All Around Cooling

Make sure that everything in the fridge is cooled effectively, so food stays fresher. The All-around Cooling system cools every inch of the fridge evenly from corner to corner. Cold air is blown out through multiple vents on every shelf level to maintain a constant and optimal temperature.

Twist Ice Maker

A simple twist is all you need to empty ice cubes from the icemaker tray.

LED Lighting

High efficiency LED lighting is slimmer, cooler and more power-efficient than conventional lighting. Located on the top and sides, it beautifully and brilliantly illuminates every corner, ensuring better visibility.

Digital Inverter Compressor

The Digital Inverter Compressor automatically adjusts its speed in response to cooling demand, which in turn uses less energy, minimises noise and reduces wear and tear for a longer lasting performance. Backed-up by a 10 year warranty* on the compressor.

*10 year warranty is limited to the compressor only.
