SMART CONTROL

AI DRY

9 Star Energy Efficient with Heat Pump Technology

Heat Pump Technology offers a gentle and energy-efficient way to dry clothes.* Its impressive 9-star rating for energy efficiency uses a 'refrigerant' to heat the air, instead of electricity. It also recycles warm air to help reduce energy usage.

Smart Control

Dry laundry easily and effectively with Smart Control. This Heat Pump Dryer personalises drying by remembering your habits, suggesting cycles and displaying timely information. Using the SmartThings app*, it helps select the ideal drying course for a wash cycle**, and provides advice on cycles, planning and trouble shooting.

All-in-one Control

Control two machines using one simple, intelligent control to suit your needs.* Simply stack the clothes dryer up on the washer, select which machine you want to use and turn the central dial to choose a course. Then press the start button to begin the washing or drying cycle. With one control to use either machine, you can eliminate the need to stretch or bend to access the controls, creating an easier washer or dryer experience.

AI Dry

AI Dry technology utilises 9 intelligent sensors to optimise and control the temperature and humidity of your clothes in the dryer. You'll enjoy fast and precise drying with loads complete in less than 1 hour.*

*Tested in accordance with IEC 61121:2013/8kg Wash load/Cotton Cupboard with Heatpump (DV80F5E4HGW) vs. without Heatpump (DV80H4100CW). Individual results may vary. *All-in-one Control is only available when a clothes dryer is stacked up on the washer and connected by a wire. *Available on Android and iOS devices. SmartThings compatible devices may vary by region. This function may differ by mobile and OS(Operation System). Each device must be connected to Wi-Fi or other wireless network. Download and installation of SmartThings app are required. Samsung Account required. For interoperability through SmartThings, all the devices should be registered with a single Samsung Account. Apps and services are subject to change without notice. Data, subscription and other charges may apply. **Auto Cycle Link is only available when both the washer and dryer have AI Control and Wi-Fi connected. *Based on internal testing using an AI Dry course (Degree of dryness: 2) with an 3kg mixed load. Results may vary depending on the load size (amount of clothes) and usage conditions.
