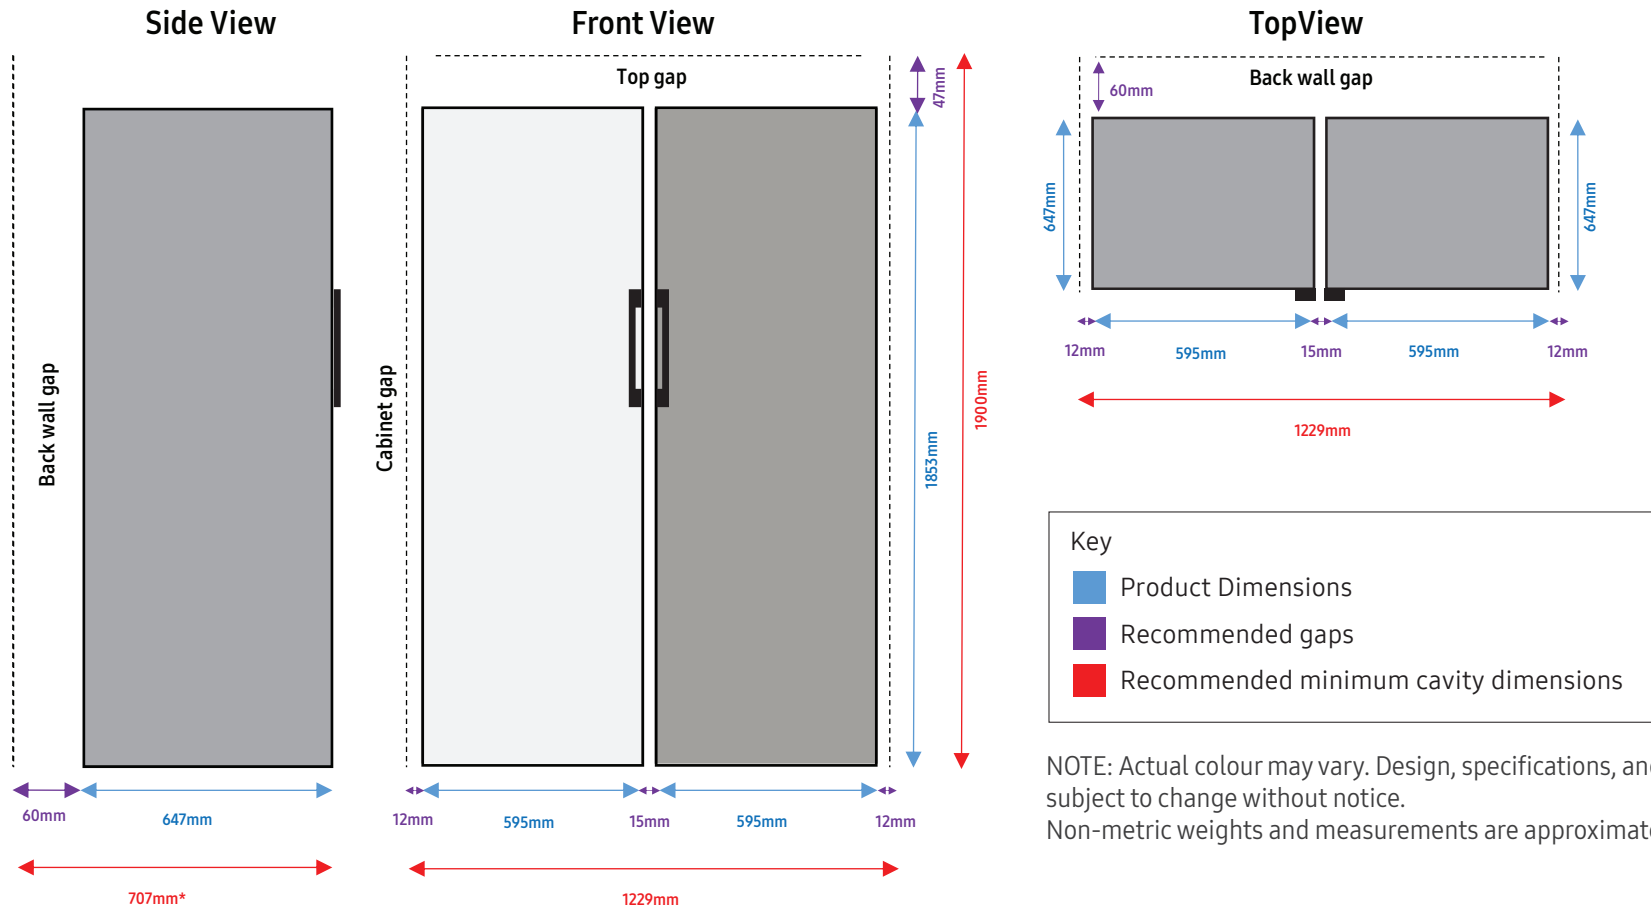

Physical specifications

Recommended distance from back wall	60 mm
Recommended gap from sides of the cabinet	12 mm
Recommended gap between refrigerator units	15 mm
Recommended gap from the top of the fridge to the cabinet	47 mm

Examples of modular configurations

Modular Single Door Fridge + Single Door Freezer

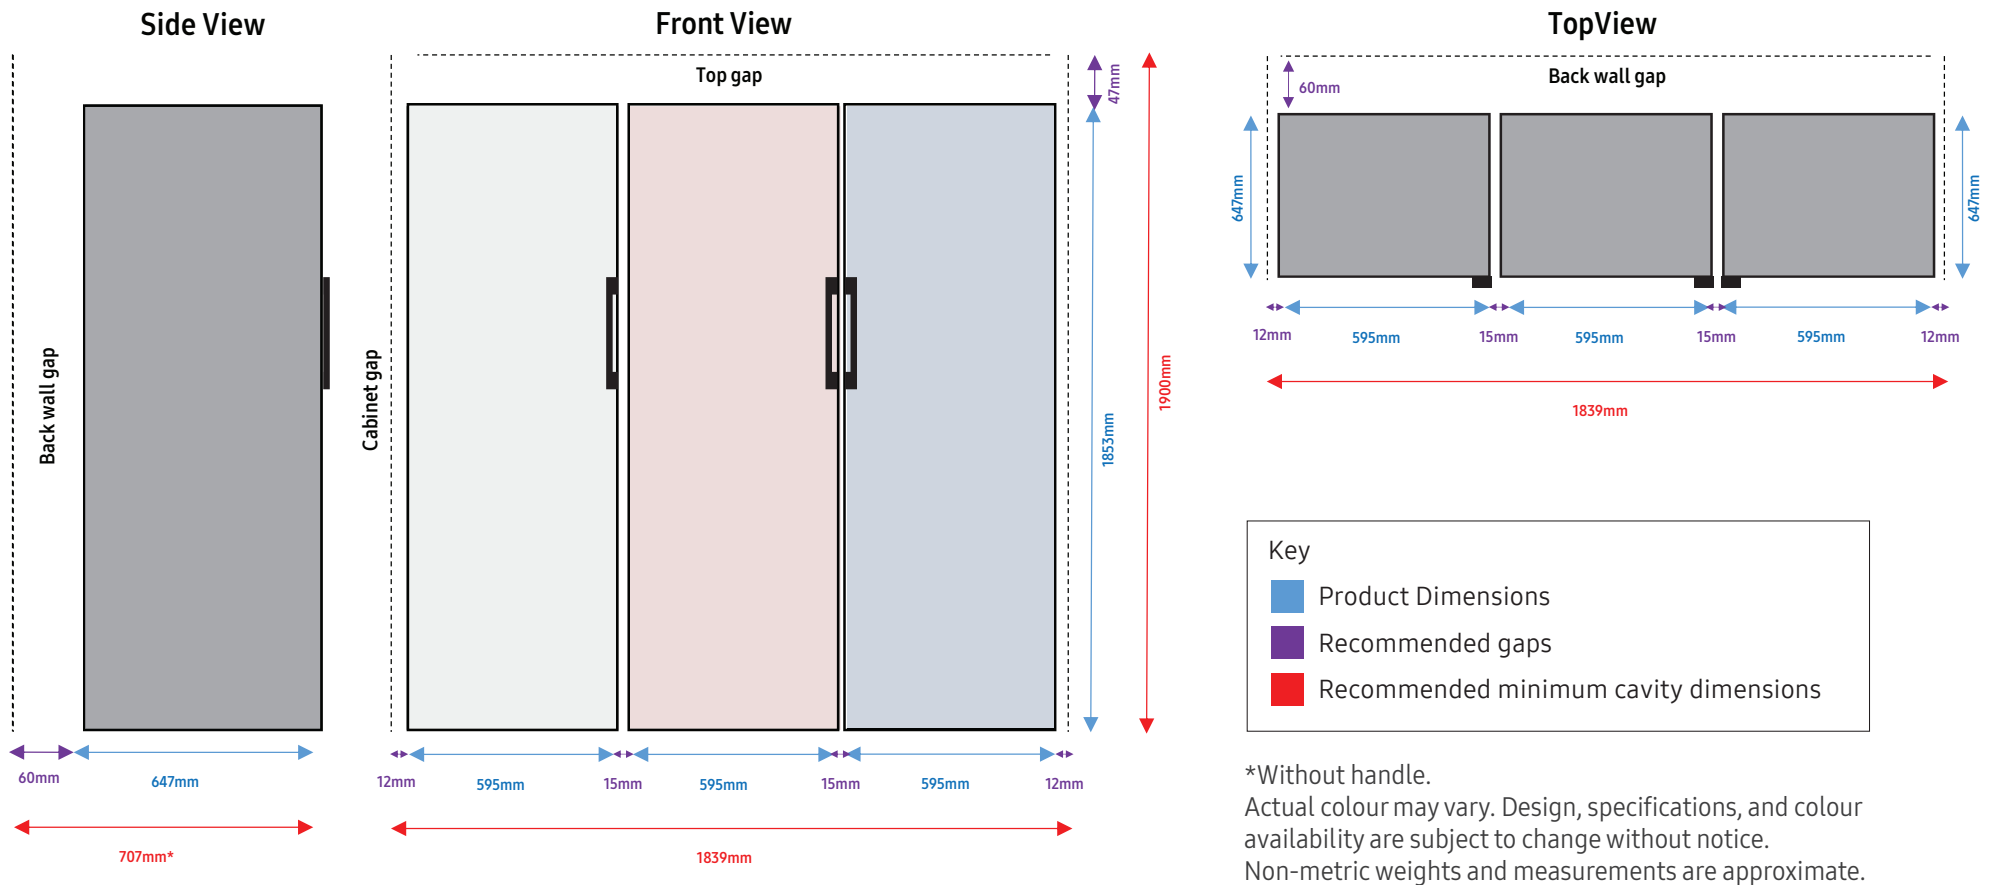

Physical specifications

Recommended distance from back wall	60 mm
Recommended gap from sides of the cabinet	12 mm
Recommended gap between refrigerator units	15 mm
Recommended gap from the top of the fridge to the cabinet	47 mm

Examples of modular configurations

Modular Single Door Fridge x 2 + 1 Single Door Freezer

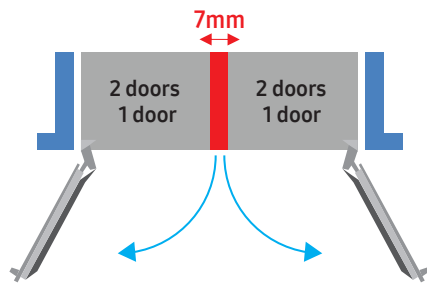

Physical specifications

Recommended distance from back wall	60 mm
Recommended gap from sides of the cabinet	12 mm
Recommended gap between refrigerator units	15 mm
Recommended gap from the top of the fridge to the cabinet	47 mm

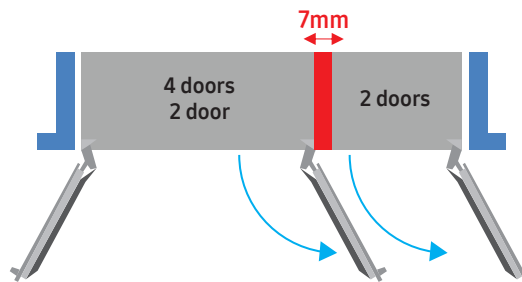

Things to consider

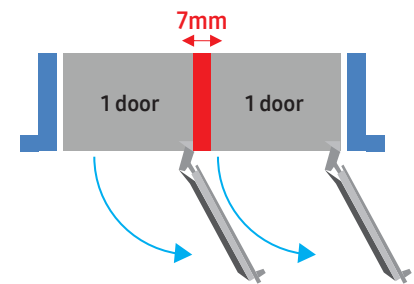

1. Direction in which the fridge doors open if two or more modular units are being combined.
2. Combination of fridge units from the modular range. These cannot be combined with the Free-standing French Door Fridge.
3. The recommended gap between outer edges of the fridge units and the cabinet is 12mm.
4. Modular Single Door Fridge and Freezer come with an external 'bar' handle, all others have recessed handles.
5. If combining multiple modular units, please consider the power socket and if there's enough provision units.
6. A Pairing Kit provides a seamless join when installing two or more Bespoke Modular units. This is included in your product delivery and will be handled by a qualified installer at the time of set up and installation.

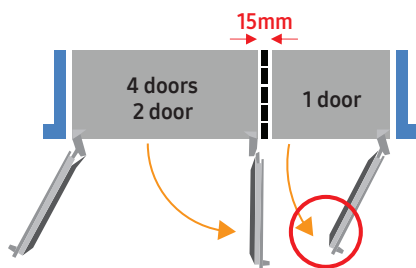

If the doors open in opposite directions.

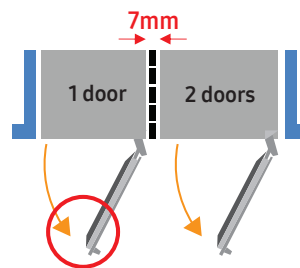

If the doors open in the same direction
(not assembled with a 1-door unit).

If the doors open in the same direction
(when 1-door units are assembled together).

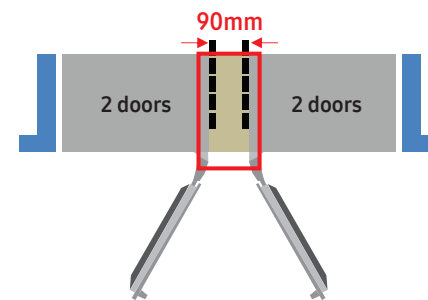

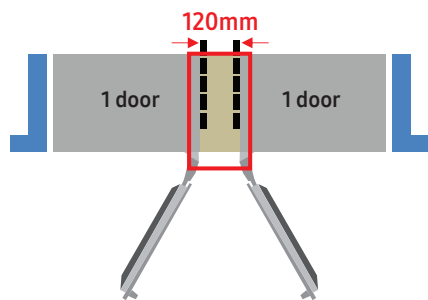

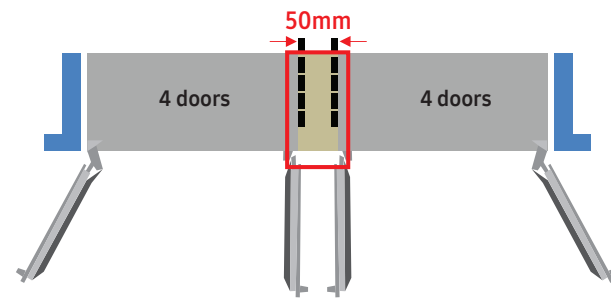

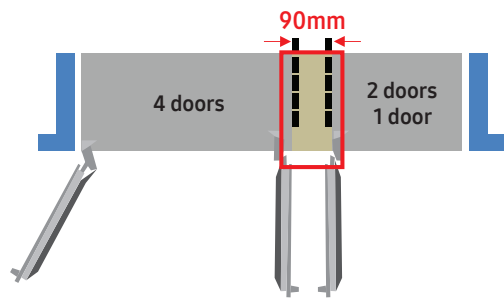

Another product located in the direction
of 1-door handle assembly.

Another product located in the opposite
direction of 1-door handle assembly.

Things to consider

Here are some examples of door directions that require more than 15mm gap between fridges. Fridge doors opening into each other means more gap will be required to allow for door clearance. This will ultimately impact the overall look for your Custom Fridge Design.
