

SAMSUNG

Samsung Washing Machine

2020 WASHING MACHINE LINE-UP

WHAT TO LOOK FOR FACTORS YOU NEED TO CONSIDER

WEIGHT

Comes in a wide range of sizes from 6.0 - 21kg to fit your family's needs.

FABRIC CARE

Different fabric types should be washed in different ways. Check if your washing machine can handle different types of fabric.

EFFICIENCY

Know your washing machine's efficiency by checking cost to operate per cycle.

SPACE

Check how much space you are allotting for the washing machine.

DURABILITY

Protect your laundry with a washing machine that comes with an 11-year warranty on the motor.

THE RIGHT WASHING MACHINE FOR YOU

WASHER-DRYER

Washer-dryers combine the power and convenience of washing and drying to make laundry fast and easy. This WM type allows for significant space-saving by combining the functions of a washer and dryer in one machine.

WASHER ONLY

Washer only washing machines use energy efficiently and clean the drum automatically so that you can start your next laundry fresh. These types are ideal for small spaces.

DRYER ONLY

By having a separate machine for drying, you can simultaneously dry and wash clothes at the same time, just pair it with a washer only washing machine.

FULLY AUTOMATIC TOP LOAD

Top load washers offer washing convenience with a fully automatic feature providing ease from wash to spin dry. And with easy-touch buttons, operating top load washers is a breeze.

TWIN TUB

These washing machines provide a tub for washing and another for spinning clothes dry, saving you time on every wash cycle. With two tubs in one machine, you can pre-wash heavily soiled clothes conveniently.

Hygiene Steam

Removes **99.9%** of bacteria and inactive allergens*

intertek
Total Quality. Assured.

* Based on Intertek Test Report on Hygiene Steam: Anti Bacteria

Information is accurate at the time of printing. Prices are SRPs and may change without notice. Images are for illustration purposes only. Capacity in gross.

Intensive Wash
Quickly pre-mixes detergent and water to penetrate deeper into the fabric to remove dirt more effectively.

Deep Softener
This maximizes the richness and fragrance of the fabric softener by optimizing the rinsing setting.

Magic Dispenser
It dissolves detergent and disperses it evenly before a wash cycle

Magic Filter
No more lint and fluff.

Air Turbo Drying System
Iron straight from your washing
*for lightweight fabrics only

11 YEAR WARRANTY
11-Year Warranty on the Motor for Inverter-type Models
Ensures a long-lasting washing machine with fewer chances of malfunctions.

Save Half of Electricity Consumption*

*Tested in accordance with EN 61121-2013/Cotton Cupboard with Heatpump 9kg (DV90M5200QW) vs. without Heatpump 8kg (DV80H4100CW).

Samsung Air Dresser

Our newest innovation in clothing care

FRONT LOAD DRYER

Optimal Dry™
This automatically optimizes the time and temperature of the drying cycle. So clothes are always thoroughly dry without being damaged. Moisture sensors protect your laundry from heat damage and avoid excessive energy use.

Quick Dry
A Quick Dry 35' cycle gets a light load of clothing dry and ready to wear in just 35 minutes. It can safely dry a few items, so there's much less waiting.

Adjusts drying time to prevent damaging clothes.

Quick Dry
Ready to wear clothes in 35 minutes.

2-in-1 Filter
Easily removes lint from dry clothes

AirDresser

Eliminates bacteria, viruses, & allergens in 4 Steps

intertek
Total Quality. Assured.

* Based on Intertek Test Report on Hygiene Steam

Wrinkle Free

Wrinkle Care uses a combination of steam and air to relax and smooth out creases in clothes, so they're quickly ready to wear. It can remove 100% of wrinkles from woolen clothes and 80% of wrinkles from rayon material*.

* Based on independent testing by Intertek, using a normal course according to KS K 6991 and ISO 9862. Wool fabric wrinkle recovery efficiency was 100% and rayon fabric wrinkle recovery efficiency was 80% after using the AirDresser.

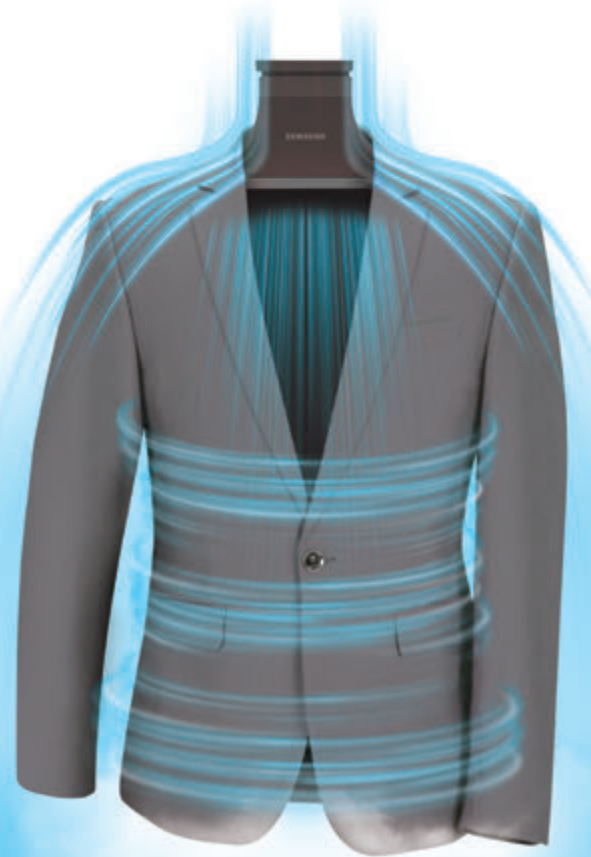

Self Clean

Self Clean technology dehumidifies, sanitizes and deodorizes inside. You don't need harsh or costly detergent as it cleans using a combination of heat, air and steam. And it notifies you when it needs cleaning after 40 cycles.

* Based on internal testing it has a Noise Rating of 42.8 dB in normal mode and is 37.8 dB in Silent mode. This is the max LEO sound level from the front, lateral and rear sides. Testing was conducted in an anechoic room at a distance of 1.0m from the product. The results may vary depending on the actual usage situation.

4-Step Cleaning System

Keep clothes ready to wear daily

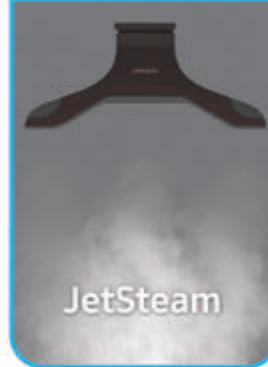

STEP 1

Jet Air & Air Hangers

Thoroughly dusting off both the inside and outside of clothes

STEP 2

JetSteam

Eliminates 99.9% of viruses and bacteria*

* (Adenovirus, Influenza, Corona Virus and Herpesvirus) based on testing by the Korea University Lab using Sanitize course

STEP 4

Deodorizing Filter

Removes odor including sweat, tobacco, and food smell

STEP 3

Inverter Heatpump

Gently dries and relaxes wrinkles using lower temperature

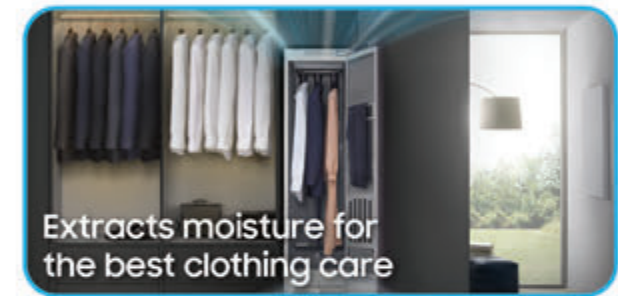

SmartThings

SmartThings* enhances the performance using user data**. 'Care Recipe' suggests the best wash cycles***. 'My Closet' suggests courses for your clothes. 'Special Course' lets you access common and specialist cycles. 'Home Care' enables troubleshooting.

* Available on Android and iOS devices. A Wi-Fi connection and a Samsung account are required.

** Stores user data, preferences and usage patterns to suggest the most useful options.

*** The user will be solely responsible for any consequences that may result, including but not limited to any damage or harm caused by incorrect information provided by the user.

Dehumidification

Take good care of clothes by keeping your room dry without an extra dehumidifier. When the door is open, the Dehumidification function draws in air from the room, extracts moisture from it, and expels dry air. It ensures that any clothes are kept in the ideal conditions to protect them.
