

T-Mobile US Viewpoint on 5G

T-Mobile

Egil Gronstad
October 2017

T-Mobile vision - 5G mobile experience with ONE NETWORK

ONE NETWORK

MULTIPLE USE CASES

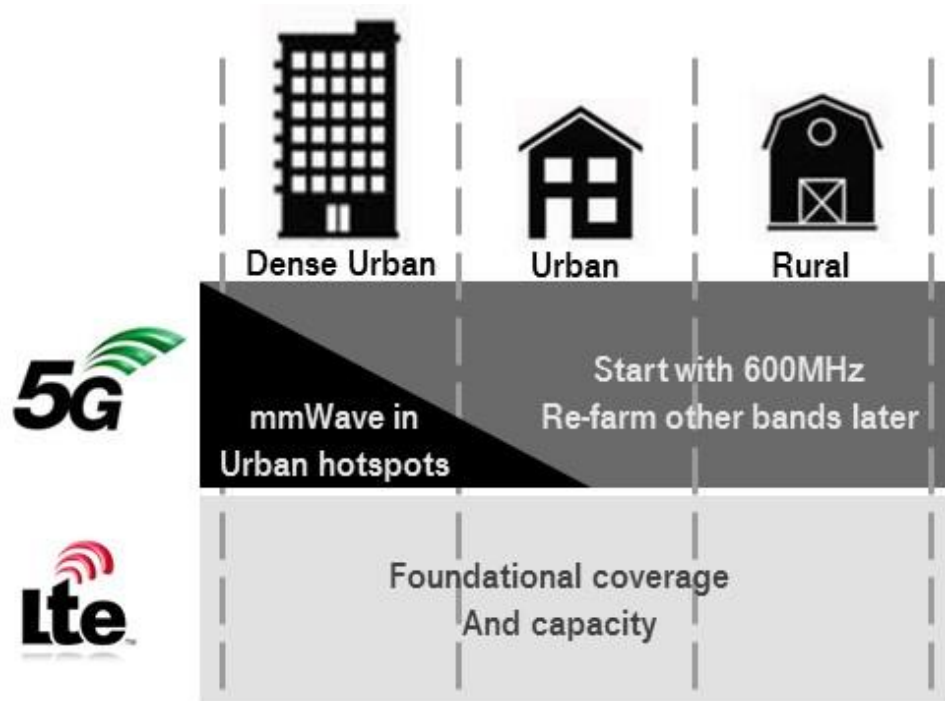

BEST MOBILE EXPERIENCE

T-Mobile is the first US operator to commit to building a nationwide 5G network

5G strategy - Nationwide 5G on 600MHz complemented with other bands

- Introduce 5G on 600MHz low band for coverage and capability
- Complement low band with mmWave asset in traffic hotspots, and to enable new use cases and services
- Re-farm existing spectrum bands to 5G as needed

Key enablers for 5G success

- Spectrum is the foundation for 5G
 - Fueling 5G growth requires additional licensed spectrum resources across all frequency ranges – **especially in the mid-band range (e.g. 3.5GHz)**
- Deploying 5G needs to be made easy
 - **Simplified & streamlined** infrastructure deployment needed at state and local level
- Realizing the potential of 5G will lead to massive success for all of us
 - **Partnerships** will be crucial to achieving this goal

THANK YOU
