

**SAMSUNG**

Strength in numbers

# Unleashing the power of partnership

At Samsung, we're proud of our pioneering nature—it's how we develop innovative products which help to enhance your work and learning experiences.

But our drive to constantly innovate also comes from knowing when to listen to outside input.

Collaborating with others inspires us to create better products and services. When like minds come together, great things happen. Boundaries are broken. Simple solutions to complex challenges are found. And experiences which allow your organisation to do great things are born.

## **Samsung and Google: a force to be reckoned with**

You demand the best. To ensure we're able to give it to you, we seek to work in partnership with global brands like Google.

Samsung and Google have worked together for nearly a decade. It's a collaboration forged from a shared desire to give organisations like yours the tools to turn today's problems into tomorrow's opportunities—regardless of where your people work and learn, or the device they choose to use.

# What have we worked on with Google?

## Reach new heights

Our devices run on Android and Chrome platforms, designed by Google to be secure, powerful and built for working and learning.

## Anytime, anywhere experiences

More than ever, your people expect a seamless experience wherever and however they choose to work and learn. You can enjoy a consistent, hassle-free experience across Samsung devices, powered by Google.

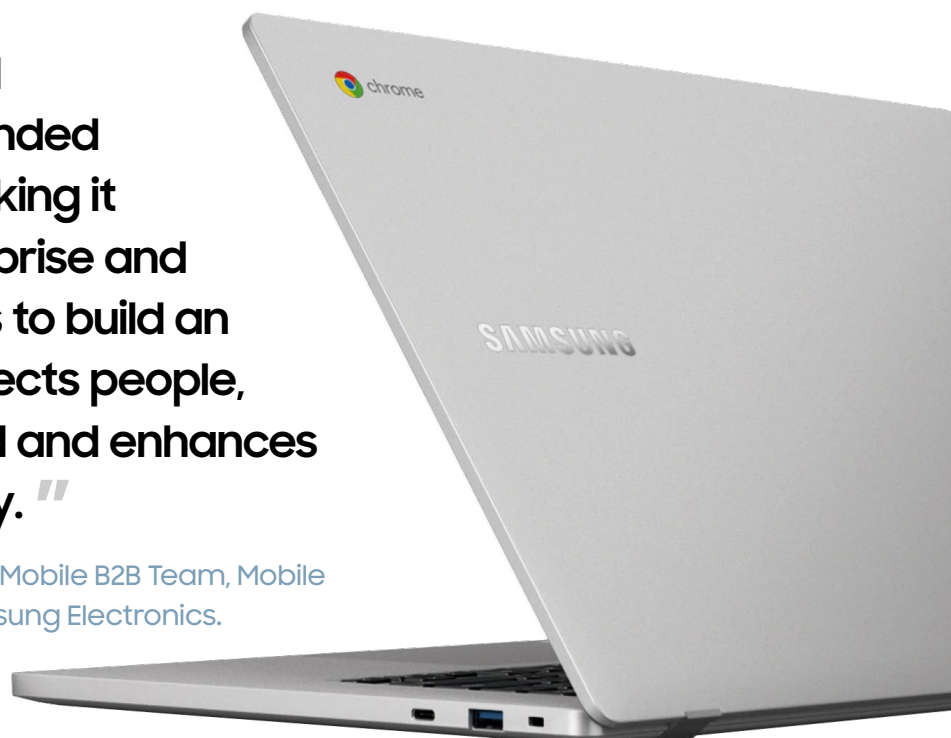

## Safe and sound

Hybrid working and learning is here to stay, so greater consideration needs to be given to ensure your devices remain secure at all times. All Samsung devices come with security built in. Plus, our partnership with Google provides additional security measures to protect your people and their data without sacrificing speed or power.

**"By joining the Android Enterprise Recommended program, we are making it even easier for enterprise and education customers to build an experience that protects people, keeps them engaged and enhances operational efficiency."**

KC Choi, EVP and Head of Global Mobile B2B Team, Mobile Communications Business, Samsung Electronics.

# Mobility

- 1** **Joining** the Android Enterprise Recommended programme ensures our devices meet Google's strict enterprise requirements. So, you can rest assured you are getting the best for your organisation.
- 2** **Harmonising** Android Enterprise and Samsung's Knox Platform for Enterprise so we can deliver seamless and secure experiences for Android customers.
- 3** **Synchronising** our device enrolment services to make onboarding employees and students quick and easy.

## The fruits of our partnership

### Chromebook 4 & 4+

The sleek and compact Chromebook 4 is a hardworking, hard-wearing device designed to make you more productive. Move between home, office and class, seamlessly and securely saving your work to the cloud as you go. Together with Google we're developing industry-leading mobile platforms that give you more choice and greater possibilities.

Chrome OS is a cloud-first operating system that provides employees and students with a modern experience and devices that stay fast, have built-in security, deploy quickly, and reduce the total cost of ownership.
