

Future of Work

Unlock the future with augmented intelligence

Rapid advancements in technology, including augmented and assisted intelligence (AI), are poised to have a profound impact on the way we work. Current generative AI and other technologies have the potential to automate work activities that absorb 60 to 70% of employees' time today.¹ Imagine the future you can unlock when you harness these innovations to empower and support employees.

Samsung's AI-powered **Future of Work** solution fuels productivity, improves collaboration and sparks creativity to help your employees thrive. With its end-to-end ecosystem of advanced workplace mobility solutions, including intelligent, on-device tools that assist with daily tasks. Samsung helps your workforce succeed in the modern financial services landscape. Samsung's team of trusted advisors can help you build a practical, incremental approach to mobilizing your workforce and streamlining workflows with AI — all while meeting the security and compliance requirements of a highly regulated industry.

Key Benefits

Enrich the employee experience

Enhance employee productivity and encourage creativity and growth with on-device, intelligent assistance tools that help streamline time-consuming administrative tasks like web research and meeting summaries.

Streamline operations

Foster collaboration and build a culture of innovation where future-minded employees are focused on process improvement and incremental scaling of new, AI-enhanced workflows.

Innovate with confidence

Embrace new ways of working while meeting security and compliance requirements with hardware-backed, defense-grade security and device management from Samsung Knox, as well as a selection of on-device, augmented intelligence features that do not require cloud access and are suitable for highly regulated environments.

Elevate customer engagement

Empower employees to work beyond their desks and break down language barriers to cost-effectively reach more customers through advanced mobile computing capabilities and real-time, seamless translation during face-to-face and virtual interactions.

Galaxy AI: The future of work in the palm of your hand

Capture meeting and discussion history

Document, record and organize meetings and customer interactions instantly with **Transcript Assist with Galaxy AI²** for hands-free recording and transcript creation and **Note Assist with Galaxy AI** for auto-dictation and summarization.

Accelerate learning

Use **Browser Assist with Galaxy AI** to automatically create helpful summaries of key points from relevant web pages to speed up the time it takes to research information on the web and share findings with others.

Break down barriers

Put a personal translator in every employee's pocket to allow them to reach and engage more customers in-person or virtually with real-time translation from **Live Translate with Galaxy AI** and **Interpreter with Galaxy AI**.

Why Samsung?

We bring the collective power of our financial services expertise, comprising our dedicated team of collaborators, trusted partners and investments in mobile innovation, to forge a partnership with you. Samsung has a long history of working with financial institutions to develop strategic, innovative solutions to assist you at every stage of your journey to create the future of work.
