Galaxy Watch7	Normal	Normal	Normal	Slow ²
Galaxy Watch6	Slow ²	Normal	Normal	Normal
Galaxy Watch5	Slow ²	Normal	Normal	Normal
Galaxy Watch4	Not Compatible	Normal	Normal	Normal

How to visually identify the new fast charger (EP-OL715)

Look for the lightning bolt icon and "Fast Charging" text on the back. Chargers without these markings are older versions and do not support fast charging.

1) For the EP-OL715 to work as a fast charger, pair it with a power adapter rated 5V/2A or higher that supports PD (Power Delivery), such as the EP-T2510NBEGUS.

2) Charging is supported at reduced speeds. Discontinue use if the device overheats or disconnects frequently.
