## COMMISSION DELEGATED REGULATION (EU) No 626/2011 DPRODUCT FICHE (ENERGY LABELLING OF AIR CONDITIONERS)

| Α   | Supplier's name  | -                         | Samsung Electronics Co., Ltd. |
|-----|--|---------------------------|-------------------------------|
| В   | Model name (Indoor/Outdoor)                            | -                         | AR12NXPDPWKN / AR12NXPDPWKX   |
| С   | Sound Power Level (Inside/Outside)                     | dBA                       | 58/62                         |
| D   | Refrigerant name <sup>1)</sup>                         | -                         | R-32                          |
| Е   | GWP  | -                         | 675                           |
| F   | SEER   |                           | 8,5                           |
| G   | Energy efficiency class (SEER)                         | -                         | A+++                          |
| Н   | Q <sub>CE</sub> <sup>2)</sup> (cooling season)         | kWh/a <sup>iii)</sup>     | 144                           |
| - 1 | Pdesignc   | kW                        | 3,5                           |
| J   | SCOP (Average)   | -                         | 4,8                           |
| K   | Energy efficiency class SCOP (Average)                 | -                         | A++                           |
| L   | Q <sub>HE</sub> <sup>3)</sup> heating season (Average) | kWh/a <sup>iii)</sup>     | 875                           |
| М   | Pdesignh (Average)                                     | kW                        | 3,0                           |
| N   | Back up heating capacity (Average)                     | kW                        | -                             |
| 0   | Declared capacity(Average)                             | kW                        | 3,0                           |
| Р   | Other heating seasons suitable for use                 | -                         | Colder <sup>iv)</sup>         |
| Q   | SCOP (Warmer)  |                           | -                             |
| R   | Energy efficiency class SCOP (Warmer)                  | -                         | -                             |
| S   | Q <sub>HE</sub> <sup>3)</sup> heating season (Warmer)  | kWh/a <sup>iii)</sup>     | -                             |
| Т   | Pdesignh (Warmer)                                      | kW                        | -                             |
| U   | Back up heatingcapacity (Warmer)                       | kW                        | -                             |
| V   | Declared capacity (Warmer)                             | kW                        | -                             |
| W   | SCOP (Colder)  |                           | 4,0                           |
| Х   | Energy efficiency class SCOP (Colder)                  | -                         | A+                            |
| Υ   | Q <sub>HE</sub> 3) heating season (Colder)             | kWh/<br>a <sup>iii)</sup> | 1654                          |
| Z   | Pdesignh (Colder)                                      | kW                        | 3,2                           |
| AA  | Back up heating capacity (Colder)                      |                           | -                             |
| AB  | Declared capacity (Colder)                             | kW                        | 3,2                           |

- 1) Refrigerant leakage contributes to climate change. Refrigerant with lower global warming potential (GWP) would contribute less to global warming than a refrigerant with higher GWP, if leaked to the atmosphere. This appliance contains a refrigerant fluid with a GWP equal to [675].
  - This means that if 1 kg of this refrigerant fluid would be leaked to the atmosphere, the impact on global warming would be [675] times higher than 1 kg of  $CO_2$ , over a period of 100 years. Never try to interfere with the refrigerant circuit yourself or disassemble the product yourself and always ask a professional.
- 2) Energy consumption "XYZ" kWh per year, based on standard test results. Actual energy consumption will depend on how the appliance is used and where it is located.
- 3) Energy consumption "XYZ" kWh per year, based on standard test results. Actual energy consumption will depend on how the appliance is used and where it is located.
