# Understanding the Education market dynamics

# Samsung for Education Value proposition per audience

**Students, Teachers audience, Education**

**Senior Leadership**

Connected x Accessible Learning

## Connected learning for every mind

Samsung for Education helps students and teachers thrive, with versatile, AI-enabled devices that fit every learning need. Built to connect students to knowledge and devices to broader ecosystems, they unlock smart, more inclusive ways to learn.

**IT decision makers and resellers**

Connected x Secure Learning

## A safe path to connected learning

Samsung for Education helps students and teachers thrive, with secure devices that protect learning journeys. Built to connect students to knowledge and devices to broader ecosystems, they create a trusted foundation for smart, safer ways to learn.

# 2.0

Product offering per audience segment

# Samsung for Education audiences

## Primary School

Connecting students with intuitive and portable devices that spark curiosity in every learner.

## Secondary School

Reliable and versatile devices that support growing independence and deeper connected learning.

## College – Further Education

Professional-grade devices that bridge the gap between education and employment, building the real-world skills students need to succeed.

## University - Higher Education

Connecting ambitious learners to portable and powerful devices that help them study smart and create faster.

## Teachers

Reliable and powerful devices to simplify classroom management, support every learner, and give you back more time to teach.

# Primary education proposition

Connecting the classroom with tools that spark curiosity in every learner.

## Galaxy Tab A11+

**Get hands on with learning and bring ideas to life.**

- Interactivity for hands on learning brings lessons to life in a fun, tactile way that helps students grasp new concepts.
- Smart learning with Galaxy AI. With features like Circle to Search with Google, students can instantly look up concepts without leaving their app, helping them find answers and stay in the flow of the lesson.
- A versatile tool for any subject. From the Samsung Learning Hub to thousands of apps on the Google Play Store, the Galaxy Tab is ready for maths, art, reading and everything in between.

## Galaxy Chromebook 11"

**Easy for young learners to use and carry. Easy for staff to manage.**

- Designed to pick up and go. With an intuitive interface that's easy for kids to use, learning can start in seconds.
- Ready for the school day and beyond. With a thin, light design and a long-lasting battery, learning can go from the classroom to the library without missing a beat.

## Galaxy Book 360 15.6" (2-in-1)

**The full power of a laptop for learning to type, with all the creative fun of a tablet.**

- Perfect for group projects. The large, vibrant screen makes it easy for students to gather around, share ideas, and learn together.
- Ready for bigger ideas. With the power of a full PC, it can handle more creative projects and grows with students as their skills advance.

# Primary School use cases

	Galaxy Tab A11+	Galaxy Chromebook 11"	Galaxy Book 360 15.6" (2-in-1)
Use case	Keep pupils engaged with exciting, unique learning experiences.	Promote independence and inclusion in the classrooms.	Foster collaboration, presentation confidence and digital skills.
Scenario	<p>Students in their first years of school can use apps like 'Teach Your Monster to Read' or 'DoodleMaths' on their Samsung Galaxy tablets.</p> <p>These apps help make learning fun, enabling children to progress at their own pace. Teachers can monitor progress in real time and assign tasks depending on each student's unique needs.</p>	<p>For a pupil learning with dyslexia, reading can be challenging.</p> <p>Samsung Galaxy Chromebooks can help overcome some of these challenges through text-to-speech software available to both students and teachers.</p>	<p>Students working on a group homework project can present on the Galaxy Book 360 flipped into tent mode. They're able to show off their work, while classmates annotate live using the S Pen.</p> <p>Teachers can quickly flip the device back to laptop mode in between presenters to type instant feedback and upload it to Google Classroom—no extra hardware, no wasted learning time.</p>

# Secondary education proposition

Reliable and versatile devices that support growing independence and deeper connected learning.

## Galaxy Tab S with keyboard

Type, swipe, sketch and learn the way you want.

- The ultimate 2-in-1 for school. Why choose? Have both. Type your essay with the keyboard for English, then snap it off to sketch in art class or do research for history. It's the one device that adapts to any subject.
- All the apps you need, ready to go. Get the best of both worlds. It runs your go-to productivity apps like Microsoft 365.
- Lightweight for your backpack, not on features. Get the portability of a tablet with the power to get your work done. It's easy to carry around all day without sacrificing the tools you need to succeed.

## Galaxy Chromebook Go 14"

The tough, go-anywhere Chromebook that keeps learning connected.

- Built for student life. With a military-grade durable design and a spill-resistant keyboard, it's engineered to handle the bumps, drops and knocks of a busy school day.
- Learning beyond the classroom. Built-in LTE connectivity ensures every student can access online resources and homework, helping to close the digital divide for those without reliable home Wi-Fi.
- Ready for collaboration. The lightweight design makes it easy to carry between classes, while the 180-degree hinge lays flat for effortless group work and sharing.

## 2-in-1 Galaxy Book 360 13.3" & Galaxy Book6 14"

A true laptop for serious coursework and the flexibility of a tablet.

- A mode for every subject. Type essays in laptop mode, annotate PDFs for history in tablet mode, or stand it up to run a science simulation for the class.
- Perfect for group projects. The large, vibrant screen makes it easy for students to gather around, analyse data in a spreadsheet and build presentations together.
- Power that lasts through GCSEs and beyond. With the performance of a full PC, it can handle demanding software for subjects like design or coding, ensuring it's a smart investment that grows with your students.

# Secondary school use cases

	Galaxy Tab S with keyboard	Galaxy Chromebook Go 14"	2-in-1 Galaxy Book 360 13.3" & Galaxy Book6 14"
Use case	Empower students to create content and flex their learning.	Keep students connected safely, inside and outside of the classroom.	Power creative coursework and advanced STEM projects.
Scenario	<p>Year 10 geography students can conduct fieldwork by using the Galaxy Tab to take photos, record observations and access online maps.</p> <p>Back in the classroom, they attach a keyboard to the Tab to write up their reports. They're also able to easily embed the photos they took directly into the document.</p>	<p>In a Year 9 science class, students work in small groups to analyse experiment data, inputting results into a shared spreadsheet using their Galaxy Chromebook Go devices.</p> <p>They can lay the screen flat, thanks to its 180-degree hinge, turning it into a share digital workspace. Now the whole group can easily see charts and data, writing shared conclusions before submitting them through Google Classroom.</p>	<p>In an A-level media studies class, students can use one device to take a project from concept to showcase. They sketch storyboards on the Galaxy Book 360 in tablet mode, then flip it into laptop mode to edit footage. Switching to tent mode, the student screens the final cut for classmates, rendered by the Core™ processor.</p>

# Further Education proposition

High-performance and versatile devices that connecting ambitious students to their professional future.

## Galaxy Tab S Series

### Your portable portfolio and project powerhouse

- Bring ideas to life. Sketch designs, mark up plans, or take client notes with the precision of the S Pen, building a digital portfolio of your best work on the go.
- Work like a pro, anywhere. Snap on the keyboard and switch to DeX mode for a desktop experience, perfect for building professional reports and managing projects.
- From classroom to work placement. Its slim, lightweight design makes it the perfect on-the-go companion, moving easily between the workshop, campus and job interviews.

## Galaxy Chromebook Plus

### The smart, simple way to manage your course and career

- Your practical AI assistant. Use built-in Google AI to draft professional emails to employers, organise project timelines and polish your CV for job applications.
- Instant on, always ready. Boots in seconds so you can get straight to work, whether you're in a workshop, collaborating on a group project, or applying for jobs online.
- Effortless and reliable. Enjoy the simplicity and security of ChromeOS, so you can focus on building your skills, not managing your device.

## Galaxy Book5 and Book6 Series Copilot+ PCs

### The professional AI-enabled PC to master your trade.

- Run the software of your future career. Engineered to flawlessly handle the industry-standard software for your trade, from CAD and Adobe Creative Suite to complex data analysis.
- Your AI-enabled career coach. With Copilot on-device, you can work smart, not harder. Get help debugging code, analysing data and preparing professional-grade presentations.
- Build a portfolio that gets you hired. All the performance you need to create a standout portfolio of your best work, giving you a crucial advantage in the job market.

Security | Accessibility | Durable Quality

# Higher Education proposition

Connecting ambitious learners to portable and powerful devices that help them study smarter and create faster.

## Galaxy Tab S Series

Your digital notebook, textbook and creative studio in one.

- Revolutionize your note-taking. Go beyond typing. With the ultra-responsive S Pen, you can write directly onto lecture slides, annotate research PDFs and organize your thoughts with ease.
- A true laptop-like experience. Snap on the keyboard and switch to DeX mode for a full desktop interface, perfect for writing long essays and managing multiple sources like a pro.
- Brilliant for work and downtime. The stunning Dynamic AMOLED 2X1 display makes reading textbooks easy on the eyes and brings your favourite movies and shows to life in incredible detail.

## Galaxy Chromebook Plus

The smarter, faster way to power through your degree.

- Your AI-enabled study partner. Use built-in Google AI to summarize lectures, draft essays and accelerate your research, right from your keyboard.
- Instant on, always ready. Boots in seconds so you can capture ideas in a lecture or start working instantly, without missing a beat.
- Simple, secure and stress-free. Enjoy the effortless simplicity and built-in security of ChromeOS, so you can focus on your studies, without interruptions.

## Galaxy Book5 and Book6 Series Copilot+ PCs

Pro-level performance for the next generation of professionals.

- Pro-grade performance for your course. Engineered to run the demanding, professional-grade software you need for design, coding and research, so your ambition is never limited by your hardware.
- Your AI-enabled study partner. With Copilot on-device, you can work smart, not harder. Get help with research, writing and analysis, giving you an intelligent edge in every subject.
- Power that's built for campus life. All that performance is packed into a slim, lightweight design with a long-lasting battery, making it the perfect companion for lectures, the library and everywhere in between.

# Further & Higher Education use cases

	Galaxy Tab S Series	Galaxy Chromebook Pro	Galaxy Book Ultra
Use case	Provide a hub for technical coursework, from complex note-taking to work submission.	Simplify cloud-first learning and develop career-ready content creation skills.	Run specialist, processor-intensive software for creative and technical learning.
Scenario	<p>An engineering student can use the S Pen on their Galaxy Tab S Series device to jot down notes during lectures, annotate complex formulas and draw diagrams in Samsung Notes.</p> <p>In the library, they use Samsung DeX to connect to a keyboard and monitor to write a detailed lab reporting, dragging and dropping hand-drawn diagrams straight into the document.</p>	<p>A business student boots up in seconds to draft a marketing plan in Google Docs, then taps built-in Google AI to polish the tone.</p> <p>Offline on the train home, they keep working in Canva. The moment Wi-Fi returns, it all syncs automatically, ensuring no version-control headaches.</p>	<p>An architecture student uses their Galaxy Book Ultra to run demanding software like AutoCAD and Revit. The dedicated graphics card allows for real-time rendering of complex 3D models, enabling them to create and present professional-quality designs.</p>

# Teachers & Educators proposition

Reliable and intelligent devices to help you manage your workload, design inspiring lessons and foster classroom collaboration.

## Galaxy Book

**Flexible, reliable power to manage your entire school day.**

- Master your daily workload. Effortlessly handle lesson planning, grading and administrative tasks with a responsive laptop built for multitasking.
- Ready for life on the move. The slim, lightweight design and long-lasting battery make it easy to work from the classroom, staff room, or home without being tied to a charger.
- Connect to your classroom. Seamlessly link to your interactive whiteboard or projector to share lessons, videos and student work with the entire class.

## Galaxy Book Pro & Ultra

**The AI power to reclaim your Time and focus on students**

- Built for the demands of teaching. Experience uncompromising performance with a powerful processor and premium, durable build, ensuring your device is reliable day after day, year after year.
- Reclaim your planning time. Let Copilot help you brainstorm lesson ideas, create differentiated materials and generate quizzes in minutes, not hours.
- Automate your admin. Use Galaxy AI features like Note Assist to instantly summarize meeting notes and Intelligent Search to find any file in seconds, giving you back valuable time for your students.<sup>1</sup>

## Interactive whiteboards

**The dynamic canvas for making every lesson collaborative and engaging.**

- Make learning a team sport. Turn the front of the class into a dynamic canvas where students can write, draw and interact with content together, making every lesson active.
- Your intelligent lesson partner. With AI-enabled voice-to-text for notes and instant lesson summaries, you can focus more on your students and less on administrative tasks.
- Connect the entire class. Easily share work from individual student devices to the main screen and use Split Note Mode to let multiple students collaborate at the front at once.

# Teachers use cases

	Galaxy Book	Galaxy Book Pro & Ultra	Interactive whiteboards
Use case	Streamline assessment and get deep learning insights from in-built tools.	Harness on-device AI to slash admin and personalise learning.	Help students grasp concepts with visual and tactile learning.
Scenario	A primary school teacher can use their Galaxy Book and Microsoft Teams to create and distribute a reading assignment. Using Reading Progress, students record themselves reading a set passage, with the teacher able to auto-analyse accuracy, reading speed, comprehension and more. They can then provide targeted feedback directly, using rich data to discover which students might need special support.	When planning a science lesson, a teacher can use Microsoft Copilot+ on their Galaxy Book Ultra to summarise dense academic articles that might be too complicated for younger students. They can also generate more challenging questions for more advanced students, or helpful tips for those struggling. On-device AI can process these requests in seconds, ensuring teachers have tailored resources ready whenever they need them.	When it comes time for younger students to learn fractions, a teacher could use the SMART Board to make everything clear. They demonstrate halves and quarters by dragging and dropping slices from a virtual pizza. Pupils can then try the board themselves, solving interactive puzzles together. The session is recorded and uploaded to the school learning platform for revision and teacher training.

# 3.0

Adapt & Enhance

# Enabling a seamless teaching experience

Whether you are new to Samsung or a frequent user our devices provide a seamless and safe path to connected learning.

Connected learning for every mind. Our partnerships with Microsoft and Google keep the existing apps and workflows that help enable your workflow, ensuring seamless adoption across our devices.

A safe path to connected learning. Keep your device and data secure with built in government grade Knox security<sup>1</sup>, and get the most from your devices with a wide range of support service options.

# Samsung and Google for education

Unlock a new level of performance from your Google ecosystem with premium Samsung hardware, featuring our exclusive on-device Galaxy AI to amplify learning and a foundation of built-in Knox security to protect your students and data.

**Galaxy Chromebook Plus**  
Galaxy meets Google Gemini

**Apps that you know, optimised for Samsung devices**

Run the Google Workspace and Classroom tools you rely on with the flawless performance they deserve. Our purpose-built Galaxy Chromebooks, Android-powered Galaxy Tab and interactive whiteboard are designed to enable seamless collaboration and creativity at the heart of your curriculum so every student can realise their full potential.

**Galaxy Tab S11 | Tab S11 Ultra**  
Google Gemini

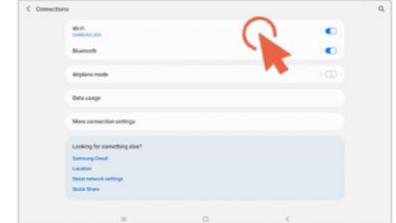

**Gemini for Education**  
A version of the Gemini app built to meet the needs of the educational community

**Assistive AI for adaptive learning**

Magnify every teacher's impact with our unique dual-AI approach. Google Gemini<sup>1</sup> and on-device Galaxy AI<sup>2</sup> combine to offer powerful, assistive support for differentiated learning. This partnership gives valuable time back to teachers while providing safe, "low-risk" AI experience for students, designed to help them learn with confidence.

**Knox Remote Support**

**Enhanced security and device management**

Build on a foundation of trust. Chromebooks are secure by default, with zero reported ransomware attacks. We strengthen this with Samsung Knox for School enhances security and simplifies control for your IT team with features like zero-touch enrolment. This complete solution protects your investment, safeguards student data, and gives your teachers more time to teach.

1. Compatible with select languages only. Google account login and network connection required. Google and Gemini are trademarks of Google LLC.

2. Samsung account login is required for certain AI features. Samsung account login and network connection may be required for certain AI features.

# Samsung and Microsoft for education

Amplify your Microsoft for Education ecosystem. Samsung devices are the ultimate platform for the tools you trust, delivering unparalleled performance, exclusive dual-AI innovation, and built-in security.

## Unlock future ready skills for students

Build students' confidence by teaching them with the tools they will use in the modern workplace. Samsung premium devices provide the flawless performance needed to run Learning Accelerators on Microsoft 365 and Windows 11 Pro at their best, ensuring a seamless experience from classroom collaboration in Teams to complex projects.

## Adapted learning with Dual AI

On Samsung devices, Microsoft Copilot+ and Galaxy AI work together as a powerful teaching assistant. Help students practice their reading with Reading Coach, build confidence in maths, or even coach their presentation skills, creating a more supportive and accessible classroom for every learner. And helps teachers save time, create personalized lessons with tools like Learning Zone.

## On-device security and device management

Samsung devices work seamlessly with Microsoft Intune for comprehensive management. We then build on the most secure Windows platform ever with Samsung Knox, which creates multiple layers of security, working with Microsoft Pluto and TPM 2.0 to protect biometrics and aid theft recovery, ensuring the integrity of sensitive data and a secure user experience.

Galaxy Tab S11 Series

1. Requires internet connection and Microsoft Account login. Accuracy of results is not guaranteed.

2. Accessible via web browser or additional app download.

3. Gemini is a trademark of Google LLC.. Requires internet connection and Google Account login. Accuracy of results is not guaranteed.

4. Circle to Search is a trademark of Google LLC. Requires internet connection.

5. Samsung Account login may be required to use certain Samsung AI features. Accuracy of results is not guaranteed

# Your data stays yours, and is never stored or retained

## Your data is not used for model training

Your data is not stored nor used for training AI models.  
It's only used for processing.

## Your data is not retained by Samsung or Google

For Cloud-based Galaxy AI features, Samsung use Google Cloud Platform. Depending on the AI feature used, your data is only processed either by Samsung or by Google on Samsung's behalf – but never retained.

# Samsung Security

A built-in layer of protection on Samsung Galaxy devices.

Samsung Galaxy devices feature Knox Security built-in<sup>1</sup>, protecting them with **government-grade security** from the chip up. This means that your student's and school data stay safe from malicious threats from the moment they turn their Galaxy device on, with **multiple layers of security across hardware and software**

# Galaxy Book Security

Knox Chip, Designed to provide best in class hardware backed security to meet the needs of enterprise users, Provides a high level of firmware protection and robust firmware recovery capabilities. dTPM ready, BIOS level to secure the data.

# Chromebook Security

ChromeOS is a highly secure operating system built on a Zero Trust model, featuring multiple layers of protection like Verified Boot, sandboxing, automatic updates, and hardware-backed security with the H1 chip. It is designed to resist traditional viruses, encrypts user data by default, and provides enterprise management tools.

No viruses in ChromeOS

# Longevity and Security

## Hardware Protection & Peace of Mind

Our devices are built for the rigors of education and backed by a warranty that protects your investment.

### Standard Protection:

- Chromebook devices come with a 1-Year Warranty as standard and PC devices (Pro-OS) come with 3-year.
- Tablet devices come with a 2-year Warranty as standard and Rugged devices come with 3-year Warranty.

### Long-Term Confidence:

- Upgrade your coverage with optional 5-Year Enhanced Service Packs for ultimate budget predictability.

## Software Longevity & Security

A device is only as good as its software. For Tablets we future-proof your fleet by keeping devices secure and modern for years after purchase.

### Up to 7 Years of Security Maintenance Release updates:

We provide consistent updates to ensuring protection against the latest threats and safe digital learning environment.

### 7 OS Updates:

Run the latest educational apps and software without compromise thanks to regular operating system upgrades, ensuring every student has access to the most current and effective learning tools.

# Knox Suite

Let your school secure and configure devices right out of the box, then seamlessly manage them for a more optimal e-learning environment.

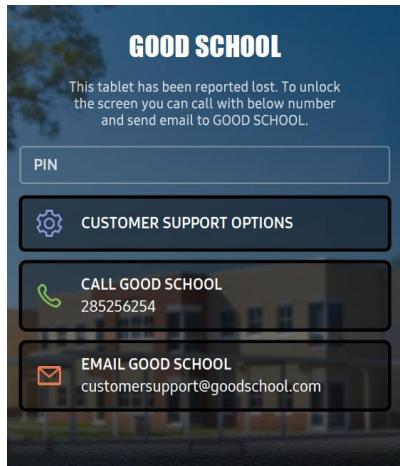

Secure	Configure	Deploy	Manage	Analyse	Troubleshoot
<b>Knox Platform for Enterprise</b>  Access advanced security and management features.	<b>Knox Configure</b>  Auto-provisioning and configuration at initial boot-up	<b>Knox Mobile Enrolment</b>  Bulk enrol devices to your MDM/EMM	<b>Knox Manage</b>  Remotely manage devices and enforce policies	<b>Knox Authentication Manager</b>  Sign-in automation for shared devices	<b>Knox Asset Intelligence</b>  Cloud-based data analytics for operational insights and productivity.
<b>Knox Guard</b>  Remotely lock tablets that are reported lost or stolen.	<b>Knox Mobile Enrolment Advanced</b>  Secure EMM enrolment	<b>Knox E-FOTA</b>  Schedule and control firmware updates and security patches.	<b>Knox Service Plug In</b>  Put Knox features into production immediately from a Knox console in Microsoft InTune, Workspace One, SOTI, etc.	<b>Knox Remote Support</b>  Remotely take control or troubleshoot devices	

# Knox Guard for Schools

Deterring fraudulent theft claims for Mobile & Tablet devices.

## Lock tablets that are reported lost or stolen

Once a device-loss claim has been made, Knox will lock that device remotely.

## Ensure lock isn't disabled by hackers

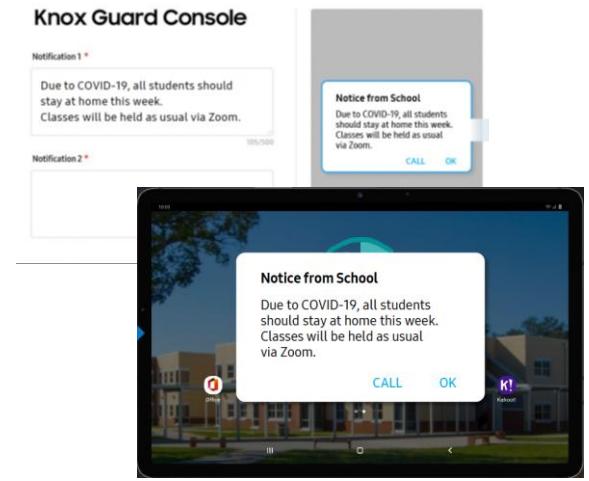

The Knox security platform prevents malicious users from disabling the lock.

Hardware-Backed Security  
Unauthorized Firmware Blocking  
IMEI Tamper Proof  
Network Bypass-Proof

## Easily send out messages to all students

Send important notices using the Knox web console. They will be transmitted directly to the students' devices.<sup>2</sup>

1. Valid Samsung Knox Account required.

2. Knox Guard is a software tool that can underpin the features stated above for Samsung Smartphones and Tablets.

# Knox Configure for Schools

For Mobile & Tablet devices.

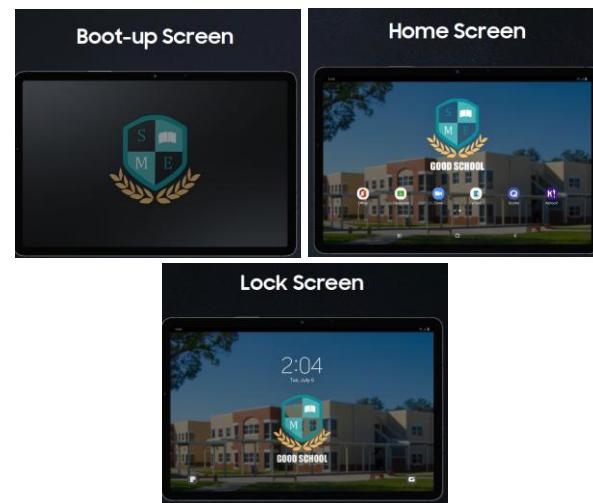

## Configure Thousands of Tablets Remotely, Right Out of the Box

All done over the cloud -with less operation costs and manual errors.

## Rebrand Tablets With the Visual Assets of Your School

Embed the school brand, including boot-up screens, customized home and lock screens.

## Help Your Students Concentrate

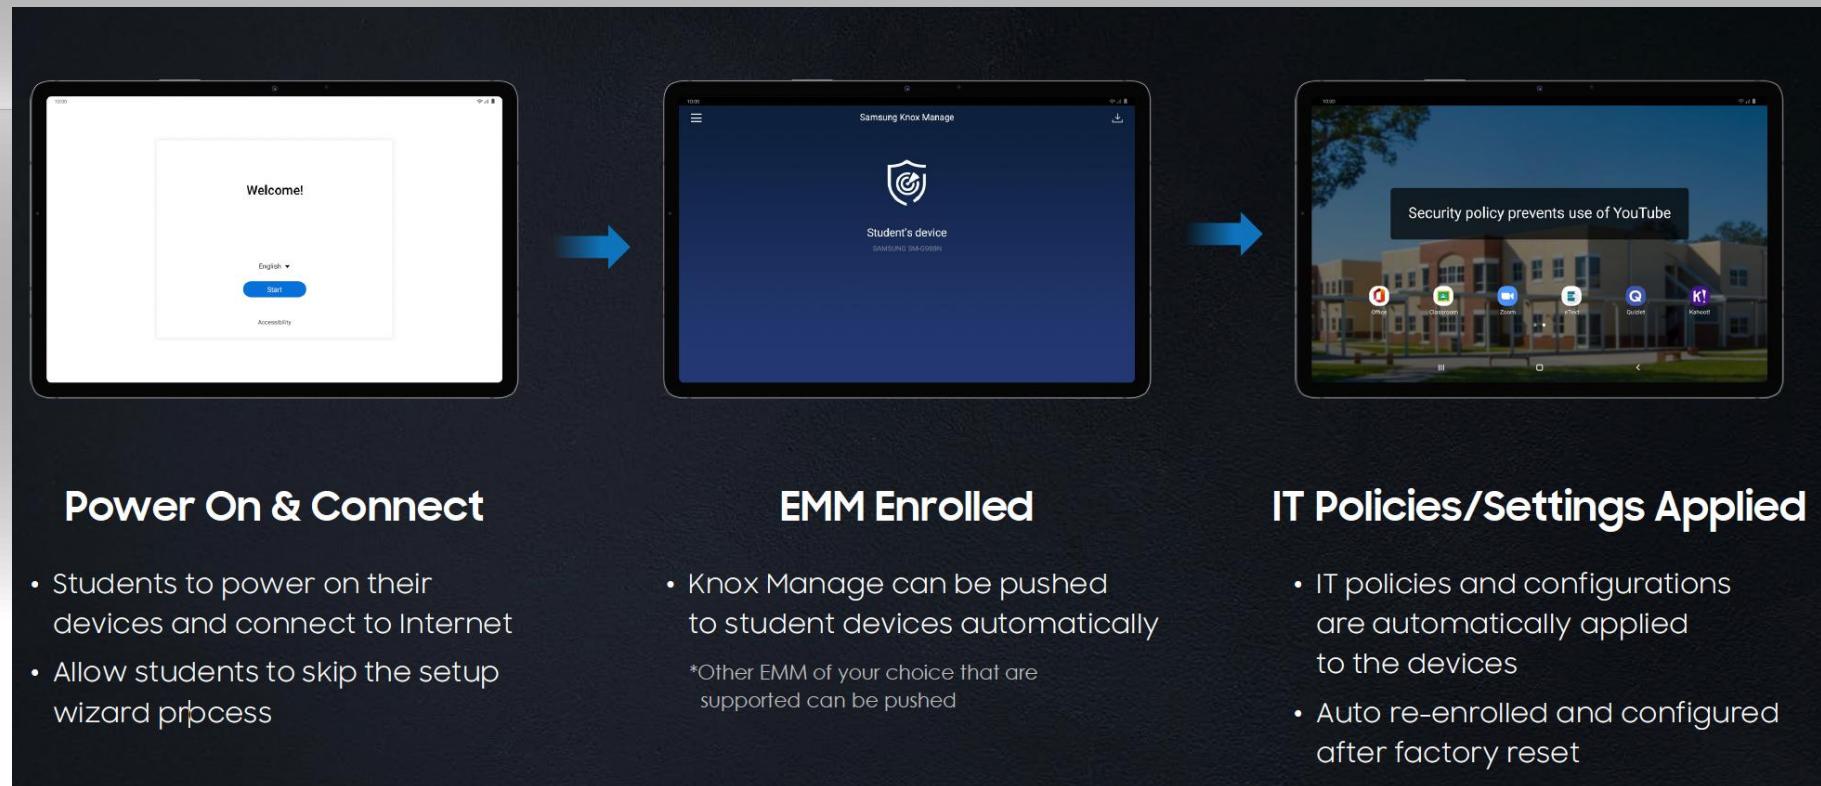

Block specific apps and sites that you don't want students to access

# Knox Mobile Enrollment for Schools

## Automated and Streamlined EMM Enrollment

Easily provisioning fleets of devices, out-of-the-box, with Knox Mobile Enrollment, to enrol them into your EMM platform.

### Power On & Connect

- Students power on their devices and connect to Internet
- Allow students to skip the setup wizard process

### EMM Enrolled

- Knox Manage can be pushed to student devices automatically

\*Other EMM of your choice that are supported can be pushed

### IT Policies/Settings Applied

- IT policies and configurations are automatically applied to the devices
- Auto re-enrolled and configured after factory reset

# Knox Suite Essentials Plan for Schools

For Mobile & Tablet devices.

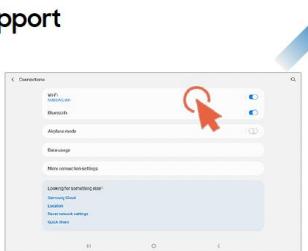

## Remotely Access Your Students' Tablets to Troubleshoot

Knox Manage allows IT staff to access and control students' tablets remotely

### Knox Remote Support

Remote Support

- Menu
- Home
- Back
- Power
- Vol-
- Vol+
- Rotate
- Record
- Capture

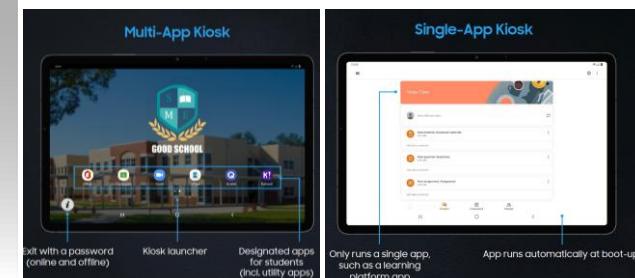

## Intelligently Apply Policies Based on User Environments

Dynamically apply device settings and restrictions based on various events

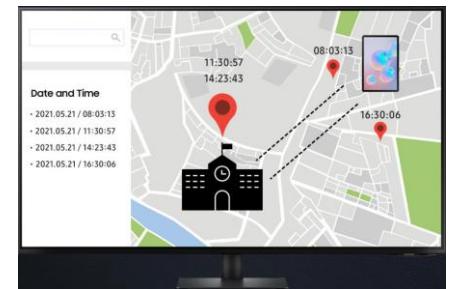

## Turn Tablets into Kiosks for More Dedicated Usage

Allow students to run only a single app or a group of apps, or a browser with specific URLs only

## Track Location of School Tablets

Device location data can be recorded periodically for asset management

Tablet & DeX

# Why Galaxy Tab?

## Best Displays

Galaxy Tabs bring learning to life on high-resolution displays ranging from 10.9" to 14.6". Vibrant colour and smooth refresh rates create an immersive, comfortable viewing experience for every student.

## Powerful Performance

Galaxy Tabs deliver powerful performance for smooth multitasking across educational apps. Ample storage ensures there's always space for student work, from simple documents to large project files.

## Innovation S Pen

The innovative S Pen for Galaxy Tab mimics the feel of pen on paper, perfect for note-taking, annotating, and sketching. It's a powerful tool for boosting student engagement and understanding.

# Samsung DeX

Students get a full desktop experience with Samsung DeX. They can manage multiple windows on their Galaxy Tab, then wirelessly cast to a Samsung Smart Board to effortlessly share work and lead interactive class discussions.

# Galaxy Tab Range

## Galaxy Tab A11+

Bring learning to life on the expansive 11" screen of the Galaxy Tab A11+. Its wide display and immersive surround sound speakers are perfect for engaging with multimedia content and collaborative tasks, making learning accessible and captivating for every student.

## Galaxy Tab S10 Lite

Unlock new possibilities for learning with the first tablet in this range to include the S Pen. The responsive 10.9" screen provides a natural, pen-on-paper feel for note-taking and annotating, while the adaptive refresh rate ensures every interaction is super smooth.

## Galaxy S11 Series

For subjects that demand the highest detail and colour accuracy, the Galaxy Tab S11 Series excels. Its vibrant Dynamic AMOLED 2X display provides the ultimate digital canvas for students in art, design, and media, enhancing creative projects with more space and precision.

## Galaxy Tab Active Series

Built for the rigours of school life, from the science lab to the sports field. The rugged Galaxy Tab Active series is IP68 rated<sup>1</sup> and meets MIL-STD 810 requirements, providing robust resistance to water, dust, and shocks—perfect for outdoor learning, field trips, and use with younger years.

# What is Samsung DeX?

Samsung DeX is a platform built into the latest Galaxy phones and tablets, allowing you to power a desktop-like experience on an external display. Built for productivity, DeX enables you to use your tablets in place of traditional desktop PCs and laptops, simplifying workflows and reducing IT costs.

## The desktop experience

- With Samsung DeX, you can perform demanding, PC-like tasks with your Galaxy device
- Work on multiple apps at once, resize windows, drag and drop files with ease
- Leading productivity apps are already optimized for DeX

## The anywhere office

- Connect to a monitor or Samsung Interactive Display to use your device's existing tablet apps and data on a larger screen
- Get an intuitive PC-like multi-window desktop anywhere, without having to carry a PC
- Work simultaneously on up to five apps, including videoconferencing
- Continue to use your tablet while connected to a monitor or TV, and add a keyboard and mouse for enhanced usability

## Manageability and security anywhere

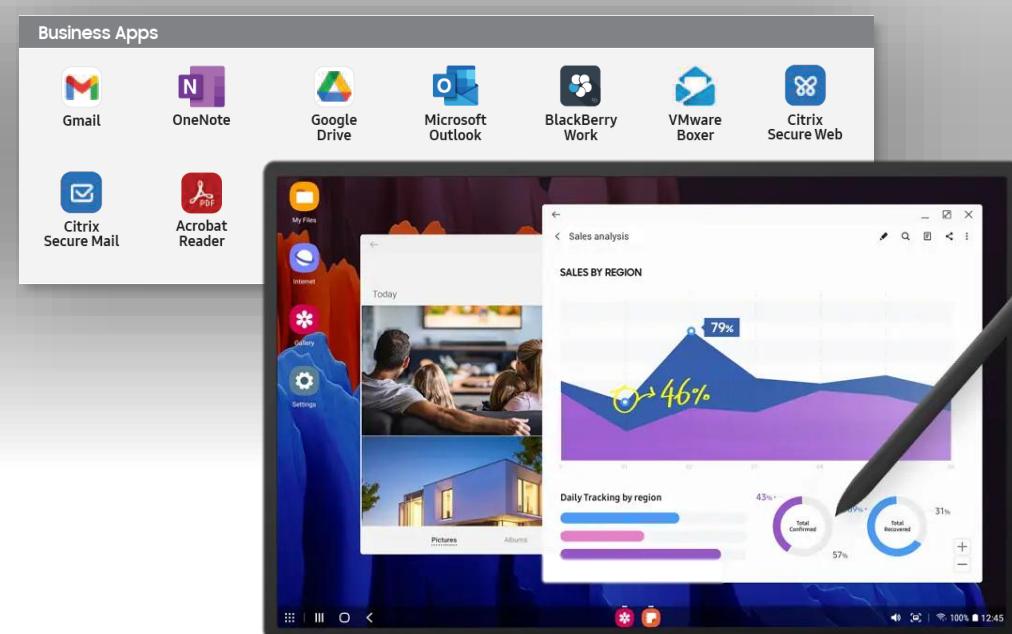

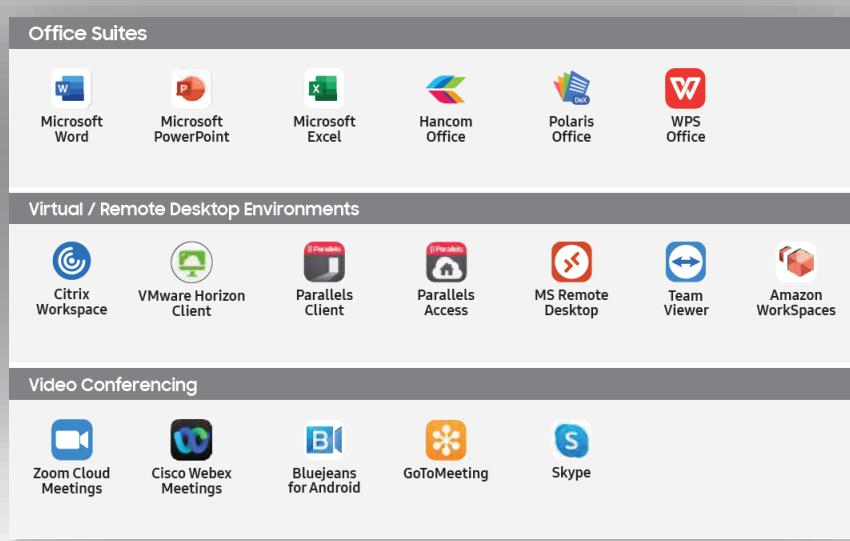

- Control which apps automatically open
- Built on the existing protection of Samsung Knox with additional device and network configuration and management capabilities

# Take your desktop with you

Samsung DeX transforms your smartphone or tablet apps from mobile apps to desktop apps. You can access your existing data, either on the device or from cloud-based apps and services, for seamless productivity.

Most apps can run in DeX mode, and more than 70 of the leading apps use are optimised for Samsung DeX, including Microsoft Office applications including Teams and Google Workspace.

# Galaxy Book Series

Copilot+PC

## Galaxy Book6 14" and 16"

Experience next-level performance for learning and teaching, boosted by AI. Equipped with the industry-leading Intel CPU and an advanced NPU, Galaxy Book6 has the power to handle demanding educational software and deliver transformative AI-enabled experiences for study and creative projects.

Copilot+PC

## Galaxy Book5 Pro 14"

Experience next-level performance for learning and teaching, boosted by AI. Equipped with the industry-leading Intel CPU and an advanced NPU, Galaxy Book5 pro with touch screen has the power to handle demanding educational software and deliver transformative AI-enabled experiences for study and creative projects.

Copilot+PC

## Galaxy Book6 Ultra

With the latest NVIDIA® GeForce RTX™ 5070/5060 Laptop GPU, Galaxy Book6 Ultra unlocks next-level creativity and entertainment experiences with high-speed AI image generation, super-smooth video playback and editing.

## Galaxy Book3 360

The Galaxy Book3 360 13" offers a versatile 2-in-1 experience in a lightweight form. Use it as a powerful laptop for research and assignments, or flip it into tablet mode to make full use of the touchscreen and the fast, accurate S Pen for detailed annotation and creative tasks.

# Why Galaxy Book?

## Go-anywhere Productivity

Lightweight and slim yet durable, Galaxy Books have a strong aluminium body perfect for the demands of the school day, easily carried by students and staff between classes, the library, and home.

## Best Displays

Galaxy Book displays offer up to 3K resolution for incredible detail in educational content. The super-smooth 120Hz refresh rate makes research seamless, while reduced blue light helps minimise eye strain during long study sessions.

## Powerful Processors

Powered by the latest Intel® Core™ processors, Galaxy Books deliver the speed and multi-core performance needed to run demanding educational software and multitask seamlessly through research and assignments.

## Galaxy Ecosystem

Create a connected learning environment. Galaxy Books work seamlessly with other Galaxy devices—use a Galaxy Tab as a Second Screen for more workspace, and instantly transfer files from a phone using Quick Share.

Chromebook

# Galaxy Chromebook Range

## Galaxy Chromebook Go 11" & 14"

Featuring a slim design, Galaxy Chromebook Go makes for a perfect fit for on-the-go learners. Made for mobility, in a timeless silver hue, it's ready to go wherever learning takes you. Having passed several of the MIL-STD-810H tests, Galaxy Chromebook Go pushes learning forward however tough the environment gets. Sturdy and shock-resistant, with reliable features like the spill-resistant keyboard, it is built to last and protect in classrooms and beyond.

## Galaxy Chromebook Plus

Experience our most advanced Chromebook yet. Featuring a perfect blend of top notch hardware and software as standard, Galaxy Chromebook Plus is powered by a powerful Intel® Core™ processor that supports seamless multitasking and online or offline access to Google apps. The new Quick Insert key grants instant access to emojis, the search bar, or useful AI boosted suggestions like 'Help me write' and 'Help me read.'

# Chrome Education Upgrade License

Chrome Education Upgrade empowers IT to create educational environments for teachers and learners to thrive in, with enhanced management, security, and support capabilities for ChromeOS Devices. Remotely manage, provision, deploy, and implement ChromeOS policies to streamlining arduous IT tasks, and enable users to be more productive using technology.

## Features

- Chrome device management with over 200+ policies
- Flexible Enterprise Mobility Management & identity controls
- Centralised fleet management of Chrome hardware
- Bulk printer configuration with Chrome hardware
- Apps and extensions can be pre-installed during enrolment
- Settings are deployed based on the user or device type
- Kiosk Mode settings are available
- Audit Chromebooks applications and usage

# Making education device **accessible** to all types of learners and teachers

Samsung provides accessibility features designed for various students and teachers needs, including [vision](#), [hearing](#), [mobility](#), and [cognition](#).

**Vision enhancements**

Make fonts stand out, turn on inverted colors, remove animations, and more. You may also find that some themes or screen colors are easier to use.

**TalkBack**

Voice Assistant that provides spoken feedback when selecting items or viewing tutorials. You can also adjust more settings like Text-to-speech and sound and vibration.

**Hearing enhancements**

Receive alerts when your device hears the doorbell or a baby crying, or mute all sounds on your device.

**Interaction and dexterity**

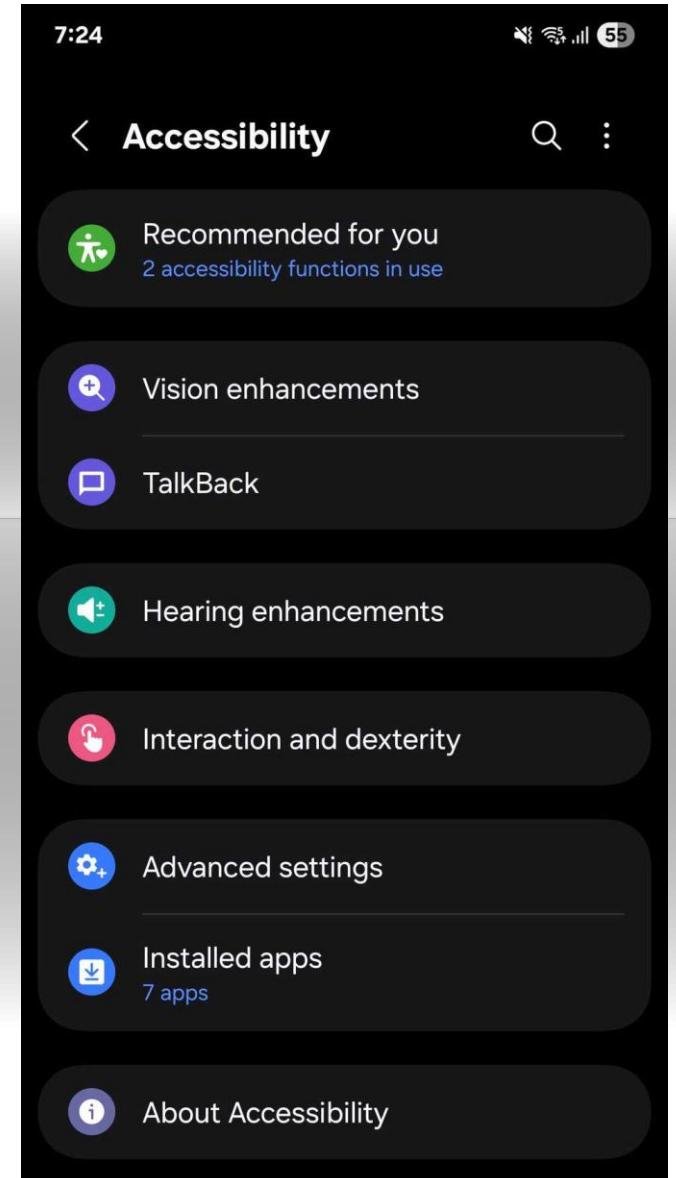

Enhance or replace touch interactions and other controls. Some features include a Universal switch to control your device with custom switches, and an Assistant menu to turn on functions that help users with reduced dexterity.

**Advanced settings**

Manage direct access features, like using the Power and Volume buttons to quickly open Accessibility settings.

**Installed apps**

Accessibility apps and services that are installed from the Play Store or Galaxy Store will appear in this section.

# Smart tech for your School

Samsung provides you with the information you need to understand your products

## Smarter Budgeting

Energy-efficient and durable devices reduce long-term costs from electricity bills and repairs.

## Built for Student Life

Technology needs to withstand daily use. High ratings for drop and water resistance mean fewer accidental breakages and replacements.

# Understanding Samsung's Product Lifecycle and Energy Usage

## Our promise: Full lifecycle accountability

We believe a product's impact doesn't start at the store or end at the bin.

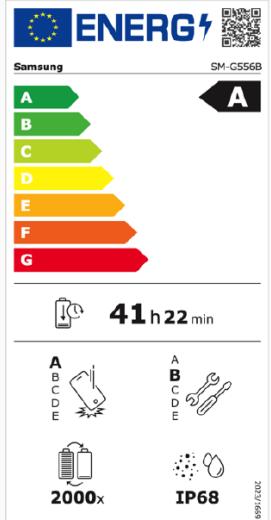

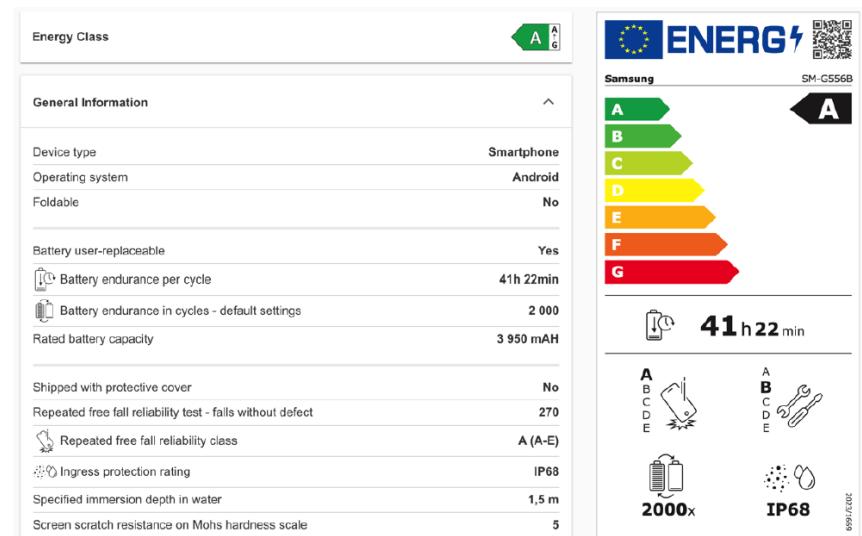

That's why we measure our full Carbon Footprint from "cradle to grave"—from the first raw materials to its final recycling. This entire process is independently certified against the latest and most rigorous international standards (PAS 2050) to prove our commitment is transparent and real.

### Smartphones and tablets

REGULATION (EU) 2023/1669 with regard to energy labelling of smartphones and slate tablets

Samsung SM-G556B

# Understanding Galaxy Book & Chromebook Lifecycle

- TCO Certified
- RoHS (Restriction of Hazardous Substances)
- LCA (Life Cycle Assessment)
- EPEAT (Electronic Product Environmental Assessment Tool)
- Energy Star

## Solve for Tomorrow

Now in its 6th year, Samsung Solve for Tomorrow is a free, curriculum aligned education programme with a tech for good competition at its heart, which empowers students aged 11-18 in secondary schools and colleges across the UK and Ireland to solve real world problems.

Because tomorrow is theirs to build we give every young person the tools to shape the future and turn curiosity into creativity.

Designed for teachers in secondary schools and colleges across the UK and Ireland to deliver flexibly in PSHE, DT, STEM, or enrichment activities.

# Our Focus

Now in it's 6th year, we're embarking on a new phase for Solve for Tomorrow in the UK and Ireland from focusing on support school-aged-students (11-18) in secondary school and colleges.

## 1

### Insight

- 60% of young people say they are considering careers in tech, but 96% say there are challenges to pursue this
- Lack of education (40%), practical experience (36%) and lack of contacts/mentors in industry (31%) were listed as top barriers

→ **Fostering early and positive hands-on experiences with tech** is critical particularly when key decision around future studies and careers are made during young people's time in school

## 2

### Impact

- UK Government has recognise the need to **rethink tech education in schools through its National Curriculum Review**
- Recent announcement of a new Tech First' skills programme boosting investment into education on future skills such as AI

→ **Building on our thought-leadership work on**, opportunity to align to UK gov't education priority by focusing on our impact in school aged

## 3

### Consistency

- Our **budget and people resources have previously been split** into running two programmes simultaneously (with different prizes, programmes formats suited for different age groups)
- This has also posed challenges in comms (unified voice, align timings)

→ Merging will enable us to have a **consistent Solve for Tomorrow experience for ALL ages**, and a clear single-minded message in all of our comms/stakeholder engagements

# New themes and resources for 2025/26

In 2025/2026, we are announcing a new Solve for Tomorrow theme for online safety working with new partners who share our mission. We also have a new suite of flexible and fun resources for schools and offering tech and invaluable experience-based prizes for schools and colleges.

## 1

### Themes

- **Smarter Sport:** Tech that makes sport more fun, inclusive and helps everyone to perform at their best
- **Greener Future:** Tech that protects our planet and helps us live more sustainable lives
- **Safer Online:** Tech that keeps us connected, confident and in control

→ Sport theme due to Suwon's expansion of global IOC partnership with SfT

→ Online safety named as UK youth's top 3 social concerns\* and remains UK gov't key policy

## 2

### Partners

- **Programming agency change:** We Are Futures → Hark London to strengthen school/education specialism support
- Exiting previous InnovateHer and Social Mobility Foundation partnerships  
→ **3 new strategic partners**

## 3

### Resources & Prizes

- **New teacher site** hosting free flexible resources for the classroom or at home inc. bitesize stretch content (PowerUps) on AI, Inclusive & Sustainable Design feat. Samsung tech & people - tested with teachers
- **Prizes changing** from £10k cash funding → Suite of Samsung tech (inc. new AI Whiteboard, Galaxy Book & Tablets aligned to key B2B education products), in-schools prototyping workshops, work experience and chance to feature ideas on national platforms (e.g. Piccadilly OOH, national radio etc)
