All Around Cooling

Make sure that everything in the fridge is cooled effectively, so food stays fresher. The All-around Cooling system cools every inch of the fridge evenly from corner to corner. Cold air is blown out through multiple vents on every shelf level to maintain a constant and optimal temperature.

Reversible Door

Enjoy the convenience of reversible doors that lets your fridge fit into different types of kitchen layouts.

LED Lighting

Located on both sides of the interior, Samsung's sophisticated LED lighting indirectly serves up brighter, more natural light for comfortable viewing. Find what you're looking for more easily, even at night, without turning the kitchen light on. The LED light also emits less heat than conventional bulbs, which helps the refrigerator keep consistently cool.

Digital Inverter Compressor

The Digital Inverter Compressor automatically adjusts its speed in response to cooling demand, which in turn uses less energy, minimises noise and reduces wear and tear for a longer lasting performance. Backed-up by a 20 year warranty* on the compressor.

* 20 year warranty is limited to the compressor only.
