8kg Smart Heat Pump Dryer

- 9 Star Energy Efficient
- Optimal Dry System
- Quick Dry 35'
- Colour: White
- Dimensions:
  (W) 600 mm
  (H) 850 mm
  (D) 600 mm

9 STAR ENERGY EFFICIENT

OPTIMALDRY

QUICK DRY 35

WRINKLE PREVENT

9 Star Energy Efficient with Heat Pump Technology

Heat Pump Technology offers a gentle and energy-efficient way to dry clothes.* Its impressive 9-star rating for energy efficiency uses a 'refrigerant' to heat the air, instead of electricity. It also recycles warm air to help reduce energy usage.

OptimalDry

OptimalDry™ System is an intelligent drying system using 3 unique sensors. The moisture sensor adjusts the drying time. The temperature sensor stops clothes from getting too hot. And the heater cover sensor reminds you to clean the Heat Exchanger.

Quick Dry 35

Get the clothes you need most urgently dried fast. The Quick Dry Cycle can get a 1kg load dry and ready to wear in just 35 minutes.*

Wrinkle Prevent

Reduce wrinkles and save time on ironing. Simply select Wrinkle Prevent and, once the drying cycle ends, it intermittently turns the drum without heat for up to 180 minutes. This helps prevent clothes from resting in one place for too long while they are hot and reduces creases on the fabric.

* Tested in accordance with IEC 61121:2013/8kg Wash load/Cotton Cupboard with Heatpump (DV80F5E4HGW) vs. without Heatpump (DV80H4100CW). Individual results may vary.
* Designed for small, lightweight loads up to 1kg. Results may vary depending on the type of fabric.
