Appliances must be connected to the refrigerator via the SmartThings App and using the same Samsung account. ²You can select the door opening level using the SmartThings App. A Wi-Fi connection and a Samsung account are required. The "Wide-open" option automatically opens the door by an angle of 80 degrees or more, but the door does not close automatically. The "Semi-open" option reduces the force required to open the door, and automatically closes the door after a certain period of time if the door is left open. ²Based on internal testing of the cycle time when drying an IEC 3kg load with Cotton cycle. Results: Bespoke AI Laundry Combo model with a heat pump (WD21B6400KV) = 78 minutes vs. WD21B6400KV combo model with a condenser = 202 minutes, which is a reduction of 60%. Individual results may vary based on actual load contents. Based on internal testing and verified by KATRI (Korea Apparel Testing Research Institute) of the cycle energy consumption when drying an IEC 3kg load with Cotton cycle. Results: Bespoke AI Laundry Combo model with a heat pump (WD21B6400KV) = 0.8kWh vs. WD21B6400KV combo model with a condenser = 3.6kWh, which is a reduction of 75%. Individual results may vary based on actual load contents.

³Based on internal testing and verified by KATRI (Korea Apparel Testing Research Institute) of the cycle time when drying a DOE (50% cotton/50% polyester) 3kg load with a Super Speed cycle of WD25DB8995BZ model. Result: The washing and drying cycle was completed in 98 minutes. Results may vary depending on the actual usage environment.

⁴AI Wash & Dry's detection and sensing capabilities are based on our deep learning models trained using predefined set of data and may yield inaccurate or incorrect results. New datasets may be introduced to our learning models from time to time to enhance its accuracy. A turbidity sensor operates for all weights, while fabric sensing operates for 8lbs and under. Actual results may vary depending on individual use. To prevent wear, wash like fabrics together.
