SAMSUNG

Medical

Samsung B2B Integrated Offering

Samsung for **Medical**

The medical sector is rapidly evolving, driven by an aging population, rising chronic conditions, and digital healthcare advances.
To enhance both efficiency and care, hospitals are adopting smart solutions such as automation, personalized environments, IoT-based systems, AI assists, and sustainable infrastructure.

1 Maximized Efficiency

Streamline medical operations with mobile access, automation, and more flexible workflows.
Reduce patient wait times and ensure quicker delivery of care.

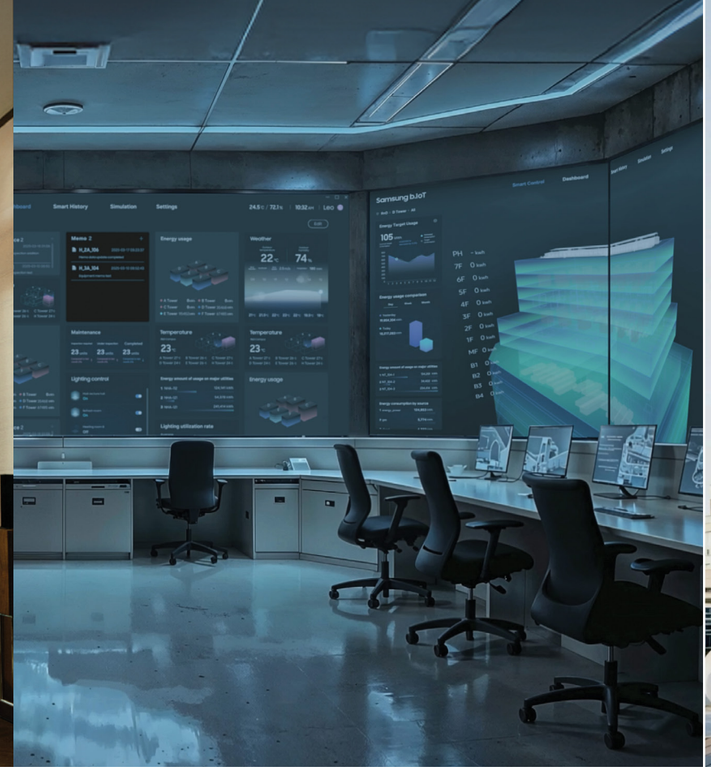

2 Optimal Caring Environment

Create an optimal healing environment with precision-driven, patient-centered technology.
Support faster recovery and enhanced treatment throughout the stay.

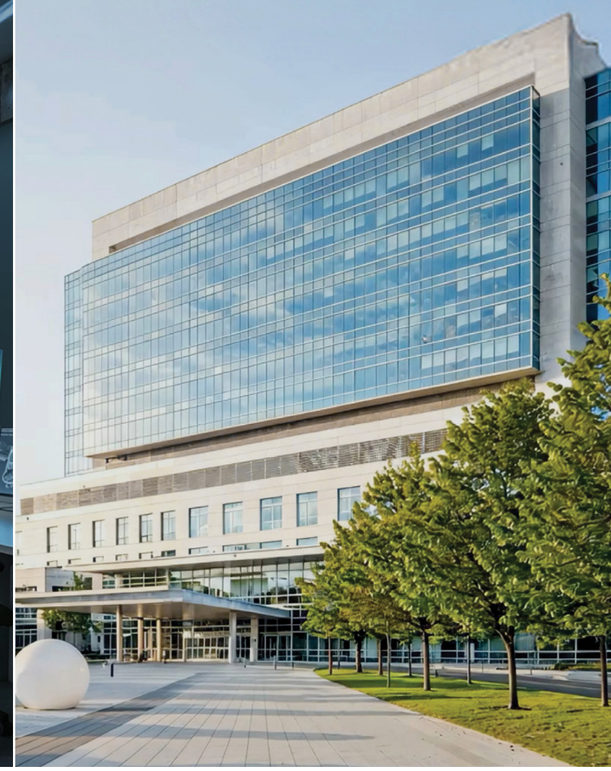

3 Integrated Management

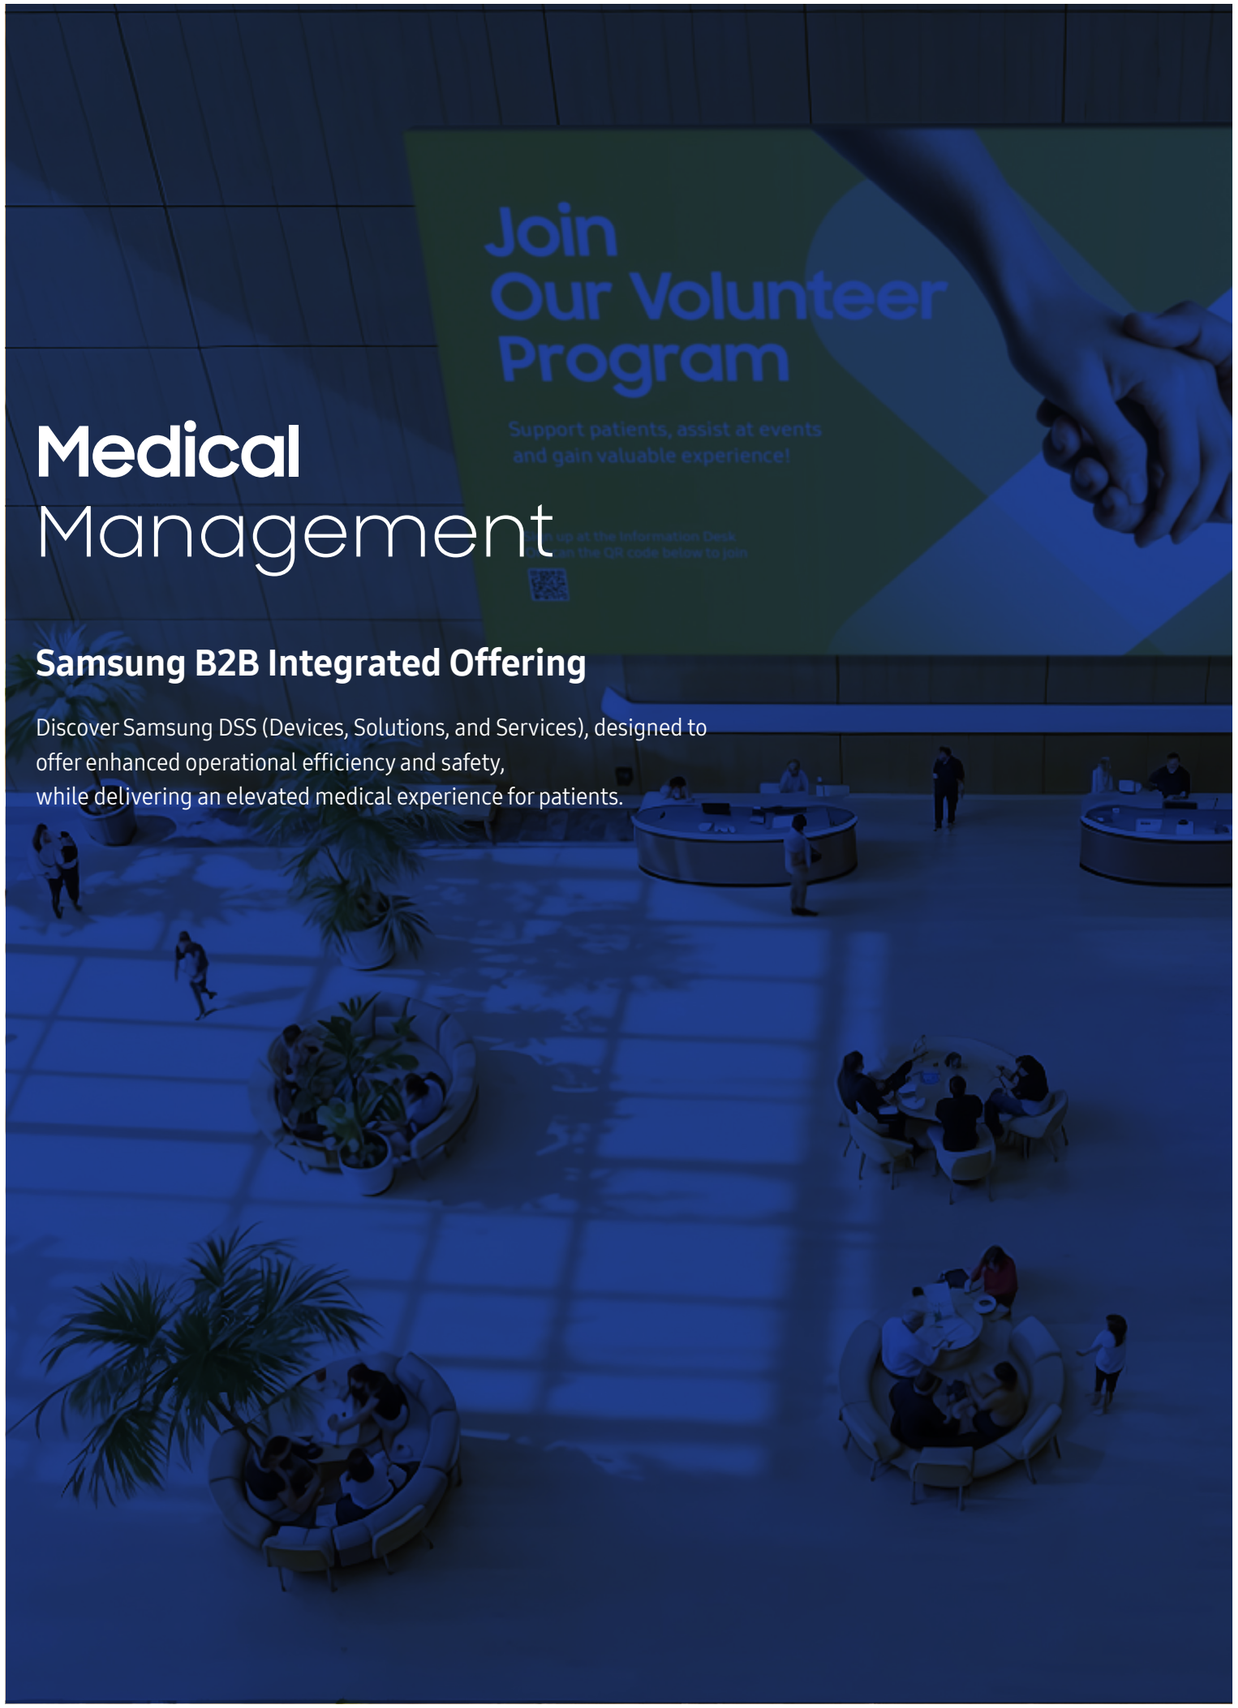

Gain control across the hospital from real-time monitoring to securing medical assets and operating energy-efficiently.
Enhance safety and elevate patient experience.

4 Future-Ready Value to your Hospital

Advance hospital care and management through innovative technology and sustainability leadership. Build a future-ready hospital with higher value.

Medical Management

Samsung B2B Integrated Offering

Discover Samsung DSS (Devices, Solutions, and Services), designed to offer enhanced operational efficiency and safety, while delivering an elevated medical experience for patients.

Provide seamless customer experience

Indoor Signage
LED Signage / The Wall

All-in-one display that delivers both performance and easy installation

- High brightness and refresh rate for vivid visuals in any indoor setting
- Slim, lightweight design enables fast and flexible installation
- Multiple mounting options with front/rear service access for efficient operations

Immersive clarity powered by The Wall

- Deep contrast with true black expression brings a new dimension with enhanced details
- A precise linear grayscale that delivers realistic texture and seamless shadow details
- AI-based processor enhances content quality and optimizes visual performance [1)]

Introducing the new
ZPD (Zero Pixel Defect) Policy for IWC series

Upgrade your IWC series purchase with the ZPD policy, available for an additional fee, and enjoy worry-free support for any pixel defects within one year of installation. This policy ensures comprehensive repair or replacement services, so you can count on flawless visuals every time.

* The ZPD policy is available for P0.8 and P1.2 IWC series models only.
* After one year from installation, Samsung's standard service policy will apply.

Solution

Smart Parking System

Advanced parking service for patients and medical staffs

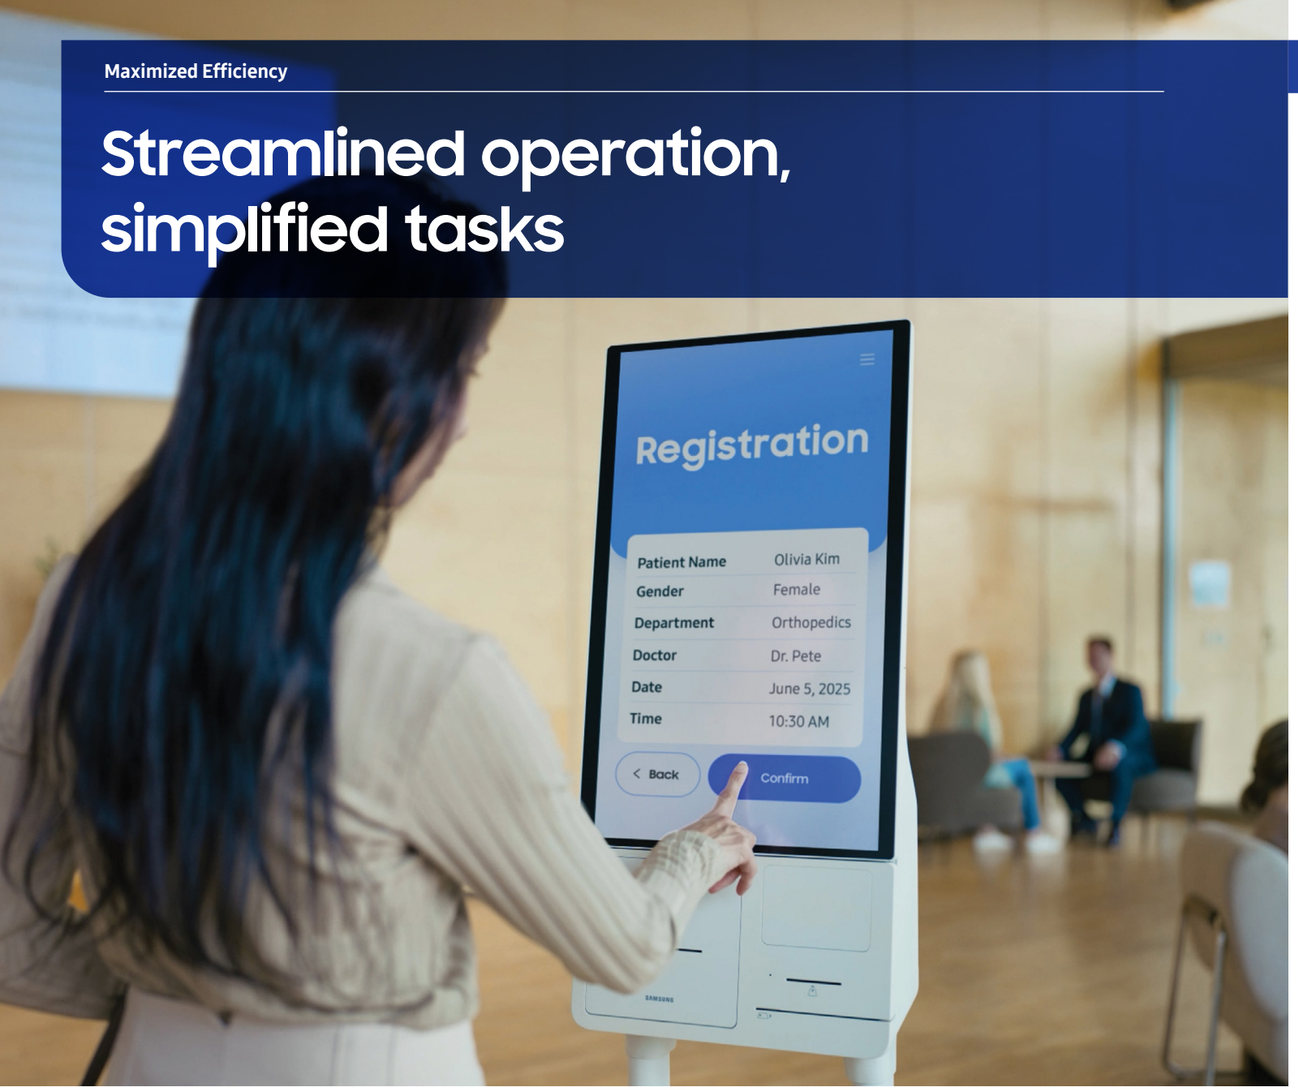

- Enhanced vehicle number recognition through cloud-based LPR (License Plate Recognition)
- Data-driven optimization using parking logs, vacancy status, and fee information
- Custom features including parking discounts for medical staffs and hospital visitors

* The Images shown are for illustration purposes only and may vary according to real usage.
* Availability may vary by country, region, service provider, network environment or device and may change without notice.

[WindFree 4Way Cassette]

1) AI Processor delivers any size up to 4K–8K resolution. The upscaling resolution may vary based on resolution support of the individual screen.

Streamlined operation, simplified tasks

Kiosk

Fast and simple registration via smart kiosk

- Reduced processing time compared to face-to-face registration for improved efficiency
- Compact design available in countertop, floor stand and wall-mounting configurations to suit space limitations
- Protection of important customer data by Samsung Knox technology

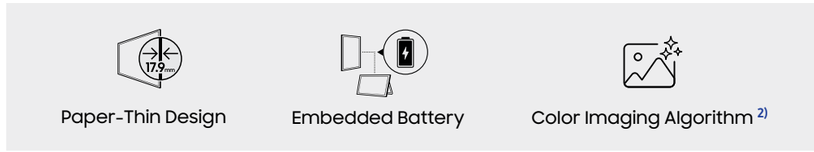

* Wall mount must be purchased separately.

E-Paper

Paper to E-Paper, flexibility meets efficiency

- Sleek, slim, and aesthetically pleasing design with a paper-thin depth of just 17.9mm
- A dedicated embedded battery with USB Type-C support to deliver ultimate convenience with an easy-to-move, lightweight frame for effortless handling in indoor environments [1)]
- Advanced color imaging to deliver paperlike visibility for hospital content

Guide Robot

Hyper-intelligent guide robot transforming customer lobby experience

- High-performance cameras and spatial analysis for precise recognition of individuals and traffic flow
- Escort support for customized wayfinding, ideal for elderly and first-time visitors
- High-brightness display effectively delivering hospital news and campaign messages

* The Images shown are for illustration purposes only and may vary according to real usage.
* Availability may vary by country, region, service provider, network environment or device and may change without notice.

[E-paper]

1) The EMDX series' packaging only includes rear holders (2) and hanging brackets (2). Other accessories for installation must be purchased separately.

2) EMDX series' color may gradually change from its initial state. This discoloration is a characteristic inherent to EPD technology.

Where waiting feels light and fresh

Indoor Signage
UHD Signage

Minimized confusion and optimized waiting

- Real-time display of waiting numbers and registration status to reduce delays and disorganization
- Visual guidance on preparation, queue order, and room entry to help patients understand the process

Easily installed Sleek form factor to fit any room design

- Display of informative content including health tips, wellness content, news, and weather to ease patient tension
- Optimal screen size and angle placement for high visibility in key areas like corridors and waiting zones

Ultra Slim Depth [1] | Even Bezels and Centered VESA Holes [2] | Dynamic Crystal Color | SmartView

WindFree 4Way Cassette

Maintaining a comfortable and pleasant environment in hospital

- Gentle cooling through thousands of micro-holes with no direct drafts [3]
- Provides fast and uniform cooling for large spaces with airflow extending up to 8 meters
- Automatic lift-up front cover for easier filter replacement and hygienic maintenance

Oxygen Generator

Real-time oxygen supply system

- Maintain forest-like oxygen levels for patients
- Enhanced usability with b.IoT control

* All functions are subject to software updates, as applicable.
* The Images shown are for illustration purposes only and may vary according to real usage.
* Availability may vary by country, region, service provider, network environment or device and may change without notice.
* Images are for illustrative purposes only and may contain services that are not yet available. Please contact your regional sales manager for more details.

[Indoor Signage]

[1] Slim Fit Wall Mount must be purchased separately.

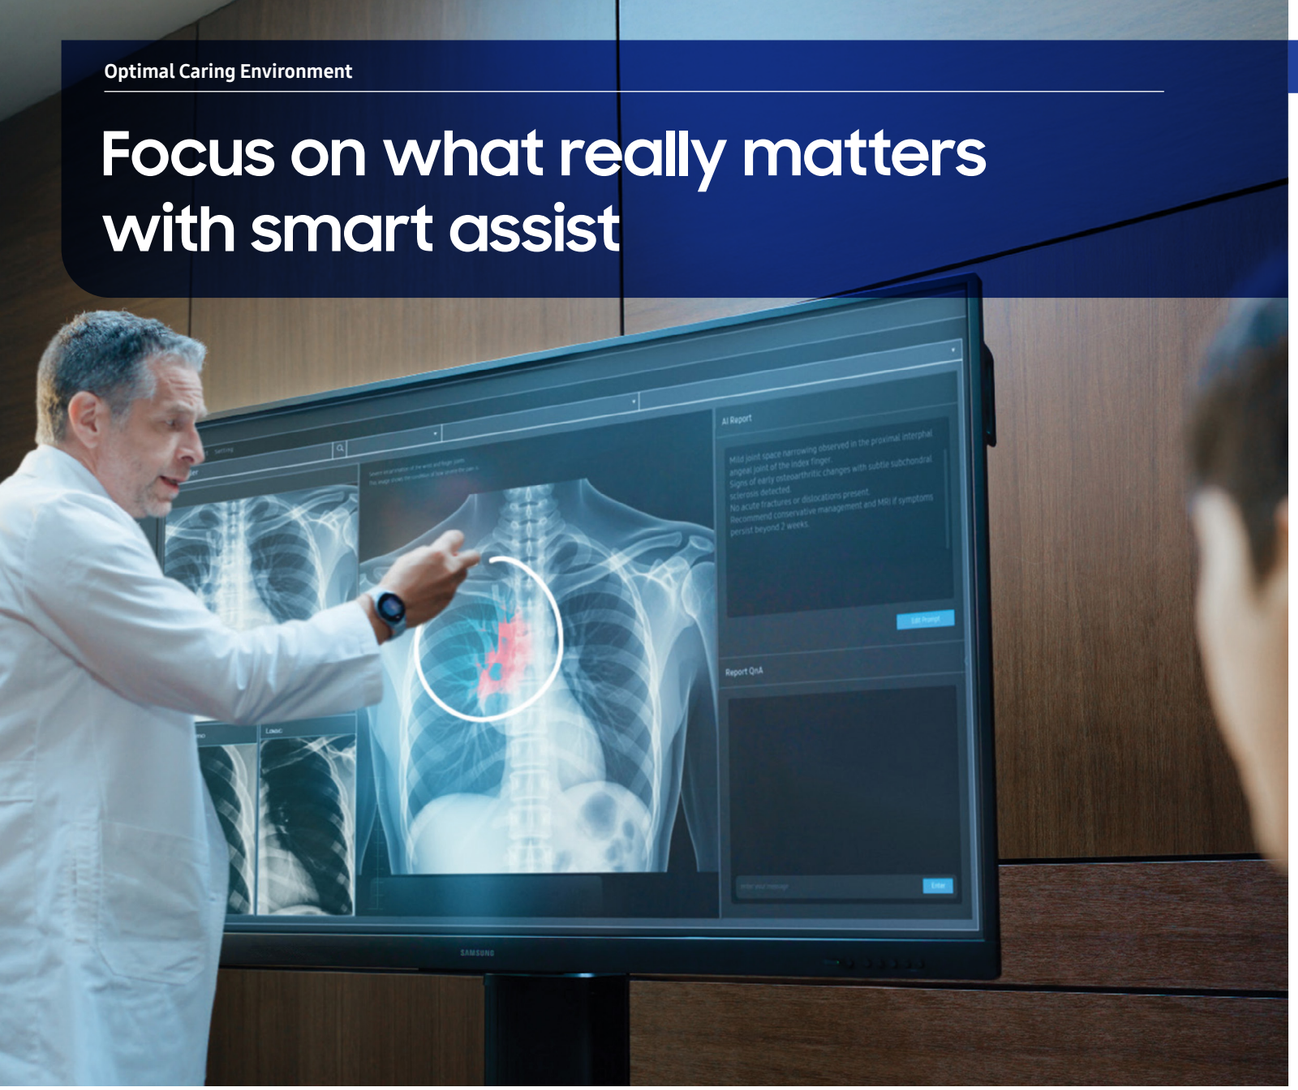

[2] The position of VESA(Video Electronics Standards Association) holes may vary slightly by model.

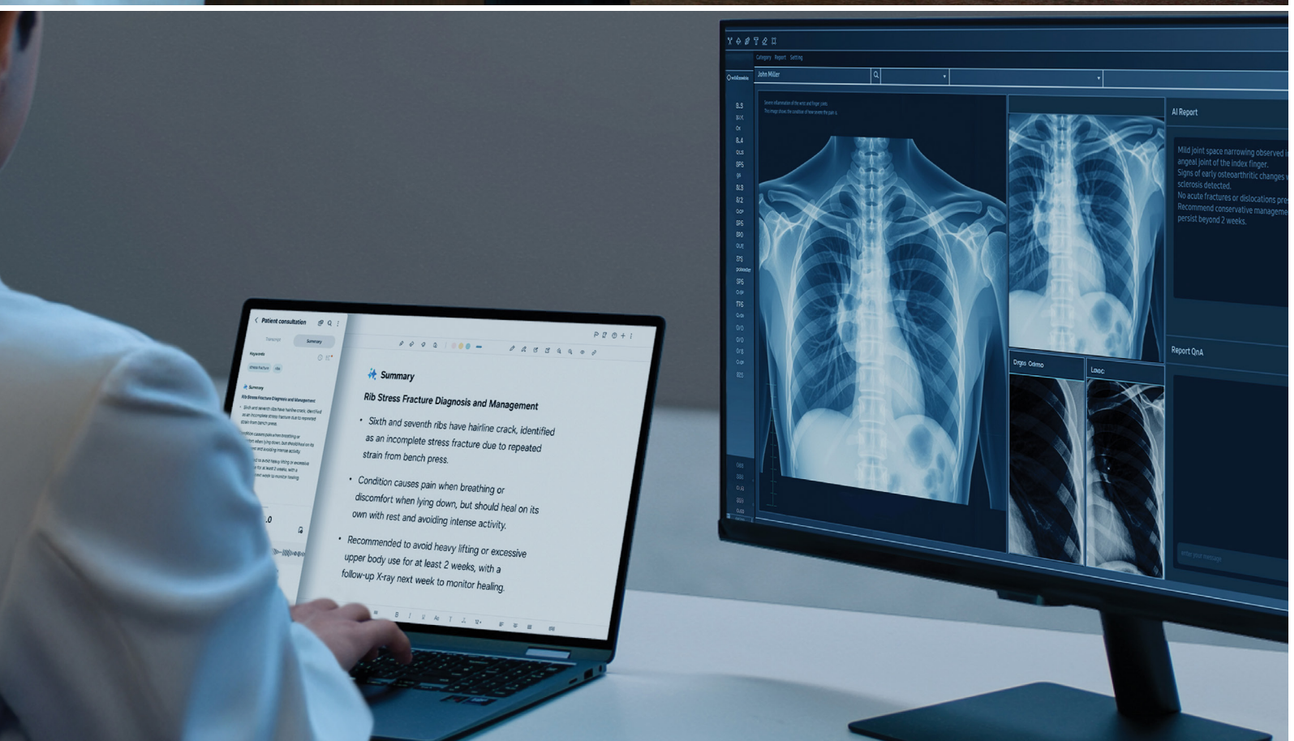

[WindFree 4Way Cassette]

[3] The WindFree™ unit delivers an air current of less than 0.15 m/s in WindFree™ mode. According to ASHRAE 55-2013 (American Society of Heating, Refrigerating and Air-Conditioning Engineers), airspeeds below 0.15 m/s are considered "still air".
- Operating conditions: Outdoor unit AC140BXAPHH3, Indoor unit AC140BN4PBH1 (Panel: PC4NUFK1NW). Standard cooling operation: Outdoor (35°C DB / 24°C WB), Indoor (27°C DB / 19°C WB).

* Tested by an accredited testing institute in Korea.
* Performance may vary depending on actual usage environment.
* The SmartThings App, Wi-Fi connection and Samsung account are required to use the features above.
* Must download the SmartThings app available on Android and iOS devices. A Wi-Fi connection and a Samsung account are required.

Focus on what really matters with smart assist

Interactive Display

Optimized display for clear explanations, precise care, and clinical collaboration

- Familiar and intuitive Android OS interface and a powerful Octa-core CPU deliver smooth performance across applications
- Immediate memo and annotation to support focused consultations

Powerful Performance (Octa-core CPU) | Annotation on | Split Note Mode | Quick Access Controls

Smart Monitor

Smart monitor for flexible clinical connectivity

- Daisy-chain support for multi-screen expansion, ideal for data comparison and multitasking
- Ports including USB-C, LAN, and DisplayPort for streamlined setup without complex wiring
- Quick access to information on a single screen to support clinical focus

Galaxy Book

Smarter performance for seamless clinical workflows

- Advanced NPU for faster and more energy-efficient task execution [1)]
- Instant access to documents, images, and emails with ‘Recall’ to reduce delays [2)]
- ‘Live Caption’ provides real-time translated subtitles for conferences [3)]

Automatic documentation for consultation

- Quick access to AI tools via Copilot key for efficient documentation
- Multilingual voice recordings from a smartphone translated on-screen via ‘Transcript Assist’

* The images shown are for illustration purposes only and may vary according to real usage.
* Availability may vary by country, region, service provider, network environment, or device, and may change without notice.

[Galaxy Book]

1) Specifications of the CPU and GPU may vary by model, country, or region. NPU performance differs depending on the processor. The Intel® Core™ Ultra 5 (Series 2) and Intel® Core™ Ultra 7 (Series 2) support 40 TOPS and 47 TOPS, respectively. Enhanced CPU and GPU performance figures are based on a comparison between the Galaxy Book5 Pro 35.6cm with Intel® Core™ Ultra 7 (Series 2) 258V processor and the Galaxy Book4 Pro 35.6cm with Intel® Core™ Ultra 7 (Series 1) 155H processor. CPU single-core performance improved by 29% (Cinebench R24 test), and GPU performance improved by 26% (Wildlife Extreme Unlimited test).

2) Expected to be available via future update. The specific languages support may vary depending on the software updates and device model. Book5 Pro, Book5 Pro 360, Book5 360 (exclude Pro 16 ARL).

3) Expected to be available via future update. Book5 Pro, Book5 Pro 360, Book5 360 (exclude Pro 16 ARL).

Relentless innovation for your diagnostic confidence

Ultrasound Products

Wide range of specialties including OB/GYN [1], radiology, and point of care

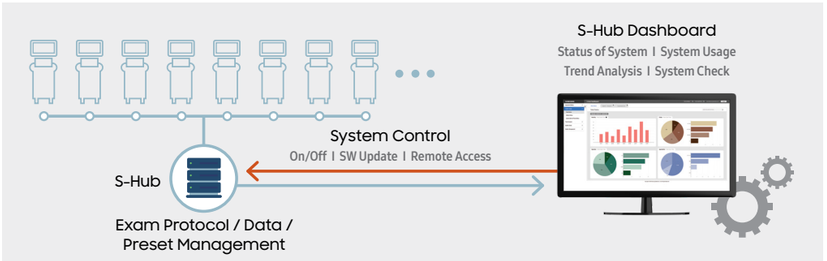

- Equipped with leading-edge imaging engine for outstanding performance and high-resolution images
- Empowered by AI solutions to enhance clinician's confidence across various diagnostic scenarios

Solution

S-Hub

Optimizing operations with central ultrasound system hub

- Enhances the operational efficiency of sonographers, Biomed/service engineers, and hospital administrators
- Ensures that hospital and personal data are protected

Solution

SonoSync™

Real-time remote collaboration for ultrasound diagnosis

- Enables remote ultrasound viewing and control through a connected smart device
- Supports live e-training and telemedicine between professionals in different locations

* The products and solutions mentioned above are offered by Samsung Medison.
* The products, features, options, and transducers may not be commercially available in some countries.
* Sales and shipments are effective only after the approval by the regulatory affairs. Please contact your local sales representative for further details.

[SonoSync™]

* It is a function for image sharing, not for diagnosis.
* Optional feature which may require additional purchase.

[Ultrasound Products]

[1] OB/GYN (Obstetrics and Gynecology) refers to the medical specialty that focuses on women's reproductive health.

Accelerating intelligence to improve patient care

Digital X-ray Products

Ceiling Digital Radiography
GC85A

Advanced low dose imaging with streamlined workflows

- Provides excellent, high resolution images for diagnostic accuracy and confidence by S-Vue™ image processing engine
- Fully automated operation along with the tube head unit, motorized wall stand, and patient table

Vision Assist
Enhanced daily work and continuous patient monitoring through an intelligent live camera solution

Mobile Digital Radiography
GM85

Excellent driving experience and high image quality

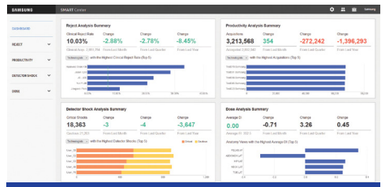

- Collapsible column and compact size to easily access tight spaces
- Powered by a lithium-ion battery for all day operation on a single charge [1)]
- Allows radiologists to see more detail and make confident clinical decisions with advanced applications for timely patient care

Solution

SMART Center

SMART Analytics, Ready to Act

- An enterprise-level quality and asset monitoring solution which aggregates data from multiple Samsung digital radiography devices into one easy-to-use platform
- Detects and reports critical and ongoing performance issues by providing visualized analysis; Reject, Dose, Productivity and Detector Shock Analysis

Dashboard

* Regulatory approval/clearance status may vary by country. Please contact your local sales representative for further details.

[Digital X-ray Products]

1) Support 500 exposures & 50 km (31 miles) & 10 hours (Test condition: Chest AP / 80 kVp / 250 mA / 5 msec / 60 sec intervals, with driving at 5.6 km/h).

Optimal Caring Environment

A premium space made for recovery

BESPOKE Appliances

Bespoke Refrigerator
Bespoke Microwave

Premium refrigeration with both functionality and style

- BESPOKE design matches VIP room interiors
- Energy-efficient performance supporting sustainable hospital operations

Convenient in-room microwave heating for light meals with a microwave

- Countertop or built-in-style microwave oven to suit different room layouts
- Triple Distribution System for even heating of small portions
- Enables patients to enjoy snacks when needed

The Frame

Smart TV to add calm and class for VIPs

- Displays curated art when idle, blending in like a framed piece
- Art Mode with 370+ free pieces available each year [1)]
- Matte display minimizes glare for a gallery-like viewing experience [2)]

Glare Free :
Reflection Glare: UGR < 10
Discomfort Glare: UGR < 22
Disability Glare: UGR < 34

UL Glare free certification
No more disruptions from reflected lights on the screen.

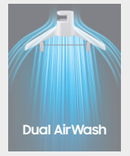

PANTONE Validated ArtfulColor

Pantone Artfulcolor validation
Provides rich color expression and even represents the matte texture of the canvas.

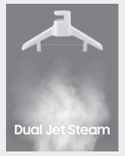

AirDresser

Hygenic maintenance of daily-use garments

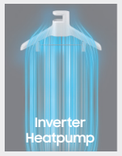

- Reduces chemical residues, pollen, 10 types of viruses, and 9 types of bacteria [3)]
- Handles up to 9 items at once with simultaneous sterilization (Large Load Care) [4)]

Air
Thoroughly dusting off both the inside and outside of clothes

Steam
Reliably sanitizing viruses and germs

Dry
Safely drying at a lower temperature

* The images shown are for illustration purposes only and may vary according to real usage.
* Availability may vary by country, region, service provider, network environment, or device, and may change without notice.

[BESPOKE Appliances]

* Contact your regional sales manager for more details.
* The AI power-saving mode is only supported via SmartThings, and its availability may be restricted depending on environment and usage conditions.

[The Frame TV]

1) Requires Wi-Fi and Samsung Account login. Needs subscription for full Art Store access. Includes 30 monthly artworks refreshed via Art Store Streams and over 70 free ambient pieces annually.
- Availability, schedule, and frequency of the 30 artworks delivered each month may vary by country or region.
- The number of free artwork delivered is subject to change without notice.

2) Based on testing standards set by UL, i.e., UGR<10 for reflection glare, UGR<22 for discomfort glare, UGR<34 for disability glare.

[AirDresser]

* Must download the SmartThings app.

3) Test results are verified by Intertek and the preclinical laboratory at the College of Pharmacy, Korea University, and may vary depending on actual usage environment.

4) The "Large Load Care" course can accommodate up to 9 garments only when all items, including those hung in the Air Hanger, are of similar thickness, such as T-shirts or dress shirts.

Focus on patients with secure, ready data access

Galaxy Tab

Empowering staff with real-time access to data and communication

- Enables direct access to treatment history, prescriptions, and care plans with premium viewing
- Facilitates digital consent and real-time admission process management
- Stay productive on the go with a stable work environment powered by the latest 5G connectivity and Wi-Fi 7
- Paperless, streamlined workflow with S Pen for easy submission of forms

Comfortable in-room digital care experience

- Helps patients clearly understand treatment and navigate care instructions
- Use it in any environment with reliable durability, with Tablet / S Pen rated IP68 for water and dust resistance

Solution

Knox

Data protection and device security for medical environments

- Knox Suite makes Samsung Galaxy even more powerful for work, delivering seamless experiences that keep everyone connected, protected, and productive

Knox Suite

Knox Platform for Enterprise
Government-grade security for businesses

Knox Mobile Enrollment
Bulk device setup and deployment

Knox Manage
Powerful mobile management

Knox E-FOTA
Control OS updates

Knox Asset Intelligence
In-depth usage analytics

Knox Capture
Transform devices into barcode scanners

Knox Authentication Manager
Unlock devices and autofill credentials with facial authentication

Knox Remote Support
Make troubleshooting easier by controlling devices from a PC

Knox Configure
Remotely configure Samsung devices in bulk and tailor them to specific needs

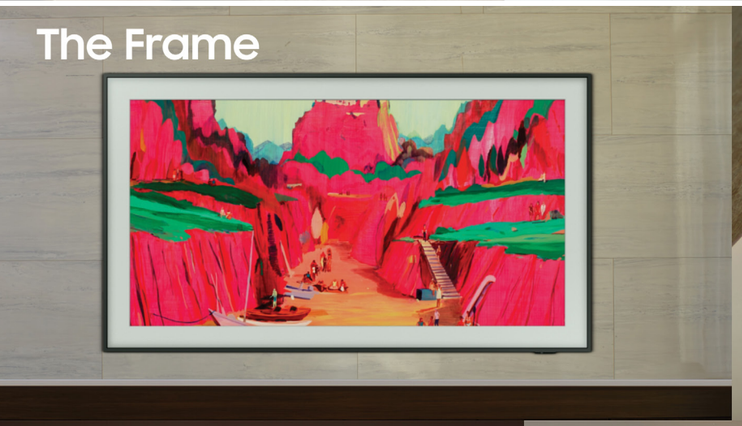

Knox Guard
Remotely lock down Samsung Galaxy devices to reduce financial risks and protect assets

* Contact your regional sales manager for more details.
* Additional licenses and devices for certain features are sold separately.
* The images shown are for illustration purposes only and may vary according to real usage.
* Availability may vary by country, region, service provider, network environment, or device, and may change without notice.

Optimal Caring Environment

Personalized comfort from every angle

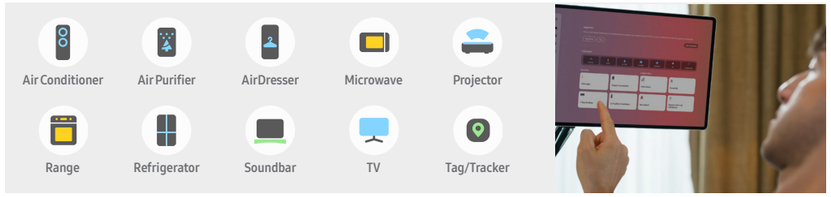

Solution

SmartThings Pro

Customizable IoT environment for VIPs

- Automated control of air conditioning, lighting, curtains, and temperature
- Personalized presets saved and applied per patient

WindFree 1Way Cassette

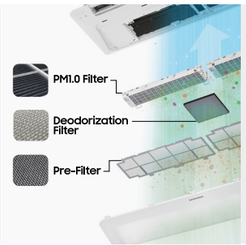

WindFree™ [1] cooling system with energy saving

- Gentle cooling via approximately 10,000 micro holes
- PM1.0 filter for ultrafine dust removal

Even Cooling with WindFree

Even Cooling from corner to corner with WindFree technology

PM 1.0 filter

Traps ultrafine dust, Keeps the air clean

System Air Purifier

Integrated ventilation and air purification system

- Clean, filtered air supply—even during air pollution alerts—without concern over indoor/outdoor temperature differences
- Enables building-wide or room-specific ventilation and purification for improved convenience and energy efficiency
- WindFree™ [1] purification ensuring fresh air without direct drafts

* All functions are subject to software updates, as applicable.
* The Images shown are for illustration purposes only and may vary according to real usage.
* Availability may vary by country, region, service provider, network environment, or device, and may change without notice.

[WindFree 1Way Cassette / System Air Purifier]

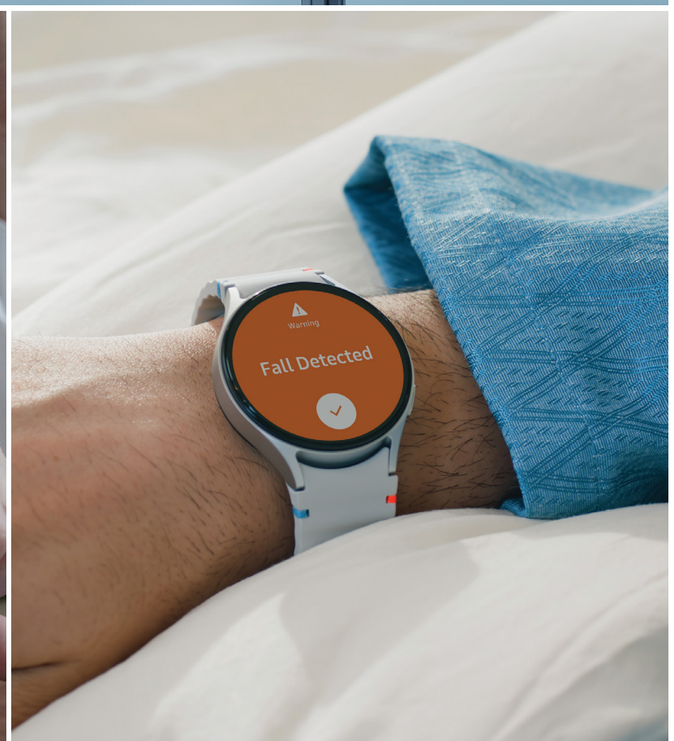

[1] The WindFree™ unit delivers an air current of less than 0.15 m/s in WindFree ™ mode. According to ASHRAE 55-2013 (American Society of Heating, Refrigerating and Air-Conditioning Engineers), airspeeds below 0.15 m/s are considered "still air".
- Operating conditions: Outdoor unit AC140BXAPHH3, Indoor unit AC140BN4PBH1 (Panel: PC4NUFK1NW). Standard cooling operation: Outdoor (35°C DB / 24°C WB), Indoor (27°C DB / 19°C WB).

* Tested by an accredited testing institute in Korea.

* Must download the SmartThings app, available on Android and iOS devices. A Wi-Fi connection and Samsung account are required.
* The SmartThings app, Wi-Fi connection, and Samsung account are required to use the features above.

Stay connected where every second counts

Indoor Signage
Stretched Display

Maximize space and optimize communication for urgent updates

- 16:4.5 wide screen stretched display format to effectively display information in small, narrow spaces
- Delivers vibrant, realistic images through an unparalleled visual experience with brightness levels of up to 700 nits

16:4.5 Wide Screen | High Brightness | Samsung VXT

Solution

SmartThings Pro for Safety

Solution for emergency response and patient monitoring

- Fall detection and intuitive alerts to support emergency responses
- Monitors signs of health irregularities for night shift workers or those in isolation wards

Task Management (Emergency Response in Wards)

Emergency Request → Locate nearby medical staff → Accept and perform task → Mark as complete

Falls and Accident Response

Fall detected → Notify safety manager → Safety manager inspects → Perform first aid and call ambulance

Restricted Zone Monitoring

Define restricted zones → Detect unauthorized entry → Alert safety manager and nearby staff → Contact patient and take necessary action

* The images shown are for illustration purposes only and may vary according to real usage.
* Availability may vary by country, region, service provider, network environment, or device, and may change without notice.

[SmartThings Pro for Safety]

* All functions are subject to software updates, as applicable.
* This solution is exclusively supported on Galaxy Watch devices.
* Additional licenses and devices for certain features are sold separately.

Manage the ward safely and efficiently

Facial Recognition Access Solution

Facial recognition security platform optimized for hospital

- Enhanced speed and accuracy for contactless and hygienic access
- Walk-through authentication recognizes the staff from 1.3 meters without having to stop at the entry gate
- Secure and efficient management of restricted areas within the hospital

ISO/IEC 27001, 27701
International security standards certifications

High recognition accuracy in various environments

Face Template on Mobile authentication [1)]

Intelligent Camera

Intelligent system for real-time monitoring

- Detect indoor occupancy and maintain optimal comfort with SmartThings Pro
- Wireless connection to various sensors to detect fire, theft, intrusion, or accidents
- Provides basic voice guidance with additional audio options (e.g., warnings for restricted area access, notification of video recording, etc.)

Prevents safety hazards
(e.g., abnormal elevator operation)

Prevents fire hazards
(e.g., indoor/outdoor fire)

Secures restricted areas
(e.g., unauthorized access)

Medical Delivery Robot

Automated delivery to improve operational efficiency and enhance safety

- Medication and supply transport to reduce nurse workload
- Real-time monitoring of robot activity and status via SmartThings Pro
- Safely transports high-risk drugs to minimize infection risks associated with manual transport

* Contact your regional sales manager for more details.
* All functions are subject to software updates, as applicable.
* The Images shown are for illustration purposes only and may vary according to real usage.
* Availability may vary by country, region, service provider, network environment, or device, and may change without notice.

[Facial Recognition Access Solution]

1) Enables secure storage and management of facial authentication templates on the user's smartphone.

Make building-wide management simple, secure, and integrated

Solution

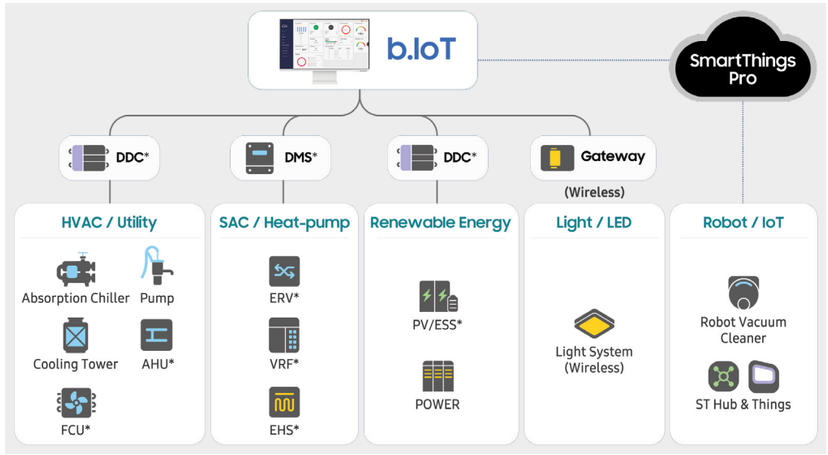

b.IoT

Foundation for intelligent hospital operations

- Real-time sensing of CO_2, temperature, and humidity via indoor air quality sensors
- Air quality control integrated with AHU, ERV, and Ventilation systems
- Improved comfort level for patients and medical staff through clean air

Energy efficiency through intelligent control system

- Maintains balanced comfort and energy efficiency amidst external influences
- Integrated control of facilities such as air conditioning, mechanical equipment, lighting, and renewable energy

* DDC : Direct Digital Controller * DMS : Data Management Server * AHU : Air Handling Unit * FCU : Fan Coil Unit * ERV : Energy Recovery Ventilation
* VRF : Variable Refrigerant Flow * EHS : Eco Heating System * PV/ESS : Photovoltaic/Energy Storage System

Solution

SmartThings Pro

Real-time operational data analysis made easy with an at-a-glance view of spaces and devices

- Visualize the current state of your space and device operation using 3D maps
- Helps reduce building maintenance costs with intuitive multi-site space management and optimized energy usage
- Energy saving algorithms reduce energy consumption by detecting empty rooms

Integrated platform for managing medical assets and facilities

- Smart tag-based tracking of trolleys, wheelchairs, and beds
- Reduced costs and streamlined maintenance through energy data analysis and automation

* The Images shown are for illustration purposes only and may vary according to real usage.
* Availability may vary by country, region, service provider, network environment, or device, and may change without notice.
* All functions are subject to software updates, as applicable.
* The effect of energy-saving algorithms may vary depending on the actual environment.
* Contact your regional sales manager for more details.

Integrated content management to cover across the hospital

Solution

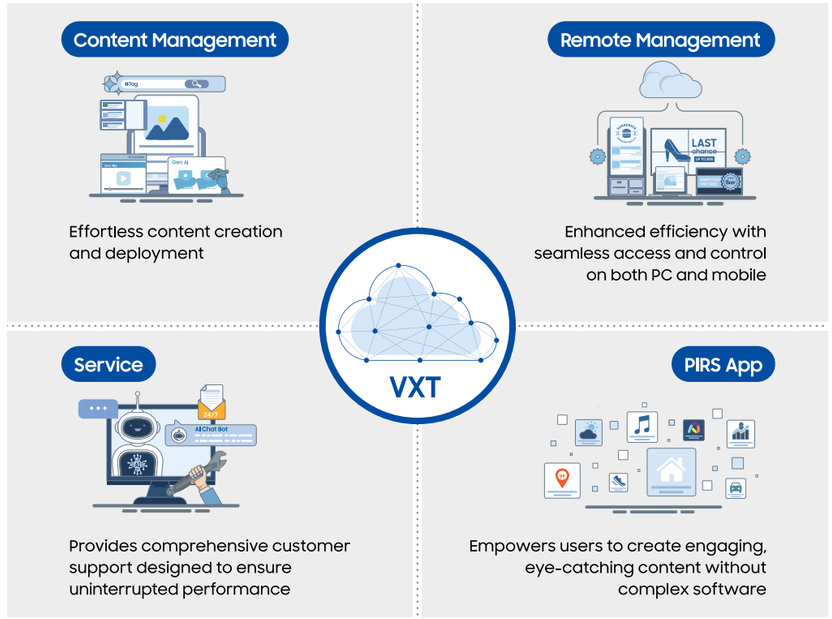

VXT
Visual eXperience Transformation

Centralized signage control for efficient hospital-wide communication

- Hospital-wide communication of announcements, emergency alerts, and event information through digital signage

Secure content operation and pre-management

- Ultimate cloud-based visual display solution, combining a powerful content management system with seamless remote signage management within one secure platform

Product	VXT Available	Note
Interactive Display (Flip Pro)	○	
Interactive Display (Android)		Integration scheduled for H2 2025
Indoor LCD Signage	○	
Indoor LED Signage	○	Only devices using Samsung S-Box are supported
Kiosk	○	Only Windows OS devices are supported
E-Paper	○	Comes with built-in VXT Player

* The Images shown are for illustration purposes only and may vary according to real usage.
* Availability may vary by country, region, service provider, network environment, or device, and may change without notice.
* All functions are subject to software updates, as applicable.
* Contact your regional sales manager for more details.

Sustainable steps to the future of care

Robot Arm

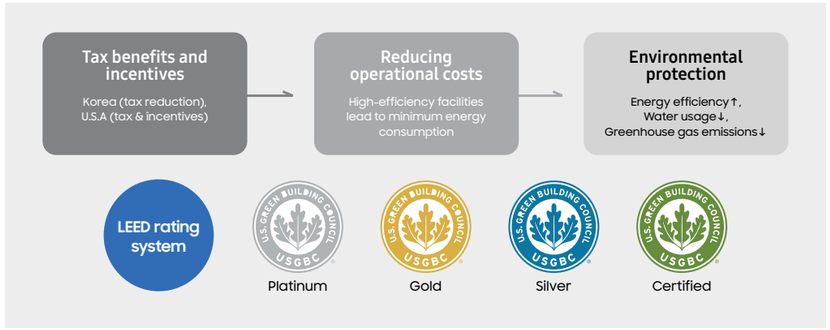

Versatile automation solution with precise motion and safe collaboration

- 6-axis robots with hospital-grade collision detection for safe asset transport and lab support
- Configurable models by load, range, and space
- Reduces repetitive tasks, enabling medical staff to focus on patient care

LEED Certification

Provides support to obtain LEED Certification and enhance building value

- Maximizes branding and sustainability impacts for environmentally focused buildings
- Samsung B2B Integrated offering develops and executes strategies to assist in achieving Platinum certification

WELL Certification

Supportive environment for building owners, tenants, and visitors

- Helps enhance asset values for owners and the well-being of residents
- Focuses on safety and welfare through considerate design and operations
