

The world's first circular air conditioner – a stylish approach to comfort.

Uneven temperatures and cold drafts can be unpleasant for building occupants. This can negatively affect their overall happiness and well-being, whether they are working, shopping or enjoying a meal out. Design also plays a crucial role in creating a harmonious environment.

Thanks to Samsung's stylish 360 Cassette the ultimate indoor experience can be created. The world's first circular air conditioner provides a unique answer to the requirements of human comfort and interior design, keeping occupants comfortable while fitting seamlessly into the design of any space.

360 Cassette

Style. It's in the air.

Surround cooling

The Samsung 360 Cassette provides the ultimate in comfort, due to its circular cutting-edge design that effectively and evenly discharges cool air. The airflow direction's enhanced control creates what is known as a 'Coanda effect' – a horizontal and uniform airflow that is able to reach each corner of the room.

The unit evenly cools the entire space, eliminating dead zones and deviations in temperature – which increases occupants' sense of well-being and improves their overall satisfaction.

Bladeless design

Ideal thermal conditions are crucial to creating an indoor environment that optimises productivity. Due to the 360 Cassette's bladeless design, blade dust that would normally impact indoor air quality is eliminated, and the velocity of the discharged air remains unaffected without loss of airflow. The airflow is boosted to spread the air at a nearly zero degree discharge angle and is gently dispersed throughout the entire space. The result – an absence of cold drafts and negative thermal conditions – greatly improves the indoor experience of the building's occupants.

Stylish and intuitive

With a sleek circular design that complements a multitude of styles, the 360 Cassette suits any space without detracting from its surroundings, creating a harmonious environment in the spaces in which people live and work.

Different panel designs, complemented by several mounting options to choose from, offer ultimate flexibility. An integrated circular LED display that provides a clearly visible airflow operation can be set with intuitive controls.

Recommended applications

The 360 Cassette is available in a wide variety of style options to allow for high levels of flexibility for meeting the ceiling design and requirements of any interior.
