

BESPOKE AI™ 9 kg Heatpump Dryer with AI Dry and QuickDrive™

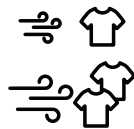

- 9 Star Energy Efficient
- AI Dry
- QuickDrive™
- Smart Control
- Colour: White
- Dimensions:
(W) 600 mm
(H) 850 mm
(D) 600 mm

Heatpump technology

9 STAR ENERGY EFFICIENT

AI DRY

QUICKDRIVE™

SMART CONTROL

9 Star Energy Efficient

Save money and protect the environment by using less electricity*. Heatpump technology offers an energy-efficient, cost-effective and gentle way to dry clothes. It is 9 star energy rated as it uses 'refrigerant' instead of electricity to heat the air and recycles warm air to avoid wasting energy.

QuickDrive™

Spend much less time drying and take good care of your clothes. When activated, QuickDrive™ reduces the drying time by up to 35% and saves energy. Unlike conventional dryers, its inverter compressor technology automatically adjusts its speed based on the internal temperature and care purposes.

AI Dry

Enjoy faster and more precise drying that is gentler on clothes and reduces energy use by 10%. AI Dry's multi-sensing technology monitors the humidity of the clothes in real time and intelligently generates the optimal amount of heat to suit the weight and moisture content of each load.**

Smart Control

Dry laundry easily and effectively with Smart Control. It personalises drying by remembering your habits, suggesting cycles and displaying timely information. The SmartThings App offers advice on cycles, planning and troubleshooting and it selects the ideal drying course for a wash cycle.****

*Tested in accordance with IEC 61121:2013/8kg Wash load/Cotton Cupboard with Heatpump (DV80F5E4HGW) vs. without Heatpump (DV80H4100CW). Individual results may vary. **Based on an AI-created algorithm. Actual results may vary depending on individual use. Based on internal testing (Mixed 2kg load) of the DV9400B using AI Dry compared to a conventional Samsung model, DV5000T. Result: Energy consumption reduced by 10%. Results may vary depending on the actual usage conditions. ***Based on internal testing (IEC cotton 9kg load) of the DV9400B using QuickDrive compared to a conventional Samsung model, DV5000T. Result: Drying time reduced by 35% (210 mins → 136 mins). Results may vary depending on the actual usage conditions. ****Messages with cycle suggestions are displayed on a smartphone App. Available on Android and iOS devices. A Wi-Fi connection and a Samsung account are required. Auto Cycle Link is only available when both the washer and dryer have Smart Control and Wi-Fi connected.
