  (W) 817 mm
  (H) 1776 mm
  (D) 715 mm

TWIN COOLING

MODERN AND SLEEK DESIGN

FINGERPRINT RESISTANT FINISH

AUTO ICE MAKER

Twin Cooling

Twin Cooling helps to optimise the fridge's temperature to keep food fresh, minimise odours from mixing and circulate the cool air evenly.

Modern and Sleek Design

Enhance the functionality of your kitchen with convenient controls and an elegant design. A stylish front LED display makes it easy to control the temperature and monitor the fridge's status. The simple sophistication of the flat doors also creates an elegant and modern look.

Fingerprint Resistant Finish

Make sure your kitchen looks spotlessly clean. A special Fingerprint Resistant Finish helps prevent surfaces from becoming covered in unsightly fingerprints, other marks and smudges. Fingerprints can be quickly wiped away if any do appear. So your home will stay looking flawlessly beautiful.

Auto Ice Maker

Forget about forgetting to make ice — the Auto Ice Maker takes care of it for you. Being located in the freezer, it frees up space in the fridge for those extra few blocks of chocolate.
