

# Partnering to help you work wonders

## Empowering through technology

As a business, you might be rethinking how you work, when you work or where you work. It goes without saying that these are big challenges, but with the right technology, you can make it happen.

### How we can help you

- Section 1 : Security
- Section 2 : Innovation
- Section 3 : Connectivity

You need more than just the right devices, though. Your business also needs security, flexibility and support. Not everyone can offer that—but together, Samsung and Android can.

Through our best-in-class hardware and the Android operating system—the most popular platform for business—we can deliver it all. We'll help your people work more securely, efficiently and flexibly from anywhere. And we'll make it all easier to manage, too.

## Did you know?

Android has the **most devices and users** in the **mobile OS business market**.

## Partnering to keep you secure

Together, Samsung and Android provide complete protection for your business across both hardware and software.

### Built-in defence grade security

Samsung devices are powered by Knox and Android, providing multiple layers of security to help protect your business against the latest threats.

### Android Enterprise Recommended

All Samsung devices exceed the Android Enterprise Recommended security requirements, verified by Google. They also receive regular patches and updates, helping you boost protection and productivity.

### Flexible app control

You can stay in control of all your apps using managed Google Play—and Google Play Protect detects and blocks malware threats, so you can keep all your devices and sensitive data safe.

## An unmatched reputation for security

Independent advisor Gartner found that **Android was ahead of competitors** across built-in and corporate-managed security. It also awarded Samsung Knox' **'Strong'** ratings across **27 of 30 categories** in its **'Mobile OS and Device Security'** report.\*

\* Mobile OS and Device Security: A Comparison of Platforms, Knox 3.2 received 'Strong' ratings across 27 of 30 categories, May 2020.

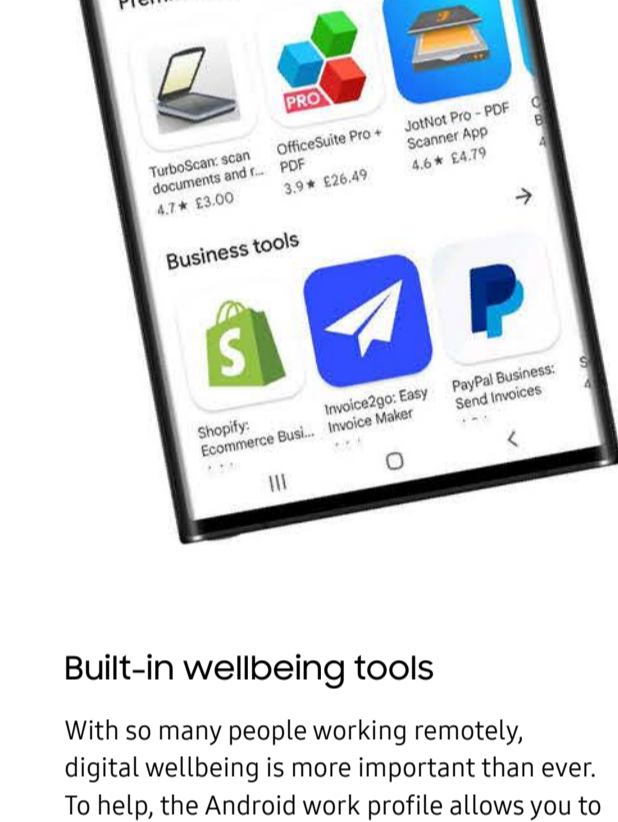

## Partnering to innovate

Our ground-breaking devices can be used across any part of your business to help your people collaborate and maximise productivity.

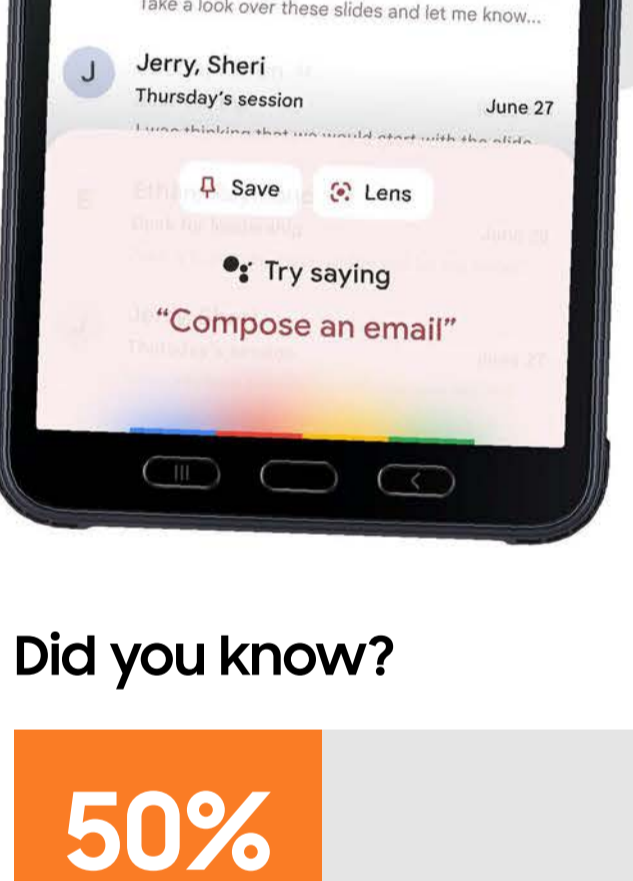

### Innovative products

With a comprehensive range of mobile, tablet, computing and wearable devices, everyone across your business can work seamlessly and drive productivity, from anywhere.

### Built-in wellbeing tools

With so many people working remotely, digital wellbeing is more important than ever. To help, the Android work profile allows you to separate your personal and business-related apps and data into distinct profiles. Plus, with Focus Mode, you can boost productivity by temporarily pausing distracting apps.

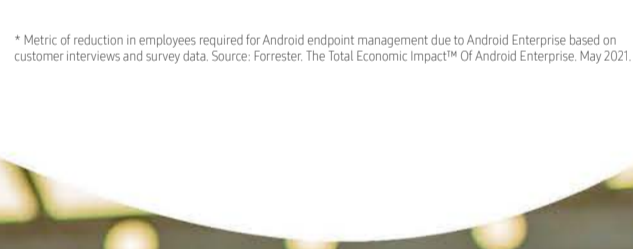

### Google magic built in

Make the everyday more exciting with our special range of built-in tools. Get to the right answer fast with Google Assistant. Navigate new markets with help from Google Translate. Or work together from anywhere with Google Workspace's cloud computing, productivity and collaboration tools.

### Centralised control

With Knox Suite, it's easy to control your whole fleet of mobile devices remotely. Plus, the Android Enterprise programme allows you to manage your fleet the way you choose, including both personal and corporate devices.

## Did you know?

Android Enterprise **reduces** the time spent **managing devices by 50%**.

## Partnering to deliver ultimate connectivity

With Samsung and Android, you'll have seamless access to all the business tools you need to work and grow.

### Seamless connectivity and productivity

Thanks to the open Android OS, Samsung devices can work with a wide range of other devices as well as your existing technology or legacy systems, giving your business more flexibility.

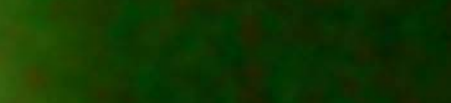

### Millions of apps

As the world's largest app store, Google Play gives you access to all the business tools you need, from popular apps such as Microsoft Office and Slack to more specialised and customised apps and even private company apps that only you control and manage.

### 5G enabled devices

With 5G, you can almost work as fast as you think. What's more, Android 12 enables 5G network slicing, so you can dedicate 5G connectivity to specific work apps, guaranteeing fast speeds and high security for company data.

## The leading app provider

In 2021, **Android users** were able to choose from **3.48 million apps**. The **second largest** app store had **2.22 million**.
