## Samsung Electronics Co., Ltd. and Subsidiaries

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

#### 1. General Information

These consolidated financial statements are prepared in accordance with Korean IFRS 1027, 'Consolidated and Separate Financial Statements'. Samsung Electronics Co., Ltd., the parent Company, has 123 subsidiaries including S-LCD and Samsung Electronics America, and 23 associates and joint ventures including Samsung SDI.

Samsung Electronics Co., Ltd. ("SEC") was incorporated under the laws of the Republic of Korea to manufacture and sell semiconductors, LCDs, telecommunication products, digital media products.

As of June 30, 2010, the Company's shares are listed on the Korea Stock Exchange, and its global depository receipts are listed on the London (common stock) and Luxembourg Stock Exchange (preferred stock). The Company is domiciled in the Republic of Korea and the address of its registered office is Suwon, the Republic of Korea.

Outlined below is a full list of SEC's consolidated subsidiaries:

<b>Area</b>	<b>Subsidiaries</b>

## **Samsung Electronics Co., Ltd. and Subsidiaries**

### **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

#### **2. Summary of Significant Accounting Policies**

The Company first adopted the International Financial Reporting Standards as adopted by Republic of Korea ("Korean IFRS") from January 1, 2010 (the date of transition: January 1, 2009). These standards have been consistently applied to 2009 comparative financial information presented.

The principles used in the preparation of these financial statements are based on Korean IFRS and interpretations effective as of June 30, 2010 or standards that will be enforceable after June 30, 2010 but for which the Company has decided to make an early application.

Principal adjustments made by the Company in restating its previously published financial statements in accordance with generally accepted accounting principle in the republic of Korea ("Korean GAAP") are described in Note 3.

This condensed consolidated interim financial information for the six months ended June 30, 2010 has been prepared in accordance with Korean IFRS 1034, *Interim financial reporting*.

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below:

#### **2.1 Basis of presentation**

The Company prepares its financial statements in accordance with International Financial Reporting Standards as adopted by Korea ("Korean IFRS"). These are those standards, subsequent amendments and related interpretations issued by the IASB that have been adopted by Korea.

First-time adoption of Korean IFRS is set out under Korean IFRS 1101, *First-time Adoption of International Financial Reporting*. Korean IFRS 1101 requires application of the same accounting policies to the opening statement of financial position and for the periods when the first comparative financial statements are disclosed. In addition, mandatory exceptions and optional exemptions which have been applied by the Company are described in Note 3.

There are a number of standards, amendments and interpretations, which have been issued but not yet come into effect. The Company does not expect that the adoption of these new standards, interpretations and amendments will have a material impact on the financial condition and results of operations.

#### **2.2 Consolidation**

##### **(a) Subsidiaries**

The Consolidated financial statements include the accounts of SEC and its controlled subsidiaries. Control over a subsidiary is presumed to exist when the Company has the power to govern the financial and operating policies of an entity to obtain benefits from its activities generally accompanying a shareholding of more than one half of the voting rights. The existence and effects of potential voting rights that are currently exercisable or convertible are considered in determining whether the Company controls

## **Samsung Electronics Co., Ltd. and Subsidiaries**

### **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

another entity. Subsidiaries are fully consolidated from the date when control is transferred to the Company and de-consolidated from the date which control ceases to exist.

The purchase method of accounting is used to account for the acquisition of subsidiaries by the Company. The cost of an acquisition is measured at the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any non-controlling interest. The excess of the cost of acquisition over the fair value of the Company's share of the identifiable net assets acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized directly in the statement of income. All inter-company transactions and balances are eliminated as part of the consolidation process. For each business combination, the Company shall measure any non-controlling interest in the acquiree at the non-controlling interest's proportionate share of the acquiree's identifiable net assets.

#### **(b) Transactions and non-controlling interests**

Profit or loss and each component of other comprehensive income are attributed to the owners of the parent and to the non-controlling interests. Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance. And changes in a parent's ownership interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions (i.e. transactions among owners in their capacity as owners).

#### **(c) Associated companies and joint ventures**

Investments in companies in which the Company does not have the ability to directly or indirectly control the financial and operating decisions, but does possess the ability to exercise significant influence, are accounted for using the equity method. Generally, it is presumed that if at least 20% of the voting stock and or potential voting rights is owned, significant influence exists. The Company's investment in associates includes goodwill identified on acquisition, net of any accumulated impairment loss. Investments in companies in which the Company has joint control are also accounted for using the equity method.

The Company's share of its associates' and joint ventures' post-acquisition profits or losses is recognized in the consolidated statement of income, and its share of post-acquisition movements in other reserves is recognized in other reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the Company's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Company does not recognize further losses, unless it has incurred obligations or made payments on behalf of the associate or joint venture.

Unrealized gains and loss on transactions between the Company and its associates are eliminated to the extent of the parent company's interest in the associates and joint ventures. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the group.

## Samsung Electronics Co., Ltd. and Subsidiaries

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Any dilution gains and losses arising in investments in associates and joint ventures are recognized in the statement of income.

#### 2.3 Foreign currency translation

##### (a) Functional and presentation currency

Items included in the financial statements of each of the Company's entities are measured using the currency of the primary economic environment in which an entity operates ('the functional currency'). The consolidated financial statements are presented in Korean won, which is the SEC's functional currency.

##### (b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at the exchange rate at the end of the reporting period of monetary assets denominated in foreign currencies are recognized in the statement of income, except when deferred in equity as qualifying cash flow hedges and qualifying net investment hedges.

Changes in the fair value of monetary securities denominated in foreign currency classified as available for sale financial assets are analyzed between translation differences resulting from changes in the amortized cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in amortized cost are recognized in profit or loss, and other changes in carrying amount are recognized in other comprehensive income.

Translation differences on non-monetary financial assets such as equities held at fair value through profit or loss are recognized in profit or loss as part of the fair value gain or loss. Translation differences on non-monetary financial assets such as equities classified as available for sale are included in other comprehensive income.

##### (c) Foreign subsidiaries

The results and financial position of all the foreign entities that have a functional currency different from the presentation currency of the Company are translated into the presentation currency as follows:

Assets and liabilities for each statement of financial position presented are translated at the closing rate at the end of the reporting date;

Income and expenses for each statement of income are translated at average exchange rates, unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the rate on the dates of the transactions; and all resulting exchange differences are recognized in other comprehensive income and presented as a separate component of equity.

On consolidation, exchange differences arising from the translation of the net investment in foreign

## Samsung Electronics Co., Ltd. and Subsidiaries

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

operations are recognized in other comprehensive income and presented as a separate component of equity. When a foreign operation is partially disposed of or sold, the exchange differences that were recorded in equity are recognized in the statement of income where there is a loss of control.

#### 2.4 Critical estimates and judgements

The preparation of consolidated financial statements requires management to exercise significant judgment and assumptions based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below.

##### (a) Revenue recognition

The Company uses the percentage-of-completion method in accounting for its fixed-price contracts to deliver installation services. Use of the percentage-of-completion method requires the company to estimate the services performed to date as a proportion of the total services to be performed. Revenues and earnings are subject to significant change, effected by early steps in a long-term projects, change in scope of a project, cost, period, and plans of the customers.

##### (b) Provision for warranty

The Company recognizes provision for warranty at the point of recording related revenue. The company accrues provision for warranty based on the best estimate of amounts necessary to settle future and existing claims on products sold as of each balance sheet date. Continuous release of products, that are more technologically complex, and changes in local regulations and customs could result in additional allowances being required in future periods.

##### (c) Estimated impairment of goodwill

The Company tests at the end of each reporting period whether goodwill has suffered any impairment in accordance with the accounting policy described in Note 2.12. The recoverable amounts of cash generating units have been determined based on value-in-use calculations. These calculations require the use of estimates.

##### (d) Legal contingencies

Legal proceedings covering a wide range of matters are pending or threatened in various jurisdictions against the Company. Provisions are recorded for pending litigation when it is determined that an unfavorable outcome is probable and the amount of loss can be reasonably estimated. Due to the inherent uncertain nature of litigation, the ultimate outcome or actual cost of settlement may materially vary from estimates.

## **Samsung Electronics Co., Ltd. and Subsidiaries**

### **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

#### **2.5 Cash flow statements**

Cash flow statements are prepared using the indirect method. Foreign currency cash flows have been translated into Korean Won using the weighted average rates of exchange for the period under consideration.

#### **2.6 Cash and cash equivalents**

The Company considers all highly liquid investments with less than three months maturity from the date of acquisition to be cash equivalents. Bank overdrafts are considered as short-term borrowings in the statement of financial position and treated as financing activities in the cash flow statements, unless the overdraft is repayable on demand and used for cash management purposes only, in which case the overdraft is treated as cash and cash equivalents in the cash flow statement.

#### **2.7 Financial assets**

##### 1) Classification

The Company classifies its financial assets in the following categories: at fair value through profit or loss, loans and receivables, available-for-sale, and held to maturity investments. The classification depends on the terms of the instruments and purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition.

##### (a) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are financial assets held for trading. A financial asset is classified in this category if acquired principally for the purpose of selling in the short-term. Derivatives are also categorised as held for trading unless they are designated as hedges. Assets in this category are classified as current assets.

##### (b) Loans and receivables

Loans and receivables are non derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for those with maturities greater than 12 months after the end of the reporting period; such loans and receivables are classified as non-current assets.

##### (c) Available-for-sale financial assets

Available-for-sale financial assets are non derivatives that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless an investment matures or management intends to dispose of it within 12 months of the end of the reporting period.

##### (d) Held-to-maturity investments

## **Samsung Electronics Co., Ltd. and Subsidiaries**

### **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturity that an entity has the positive intention and ability to hold to maturity. Held-to-maturity financial assets are included in non-current assets, except for those with maturities less than 12 months from the end of the reporting period, which are classified as current assets.

#### **2) Recognition and measurement**

Regular purchases and sales of financial assets are recognized on the trade date – the date on which the Company commits to purchase or sell the asset. Investments are initially recognized at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss are initially recognized at fair value, and transaction costs are expensed in the statement of income. Financial assets are derecognized when the rights to receive cash flows from the investments have expired or have been transferred and the Company has transferred substantially all risks and rewards of ownership. Available-for-sale financial assets and financial assets at fair value through profit or loss are subsequently carried at fair value. Loans and receivables and held to maturity investments are subsequently carried at amortized cost using the effective interest method.

Gains or losses arising from changes in the fair value of the financial assets at fair value through profit or loss category are presented in the statement of income in the period in which they arise. Dividend income from financial assets at fair value through profit or loss is recognized in the statement of income when the Company's right to receive payments is established.

Equity instruments of which the fair value cannot be measured reliably are recognized as cost. Changes in the fair value of monetary securities denominated in a foreign currency and classified as available for sale are analysed between translation differences resulting from changes in amortised cost of the security and other changes in the carrying amount of the security. The translation differences on monetary securities are recognised in profit or loss; translation differences on non-monetary securities are recognised in other comprehensive income. Changes in the fair value of monetary and non-monetary securities classified as available for sale are recognised in other comprehensive income.

When securities classified as available-for-sale are sold or impaired, the accumulated fair value adjustments previously recognized in equity are transferred to the statement of income. Interest on available-for-sale financial assets calculated using the effective interest method is recognized in the statement of income as part of finance income. Dividends on available-for sale equity instruments are recognized in the statement of income as part of other operating income when the Company's right to receive payments is established.

#### **3) Offsetting financial instruments**

Financial assets and liabilities are offset and the net amount reported in the statement financial position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

#### **4) Impairment of financial assets**

## **Samsung Electronics Co., Ltd. and Subsidiaries**

### **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

#### **(a) Assets carried at amortized cost**

The Company assesses at the end of each reporting period whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment loss is incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

The amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced and the amount of the loss is recognized in the consolidated statement of income. As a practical expedient, the Company may measure impairment on the basis of an instrument's fair value using an observable market price.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized (such as an improvement in the debtor's credit rating), the reversal of the previously recognized impairment loss is recognized in the consolidated statement of income.

#### **(b) Assets classified as available-for-sale**

The Company assesses at the end of each reporting period whether there is objective evidence that a financial asset or a group of financial assets is impaired. In the case of equity investments classified as available-for-sale, a significant or prolonged decline in the fair value of the security below its cost is also evidence that the assets are impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in profit or loss – is removed from equity and recognized in the consolidated statement of income. Impairment losses on equity instruments recognized in the consolidated statement of income are not reversed through the consolidated statement of income. If, in a subsequent period, the fair value of a debt instrument classified as available-for-sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in profit or loss, the impairment loss is reversed through the consolidated statement of income.

## **2.8 Trade receivables**

Trade receivables are amounts due from customers for merchandise sold or services performed in the ordinary course of business. If collection is expected in one year or less (or in the normal operating cycle of the Company if longer), they are classified as current assets. If not, they are presented as noncurrent assets. Non-current trade receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less provision for impairment.

A provision for impairment of trade receivables is established based on a periodic review of all outstanding

## Samsung Electronics Co., Ltd. and Subsidiaries

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

amounts when there is evidence that the Company will not be able to collect all amounts due according to the original terms of receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganization, and default or delinquency in payments are considered indicators that a trade receivable is impaired. The carrying amount of the asset is reduced through the use of an allowance account, and the amount of loss is recognized in the statement of income within selling, general and administrative expenses. When a trade receivable is uncollectible, bad debts are written off against the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited against selling, general and administrative expenses in the statement of income.

In the event of sale of receivables and factoring, the Company derecognizes receivables when the Company has given up control or continuing involvement.

#### 2.9 Inventories

Inventories are stated at the lower of cost and net realizable value. Cost is determined using the average cost method, except for materials-in-transit. The cost of finished goods and work in progress comprises design costs, raw materials, direct labor, other direct costs and related production overheads (based on normal operating capacity). It excludes costs of idle plant, and abnormal waste. Net realizable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses.

Inventories are reduced for the estimated losses arising from excess, obsolescence, and the decline in value. This reduction is determined by estimating market value based on future customer demand. The losses on inventory obsolescence are recorded as a part of cost of sales.

#### 2.10 Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.

Capitalized interest is added to the cost of the underlying assets. The acquisition cost of property, plant and equipment acquired under a finance lease is determined at the lower of the present value of the minimum lease payments and the fair market value of the leased asset at the inception of the lease. Property, plant and equipment acquired under a finance lease, leasehold improvements are depreciated over the shorter of the lease term or useful life.

Land is not depreciated. Depreciation on other assets is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives, as follows:

	<u>Estimated useful lives</u>
Buildings and auxiliary facilities	15, 30 years
Structures	15 years

## Samsung Electronics Co., Ltd. and Subsidiaries

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Machinery and equipment	5 years
Tools and fixtures	5 years
Vehicles	5 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognized within the statement of income.

#### 2.11 Intangible assets

##### (a) Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the group's share of the net identifiable assets of the acquired subsidiary at the date of acquisition. Goodwill on acquisitions of subsidiaries is included in 'intangible assets'. Goodwill is tested annually for impairment and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

##### (b) Capitalized development costs

The Company capitalizes certain development costs when outcome of development plan is for practical enhancement, probability of technical and commercial achievement for the development plans are high, and the necessary cost is reliably estimable. Capitalized costs, comprising direct labor and related overhead, are amortized by straight-line method over their useful lives. In presentation, accumulated amortization amount and accumulated impairment amount are deducted from capitalized costs associated with development activities.

##### (c) Other intangible assets

Patents, trademarks, software licenses for internal use are capitalized and amortized using straight-line method over their useful lives, generally 5 to 10 years. Certain club membership is regarded as having an indefinite useful life because there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows for the entity; such asset is not amortized. Where an indication of impairment exists, the carrying amount of any intangible asset is assessed and written down its recoverable amount.

#### 2.12 Impairment of non-financial assets

Assets that have an indefinite useful life, for example goodwill, are not subject to amortization and are tested annually for impairment. Assets that are subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately

## **Samsung Electronics Co., Ltd. and Subsidiaries**

### **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

identifiable cash flows (cash-generating units). Non-financial assets other than goodwill that suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

#### **2.13 Borrowings**

Borrowings are recognized initially at fair value, net of transaction costs. Borrowings are subsequently measured at amortized cost; any difference between cost and the redemption value is recognized in the statement of income over the period of the borrowings using the effective interest method. If the Company has an indefinite right to defer payment for a period longer than 12 months after the end of the reporting date, such liabilities are recorded as non-current liabilities. Otherwise, they are recorded as current liabilities.

#### **2.14 Employee benefits**

##### **(a) Retirement benefit obligation**

The Company has either defined benefit or defined contribution plans at respective company level. A defined contribution plan is a pension plan under which the Company pays fixed contributions into a separate entity. The Company has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods. A defined benefit plan is a pension plan that is not a defined contribution plan. Typically defined benefit plans define an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation.

The liability recognized in the statement financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets, together with adjustments for unrecognized past-service costs. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability.

Actuarial gains and losses are recognized using the corridor approach. The company recognizes actuarial gains and losses in excess of a de minimis over the remaining working lives of employees. The de minimis amount, which is also referred to as the 'corridor limit', is the greater of ten per cent of the present value of the defined benefit obligation at the end of the previous reporting period (before deducting plan assets) and ten per cent of the fair value of any plan assets at that date.

For defined contribution plans, the Company pays contributions on a mandatory, contractual or voluntary basis. The Company has no further payment obligations once the contributions have been paid. The contributions are recognized as employee benefit expense when they are due. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in the future payments is available.

##### **(b) Profit-sharing and bonus plans**

## **Samsung Electronics Co., Ltd. and Subsidiaries**

### **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

The Company recognizes a liability and an expense for bonuses and profit-sharing, based on a formula that takes into consideration the profit attributable to the company's shareholders after certain adjustments. The Company recognizes a provision where contractually obliged or where there is a past practice that has created a constructive obligation.

#### **2.15 Provisions**

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognized even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognized as interest expense.

When there is a probability that an outflow of economic benefits will occur due to a present obligation resulting from a past event, and whose amount is reasonably estimable, a corresponding amount of provision is recognized in the financial statements. However, when such outflow is dependent upon a future event, is not certain to occur, or cannot be reliably estimated, a disclosure regarding the contingent liability is made in the notes to the financial statements.

#### **2.16 Leases**

The Company leases certain property, plant and equipment. Lease of property, plant and equipment where the Company has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalized at the lease's commencement at the lower of the fair value of the leased property and the present value of the minimum lease payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the outstanding balance. The corresponding rental obligations, net of finance charges, are included in other long-term payables. The interest element of the finance cost is charged to the statement of income over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The property, plant and equipment acquired under finance leases is depreciated over the shorter of the useful life of the asset and the lease term.

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the statement of income on a straight-line basis over the period of the lease.

#### **2.17 Derivative instruments**

All derivative instruments are accounted for at fair value with the resulting valuation gain or loss recorded as an asset or liability. If the derivative instrument is not designated as a hedging instrument, the gain or loss is recognized in the statement of income in the period of change.

## **Samsung Electronics Co., Ltd. and Subsidiaries**

### **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

Fair value hedge accounting is applied to a derivative instrument with the purpose of hedging the exposure to changes in the fair value of an asset or a liability or a firm commitment (hedged item) that is attributable to a particular risk. Hedge accounting is applied when the derivative instrument is designated as a hedging instrument and the hedge accounting criteria have been met. The gain or loss, both on the hedging derivative instrument and on the hedged item attributable to the hedged risk, is reflected in the statement of income.

#### **2.18 Dividend distribution**

Dividend distribution to SEC's shareholders is recognized as a liability in the Company's consolidated financial statements in the period in which the dividends are declared.

#### **2.19 Share-based compensation**

The Company uses the fair-value method in determining compensation costs of stock options granted to its employees and directors. The compensation cost is estimated using the Black-Scholes option-pricing model and is accrued and charged to expense over the vesting period, with a corresponding increase in a separate component of equity.

#### **2.20 Revenue recognition**

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the Company's activities. Revenue is shown net of value-added tax, returns, rebates and discounts and after eliminating sales within the Company.

The Company recognizes revenue when specific recognition criteria have been met for each of the Company's activities as described below. The Company bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

##### **(a) Sales of goods**

Sales of products and merchandise are recognized upon delivery when the significant risks and rewards of ownership of goods have transferred to the buyer, continuing managerial involvement usually associated with ownership and effective control have ceased, the amount of revenue can be measured reliably, it is probable that the economic benefits associated with the transaction will flow to the Company and the costs incurred or to be incurred in respect of the transaction can be measured reliably. The Company records reductions to revenue for special pricing arrangements, price protection and other volume based discounts. If product sales are subject to customer acceptance, revenue is not recognized until customer acceptance occurs.

##### **(b) Sales of services**

Revenues from rendering services are generally recognized using the percentage-of-completion method, based on the percentage of costs to date compared to the total estimated costs, contractual milestones or performance.

## **Samsung Electronics Co., Ltd. and Subsidiaries**

### **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

The Company enters into transactions involving multiple components consisting of any combination of goods, services, etc. The commercial effect of each separately identifiable component of the transaction is evaluated in order to reflect the substance of the transaction. The consideration received from these transactions is allocated to each separately identifiable component based on the relative fair value of each component. The Company determines the fair value of each component by taking into consideration factors such as the price when component or a similar component is sold separately by the Company or a third party.

#### **(c) Other sources of revenue**

Interest income is recognized using the effective interest method. When a loan and receivable is impaired, the Company reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income. Royalty income is recognized on an accruals basis in accordance with the substance of the relevant agreements. Dividend income is recognized when the right to receive payment is established.

#### **2.21 Government grants**

Grants from the government are recognized at their fair value where there is a reasonable assurance that the grant will be received and the Company will comply with the conditions attached. Government grants relating to income are deferred and recognized in the statement of income over the period necessary to match them with the income that they are intended to compensate. Government grants relating to property, plant and equipment are included in non-current liabilities as deferred government grants and are credited to the statement of income on a straight-line basis over the expected lives of the related assets.

#### **2.22 Income tax expense and deferred taxes**

Taxes on income in the interim periods are accrued using the tax rate that would be applicable to expected total annual earnings.

The tax expense for the period comprises current and deferred tax. Tax is recognized in the statement of income, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case the tax is also recognized in other comprehensive income or directly in equity, respectively.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the company's subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is recognized, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have

## **Samsung Electronics Co., Ltd. and Subsidiaries**

### **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred income tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, associates and joint ventures except where the timing of the reversal of the temporary difference is controlled by the group and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

#### **2.23 Earnings per share**

Basic earnings per share is calculated by dividing net profit for the period available to common shareholders by the weighted-average number of common shares outstanding during the year. Diluted earnings per share is calculated using the weighted-average number of common shares outstanding adjusted to include the potentially dilutive effect of common equivalent shares outstanding.

#### **2.24 Segment reporting**

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for making strategic decisions on resource allocation and performance assessment of the operating segments, has been identified as the company's Management Committee.

## Samsung Electronics Co., Ltd. and Subsidiaries

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

#### 2.25 Convenience translation into United States Dollar Amounts

The Company operates primarily in Korean won and its official accounting records are maintained in Korean won. The U.S. dollar amounts provided in the financial statements represent supplementary information solely for the convenience of the reader. All won amounts are expressed in U.S. dollars at the rate of ₩ 1,210.30 to US \$1, the exchange rate in effect on June 30, 2010. Such presentation is not in accordance with generally accepted accounting principles, and should not be construed as a representation that the won amounts shown could be readily converted, realized or settled in U.S. dollars at this or at any other rate.

#### 3. Transition to International Financial Reporting Standards as Adopted by the Republic of Korea from Generally Accepted Accounting Principle in the Republic of Korea.

The Company adopted Korean IFRS from the fiscal year 2010 (the date of first-time adoption to Korean IFRS: January 1, 2010). The comparison year, 2009, is restated in accordance with Korean IFRS 1101, *First-time adoption of international financial reporting standards* (the date of transition to Korean IFRS: January 1, 2009).

##### Significant differences in accounting policies

Significant differences between the accounting policies chosen by the Company under Korean IFRS and under previous Korean GAAP are as follows:

##### (a) First time adoption of Korean IFRS

The Company elected the following exemptions upon the adoption of Korean IFRS in accordance with Korean IFRS 1101, *First-time adoption of international financial reporting standards*:

(1) Business combinations: Past business combinations that occurred before the date of transition to Korean IFRS will not be retrospectively restated under Korean IFRS 1103, *Business combinations*.

(2) Fair value as deemed cost: The Company elects to measure certain land assets at fair value at the date of transition to Korean IFRS and use the fair value as its deemed cost. Valuations were made on the basis of recent market transactions on the arm's length terms by independent third party experts.

(3) Cumulative translation differences: All cumulative translation gains and losses arising from foreign subsidiaries and associates as of the date of transition to Korean IFRS are reset to zero.

(4) Employee benefits: All accumulative actuarial gains and losses as of the date of transition to Korean IFRS are recognized.

##### (b) Employee benefits

Employees and directors with at least one year of service are entitled to receive a lump-sum payment upon termination of their employment with SEC, its Korean subsidiaries and certain foreign subsidiaries based on their length of service and rate of pay at the time of termination. Under the previous severance policy pursuant to Korean GAAP, Accrued severance benefits represented the amount which would be payable

## Samsung Electronics Co., Ltd. and Subsidiaries

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

assuming all eligible employees and directors were to terminate their employment as of the end of the reporting period. However, under Korean IFRS, the liability is determined based on the present value of expected future payments calculated and reported using actuarial assumptions.

#### (c) Capitalization of development costs

Under Korean GAAP the Company recorded expenditures related to research and development activities as current expense. Under Korean IFRS if such costs related to development activities meet certain criteria, they are recorded as intangible assets.

#### (d) Goodwill or gain from bargain purchase arising from business combinations

Under Korean GAAP, the Company amortizes goodwill or recognizes a gain in relation to bargain purchase (negative goodwill<sup>1</sup>) acquired as a result of business combinations on a straight-line method over five years from the year of acquisition. Under Korean IFRS, goodwill is not amortized but reviewed for impairment annually. A gain as a result of bargain purchase is recognized immediately in the statement of income. The impact of this adjustment is included within “other” adjustment in the tables below.

<sup>1</sup> Negative goodwill under Korean GAAP is referred to as gain from bargain purchase under Korean IFRS.

#### (e) Derecognition of financial assets

Under Korean GAAP, when the Company transferred a financial asset to financial institutions and it was determined that control over the asset has been transferred the Company derecognized the financial asset. Under Korean IFRS, if the Company retains substantially all the risk and rewards of ownership of the asset, the asset is not derecognized but instead the related cash proceeds are recognized as financial liabilities.

#### (f) Deferred Tax

Under Korean GAAP, deferred tax assets and liabilities were classified as either current or non-current based on the classification of their underlying assets and liabilities. If there are no corresponding assets or liabilities, deferred tax assets and liabilities were classified based on the periods the temporary differences were expected to reverse. Under Korean IFRS, deferred tax assets and liabilities are all classified as non-current on the statement of financial position. As a result, there is an increase in the amount of deferred tax assets and liabilities offset against each other under Korean IFRS.

In addition, there is a difference between Korean IFRS and Korean GAAP in terms of recognition of deferred tax assets or liabilities relating to investments in subsidiaries. Under Korean GAAP, there are specific criteria as to when deferred tax assets and liabilities relating to investments in subsidiaries should be recognized, whereas under Korean IFRS, the related deferred tax assets or liabilities are recognized according to sources of reversal for the temporary differences.

## Samsung Electronics Co., Ltd. and Subsidiaries

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(g) Changes in scope of consolidation

At the date of transition, changes in the scope of consolidation as a result of adoption of Korean IFRS are as follows:

Changes	Description	Name of Entity
Newly added	Under the former <i>'Act on External Audit of Stock companies' enforcement ordinance 1-3 article 2-1 in the Republic of Korea</i> , companies those whose total assets are less than 10 billion Korean won were not subject to consideration, but they are subject to consolidation under Korean IFRS.	World Cyber Games, Samsung Electronics Football Club SEMES America, Samsung Electronics Ukraine, Samsung Electronics Romania, Samsung Electronics Kazakhstan, Samsung Electronics Czech and Slovak s.r.o. Samsung Electronics Levant, Samsung Electronics European Holding, Batino Realty Corporation, Samsung Telecommunications Malaysia, Samsung Electronics Shenzhen, Samsung Electronics China R&D Center, Samsung Electronics Limited, Samsung Electronics Poland Manufacturing, Samsung Telecoms(UK)
Newly added	Under Korean GAAP, a union is not regarded as a legal entity and excluded from scope of consolidation. However, it is subject to consolidation under Korean IFRS.	Samsung Venture Capital Union #6, #7 and #14
Excluded	Under the former <i>'Act on External Audit of Stock companies' enforcement ordinance 1-3 article 2-1 in the Republic of Korea</i> , entities where the Company owns more than 30% of shares and is the largest shareholder were included in scope of consolidation. Under Korean IFRS, such entities are not subject to consolidation unless control over the entity is established.	Samsung Card

<b>Guarantees of debt for housing rental</b>	₩ 138,848	₩ 138,848
<b>Other domestic guarantees of debt</b>	-	9,791

As of June 30, 2010, the Company's overseas subsidiaries enter into "Cash Pooling Arrangement" contracts and "Banking Facility" agreements with overseas financial institutions to provide mutual guarantees of indebtedness.

Area	Participating Subsidiaries	Financial Institutions
Europe	SEUK and 22 other subsidiaries	Citibank
Asia	SAPL and 10 other subsidiaries	Bank of America

##### (B) Litigation

- A. The United States Department of Justice Antitrust Division (the Justice Department), European Commission and other countries' anti-trust authorities initiated an investigation into alleged anti-trust violations by sellers of TFT-LCD including the Company and some of its foreign subsidiaries. Following the investigation by the Justice Department, several civil class actions with respect to the sales of TFT-LCD, SRAM and Flash Memory were filed against the Company and its subsidiaries in the United States. As of balance sheet date, the outcome of the investigation and civil actions is uncertain and accordingly, the ultimate effect of this matter on the financial position of the Company cannot be determined.

## Samsung Electronics Co., Ltd. and Subsidiaries

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

- B. Based on the agreement entered on August 24, 1999, with respect to Samsung Motor Inc.'s ("SMI") bankruptcy proceedings, Samsung Motor Inc.'s creditors ("the Creditors") filed a civil action against Mr. Kun Hee Lee, former chairman of the Company, and 28 Samsung Group affiliates including the Company under joint and several liability for failing to comply with such agreement. Under the suit, the Creditors have sought ₩2,450 billion for loss of principal on loans extended to SMI, a separate amount for breach of the agreement, and an amount for default interest. On January 31, 2008, Seoul Administrative Court made the ruling on this case. Under the ruling, Samsung Group affiliates were ordered to pay approximately ₩1,634 billion to the Creditors by disposing 2,334,045 shares of Samsung Life Insurance Co., Ltd. (the "Shares") donated by Mr. Lee, excluding 1,165,955 shares already sold by the Creditors. In addition, Samsung Group affiliates were ordered to pay default interest on ₩1,634 billion at 6% per annum for the period from January 1, 2001, to the date of settlement. Both sides have appealed the ruling, and currently, the second trial for this case is pending at Seoul High Court. During the current six month period ended June 30, 2010, the Shares were sold and, as a result, the consideration received covered the principal amount requested by the Creditors thus leaving the default interest claim as the remaining significant unresolved claim.
- C. As of June 30, 2010, the Company was named as a defendant in legal actions filed by 22 overseas companies including BTG, and as the plaintiff in legal actions against 4 overseas companies including Spansion Inc. for alleged patent infringements. The ultimate outcome of this case cannot be determined at this time. Since the amount of Company's obligation is uncertain, the effects of this matter on the Company's financial statements cannot be reasonably determined.
- D. As of June 30, 2010, the Company was also named as a defendant in legal actions filed by 25 domestic and overseas companies, and as the plaintiff in legal actions against 5 domestic and overseas companies relating to matters other than alleged patent infringements. The amount claimed against the Company in these cases totals ₩32,235 million, although in six of the cases no amount has yet been claimed and the amount being claimed against other companies totals ₩2,875 million.
- E. In addition to the cases mentioned above, the Company's domestic and foreign subsidiaries have been involved in various claims and proceedings during the normal course of business. Samsung India Electronics (SIEL) and Samsung Electronics Iberia (SESA) located in Spain are undergoing tax investigations brought by the local tax authorities with claims amounting up to ₩112,551 million and ₩25,807 million, respectively. As of June 30, 2010, the amount of claims for which the Company's subsidiaries are the defendant is totals ₩53,816 million, including ₩12,194 million relating to Samsung Electronics America (SEA). The Company's management believes that, although the amount and timing of these matters is uncertain, the conclusion of these matters will not have a material adverse effect on the financial position of the Company.

## Samsung Electronics Co., Ltd. and Subsidiaries

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

#### 13. Preferred Stock and Common Stock

Under its Articles of Incorporation, SEC is authorized to issue 500 million shares of capital stock with a par value of ₩5,000 per share, of which 100 million shares are cumulative, participating preferred stock that are non-voting and entitled to a minimum cash dividend at 9% of par value.

As of June 30, 2010, exclusive of retired stocks, 147,299,337 shares of common stock and 22,833,427 shares of preferred stock have been issued. The preferred shares which are non-cumulative and non-voting, were all issued on or before February 28, 1997, and are entitled to an additional cash dividend of 1% of par value over common stock.

SEC has issued global depositary receipts ("GDR") to overseas capital markets. The number of outstanding GDR as of June 30, 2010 and December 31, 2009, are as follows:

	2010		2009	
	Non-voting Preferred Stock	Common Stock	Non-voting Preferred Stock	Common Stock
Outstanding GDR

#### 19. Income Tax

Income tax expense is recognized based on management's best estimate of the weighted average annual income tax rate expected for the full financial year. The estimated average annual tax rate used for the year to December 31, 2010 is 19.6% (the estimated tax rate for the six months ended June 30, 2009 was 22.9%). The decrease is caused by the parent company's increased profitability because the effective tax rate applicable to the parent company is relatively low compared to other foreign subsidiaries.

#### 20. Earnings Per Share

Basic earnings per share for the three and six months ended June 30, 2010 and 2009, is calculated as follows:

<i>(In millions of Korean won except for share amounts)</i>	3 Months		6 Months	
	2010	2009	2010	2009
Profit attributable to the owners of the parent	₩ 4,172,692	₩ 2,275,417	₩ 8,189,135	₩ 2,865,402

**22. Segment Information**

The chief operating decision maker has been identified as the Management Committee. The Management Committee is responsible for making strategic decisions based on review of the group's internal reporting. The management committee has determined the operating segments based on these reports.

The Management Committee reviews operating profit of each operating segment in order to assess performance and make decisions about resources to be allocated to the segment.

The operating segments are product based and include Digital media, Telecommunication, Semiconductor, LCD and others.

<b>Receivables and Payables</b>		
Receivables	213,725	216,899
Payables	83,626	67,060

#### 24. Financial risk management

The Company is exposed to credit risk, liquidity risk and market risk. Market risk arises from currency risk, interest rate risk and fair value risk associated with investments etc. The Company has a risk management program in place to monitor and actively manage such risks.

The Company's financial assets that are under financial risk management are composed of cash and cash equivalents, short-term financial instruments, available-for-sale securities, accounts & notes receivable and other accounts receivable. The Company's financial liabilities under financial risk management are composed of accounts payable & other payable, borrowings and bonds etc.

##### (1) Market risk

###### (a) Foreign exchange risk

The Company is exposed to foreign exchange risk arising from international operations and transactions with different foreign currencies. Most widely used foreign currencies are the US Dollar, EURO and Japanese Yen. Foreign exchange risk management is carried out by considering the nature of the businesses and using risk management tools. The Company operates a system to manage receivables and payables denominated in foreign currencies. The risks of foreign currency exposure to receivables and payables are periodically evaluated, managed and reported through the system.

###### (b) Equity Price risk

## Samsung Electronics Co., Ltd. and Subsidiaries

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

The Company's investment portfolio consists of direct and indirect investments in listed and non-listed securities. The market values of the Company's equity investments as of June 30, 2010 and December 31, 2009 are ₩ 1,820,041 million and ₩ 1,444,091 million, respectively. Refer to Note 5.

#### (c) Interest rate risk

The Company is exposed to interest rate risk fluctuations since the value of financial statement line items and interest income or expenses changes as a result of investment risk. The Company's position with regard to interest rate risk exposure is mainly related to debt obligations such as bonds and interest-bearing deposits and investments.

#### (2) Credit risk

Credit risk arises in connection with the normal course of transactions and investing activities, where clients or other parties fail to discharge an obligation. The Company monitors and sets the counterparty's credit limit on a periodic basis based on the counterparty's financial conditions, default history and other important factors.

There were no significant loans or other receivables overdue or subject to impairment, included in accounts receivables or other financial instruments. The Company has evaluated there is no indication of default by any of its counterparties.

Credit risk arises from cash and cash equivalents, savings and derivative instruments transactions with financial institutions. To mitigate or eliminate certain of those exposures, the Company transacts only with highly rated financial institutions.

#### (3) Liquidity risk

The Company manages its liquidity risk to maintain adequate net working capital by constantly managing projected cash flows. Beyond effective working capital and cash management, the Company mitigates liquidity risk by factoring or issuing ABS (Asset-Backed Security) to highly rated financial institutions. In addition, the Company contracts with financial institutions with respect to bank overdrafts, Cash Pooling or Banking Facility agreement for efficient management of funds.

#### (4) Capital risk management

The object of capital management is to maintain sound capital structure. The Company's capital management considers the Company's debt ratio, computed by dividing total liabilities by total equity disclosed in consolidated financial statements.

The Company's debt ratio as of as of June 30, 2010 and December 31, 2009 is as follows;

*(In millions of Korean won,%)*

**2010**

**2009**

## Samsung Electronics Co., Ltd. and Subsidiaries

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Liabilities	₩	43,980,103	₩	39,134,587
Equity		81,696,557		73,045,202
Debt Ratio		53.8%		53.6%

#### 25. Business Combination

The Company acquired Samsung Digital Imaging Co., Ltd. with a closing date of April 1, 2010 to improve shareholders' value through enhancement of business efficiency and maximization of synergy effect with other existent businesses. The acquisition of Samsung Digital Imaging Co., Ltd. was approved by the Board of Directors of the Company on December 15, 2009.

##### (1) Overview of the acquired company

Name of the acquired company	Samsung Digital Imaging Co., Ltd.
Headquarters location	Suwon-si, Gyeonggi-do Korea
Representative director	Sang-Jin Park
Classification of the acquired company	Listed company in the Korea stock exchange
Former relationship with the Company	An associated company

##### (2) Terms of the business combination

The shareholders of Samsung Digital Imaging Co., Ltd. received 0.0577663 shares of the Company's common stock for each share of Samsung Digital Imaging Co., Ltd. common stock owned on the closing date. The Company transferred its treasury stocks to the shareholders of Samsung Digital Imaging, instead of issuing new stocks to them.

##### (3) Purchase price allocation

Classification	Amount (in millions of KRW)
I. Considerations transferred	
Fair value of consideration transferred (*1)	₩ 812,154
Fair value of previously held equity interest in the acquiree (*2)	278,949
Total	₩ 1,091,103
II. Identifiable assets and liabilities	
Cash and cash equivalents	63,470
Trade and other receivables (*3)	290,407
Inventories	88,133
Property, plant, and equipment	40,678
Intangible assets	307,454
Other financial assets	75,202
Trade and other payables	(213,454)
Short-term borrowings	(83,660)
Long-term trade and other payables	(62,125)

## Samsung Electronics Co., Ltd. and Subsidiaries

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Retirement benefit obligation		(24,574)
Deferred income tax liabilities		(14,711)
Total	₩	466,820
III. Goodwill		624,283

- (\*1) The Company transferred its treasury stocks to the shareholders of Samsung Digital Imaging Co., Ltd and re-measured the transferred treasury stock at its acquisition-date (April 1, 2010) fair value. The Company recognized KRW 398,090 million of gain on disposal and has paid KRW 15,921 million for the odd-lot prices.
- (\*2) The Company held 25.5% of equity interest in Samsung Digital Imaging Co.,Ltd. and remeasured its previously held equity interest at its acquisition-date(April 1, 2010) fair value. Accordingly, the Company recorded resulting gain of KRW 216,747 million.
- (\*3) Fair value of acquired trade and other receivables (KRW 290,407 million) include trade receivables amounting to KRW 274,369 million. Total nominal amount of the receivables is KRW 290,407 million, and none of them are expected to be uncollected.
- (\*4) The goodwill is attributable to increased efficiency of digital camera business management and the synergy effect expected from combining Samsung Digital Imaging Co., Ltd. and the related existing businesses.

If the acquisition had occurred on January 1, 2010, the consolidated revenue and net profit for the six month period ended June 30, 2010 would have increased by KRW 421,513 million and KRW 14,753 million, respectively. The amounts of revenue and net profit of the acquiree since the acquisition date (April 1, 2010) included in the consolidated statement of income for the three month period ended June 30 are KRW 636,425 million and KRW 11,403 million, respectively.
