(D) 723 mm

TWIST ICE MAKER

POWER COOL / POWER FREEZE

FLAT DOOR DESIGN

ALL-AROUND COOLING

Twist Ice Maker

Long gone are the days of bashing ice cubes out of a tray — just fill with water, freeze, then dispense with an effortless twist. And the removable storage bin means you can serve ice wherever you like.

Flat Door Design

Elevate the look of your kitchen with clean and clutter-free styling. The refrigerator's cutting-edge design features a timelessly minimalist exterior, with strikingly beautiful flat doors and no external water dispenser. Its simple and sleek look is accentuated by recessed handles.

Power Cool / Power Freeze

Enjoy rapid cooling performance at the touch of a button. Power Cool blows intensely cold air into the fridge to quickly cool your groceries or favourite drinks. And Power Freeze delivers a fast blast of cold air into the freezer — perfect for firming up ice cream or making ice in a hurry.

All-Around Cooling

Helps keep your food properly cooled no matter where it's placed. An All Around Cooling system chills each compartment evenly from corner to corner, continually checking the temperature and circulating cool air via strategically placed vents. And it quickly restores the ideal conditions each time the door is opened — meaning every shelf is always cool, and fresh.
