Why Samsung Refrigerators are No.1^

At Samsung, continuous innovation and the power of technology enables us to enrich people's lives. All Samsung refrigerators are equipped to cater to the numerous needs of different lifestyles, like the Curd Maestro™ that lets you make fresh curd conveniently and our Connect inverter range and the Convertible range, which have features like uninterrupted running, energy saving, harnessing solar energy and 5 conversion modes.

*As per reputed agency report of December 2019.

*Source: 2019 1Q Market Share, Data extracted from the 4 major market results research covering 78% of the global ref sales (Excl. China).

Curd Maestro™

Prepare fresh curd in the fridge

In India, curd is an essential part of our meal and because of its numerous health benefits, it is referred to as India's superfood. However, curd is mostly consumed as a homemade food and its preparation comes with its own set of challenges that include constant supervision.

Worry no more, because the world's first Curd Maestro™ Frost Free Refrigerator now takes care of your curd making. This fridge offers the ability to make fresh curd and preserve it. It is not only convenient but also assures the freshness of pure curd.

Curd Maestro™ comes with a variety of benefits

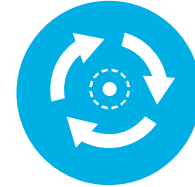

Convenience

Be it summer or winter, you can trust the technology to prepare curd in 6.5 to 7.5 hours* (approx.) by anyone in the house.

Automatic cooling

Say goodbye to the hassle of remembering to store the curd in the fridge after it has set.

Consistent taste

It guarantees consistent taste in spite of the change in weather, and this takes guesswork out of preparation.

Automatic monitoring

With this feature, no more cumbersome manual supervision is required.

Fresh and healthy

It ensures the availability of fresh and healthy curd at all times.

Make curd in 3 easy steps with the Curd Maestro™

Step 1: Mix starter/culture

Take out the container from the Curd Maestro™ and add curd starter/culture in the lukewarm milk and mix it well. Now put the container back in the Curd Maestro™.

Step 2: Fermentation

Press 'Curd' button on the display to select 'Soft' or 'Thick' option as per your preference. Rest for approx. 6.5 hours (for soft)* and approx. 7.5 hours (for thick)* for fermentation.

Step 3: Serve/Store

The 'Serve' icon would be turned on as an indication that curd is ready to serve. Curd can also be stored up to 3 days in the Curd Maestro™.

Freshness for you

Twin Cooling Plus™

Twin Cooling Plus™ is a revolutionary technology with an independent cooling system, with separate airflows in both the fridge and freezer, which allows independent temperature control with two separate evaporators.

- This enables independent temperature control of both the fridge and the freezer as per your needs
- Helps retain up to 70% moisture and prevents mixing of odours to ensure freshness

**Up to 70%# moisture
full freshness**

**No mixing
of odours**

15 days full freshness^

Losing the freshness of what's inside the fridge is always a concern. After all, fresh ingredients make for great tasting meals. At Samsung, we understand your concern. Our Twin Cooling Plus™ technology works hard to ensure that you need not worry about stale vegetables in your refrigerator. These refrigerators offer fresh vegetables up to 15 days of being inside the fridge.

So now you can enjoy first day freshness up to **15 days**.

6 smart sensors

Six sensors track variables such as internal and external temperature and humidity levels, along with your usage patterns. This enables the Digital Inverter Compressor to optimise settings for consistent cooling without having to constantly stop and restart. As a result, it uses less energy than conventional compressors.

Benefits of Convertible 5in1

185 L* of extra fridge space

With just the push of a button, the freezer instantly turns into a fridge. So no more space issues.

Moist fresh zone

It provides an optimal environment for storing your vegetables and fruits, so that they stay fresh for long.

Auto ice maker

The entire process of ice making is done automatically, just by filling the water tank around 1.1kg (32°C, N-N) of ice a day can be made. Further, with the 6L big capacity ice box, ice cubes are always ready.

31% faster ice making#

Now never run out of ice cubes. With just the push of a button, Power Freeze ensures you have ice cubes any time of the day.

75% energy savings^

With the Digital Inverter Technology, you get up to 75% energy saving under the Home Alone Mode.

6 smart sensors

It tracks internal and external temperature, humidity levels and your usage patterns, enabling the Digital Inverter Compressor to optimise settings for consistent cooling.

31% faster cooling#

Even on hot summer days, the Power Cool feature ensures your refrigerator cools up to 31% faster.

15 days of fresh food^

Keep food fresh for up to 15 days with Twin Cooling Plus™ technology.

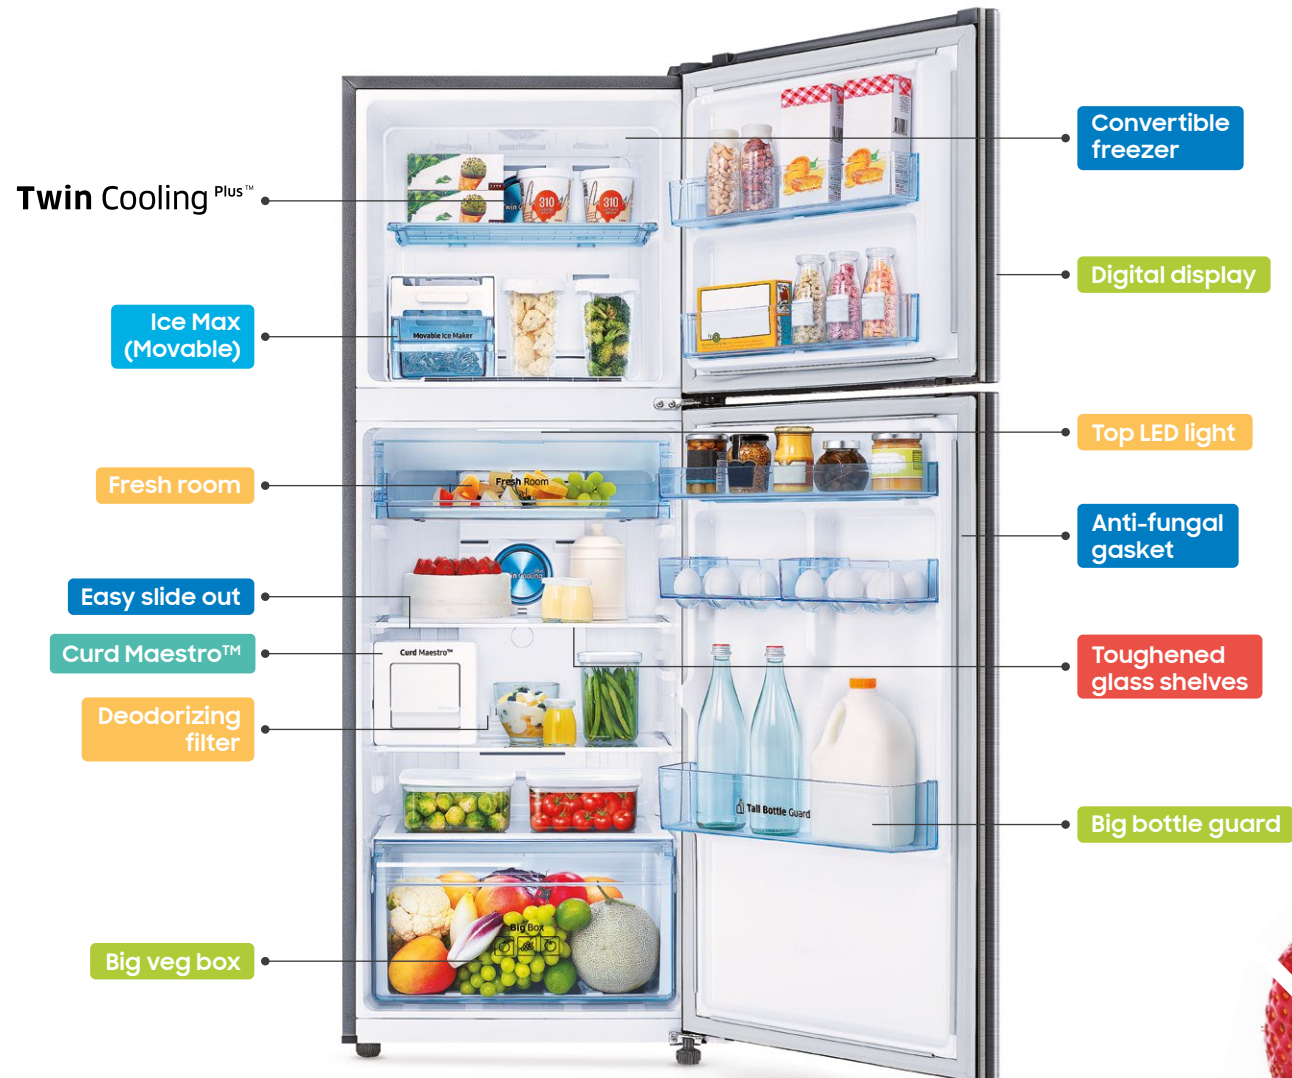

Anti-bacteria protector

Your refrigerator stays clean and hygienic, thanks to a filter on the fan that kills 99.9% bacteria¹.

DIGITAL INVERTER™

TECHNOLOGY

Energy savings⁺

We've powered the Samsung Convertible Refrigerator with the advanced Digital Inverter Technology. It makes precise cooling adjustments to keep your food fresh for longer. Along with that it senses temperature changes and accordingly adjusts the compressor speed, reducing energy wastage.

Extended durability

Samsung refrigerators have minimum wear and tear, which greatly extends refrigerator life. Not only this, it also comes with a 10 year warranty.*

21 years of reliability

When it comes to reliability, the VDE certification is respected across the world. And after testing the compressor of Samsung Refrigerators, VDE has certified that it will run for as long as **21 years****

*Result based on Samsung internal test lab conditions. Energy Saving has been calculated comparing a non-DIT model with Convertible 5in1 models, RT65K7 and RT61K7 when the freezer is set as fridge and bottom fridge is off (Home Alone Mode). Individual results may vary. #10 year warranty on compressor only. **Result based on test conducted by VDE under ideal test conditions on compressor of select models only. All products, images, features shown herein are for representational purpose only, actual may vary from model to model.

Benefits of Digital Inverter Refrigerator

Connect Inverter~

In order to give you uninterrupted cooling, the Connect Inverter range of refrigerators runs on the home inverter.

Top LED light

Top LED Light ensures brighter interiors, so you won't have trouble looking for anything.

Easy slide out

This specially designed sliding shelf lets you take out food easily and also reduces unused space.

All round cooling

The All round cooling system cools the fridge evenly from corner to corner to maintain a constant temperature.

Deodorizing filter

It decomposes and removes unpleasant odour particles, which maintains freshness and a good smell in your refrigerator.

Stabilizer free operation

Samsung's Frost Free Refrigerators have inbuilt stabilizers, which sustain wide voltage fluctuations between 100 - 300 volts.*

Moist fresh zone

It provides an optimal environment for storing your vegetables and fruits, so that they stay fresh for long.

~Connect Inverter subject to home inverter capacity and is available in select models. *Approximate values based on Samsung internal test results. Individual results may vary depending on external weather conditions. All products, images, features shown herein are for representational purpose only, actual may vary from model to model.

Connect Inverter~

Don't let power cuts come in your way

If you think it's impossible for a refrigerator to run on an inverter, think again. Our revolutionary range of refrigerators can now run even during power cuts, making sure your food always remains as fresh as ever.

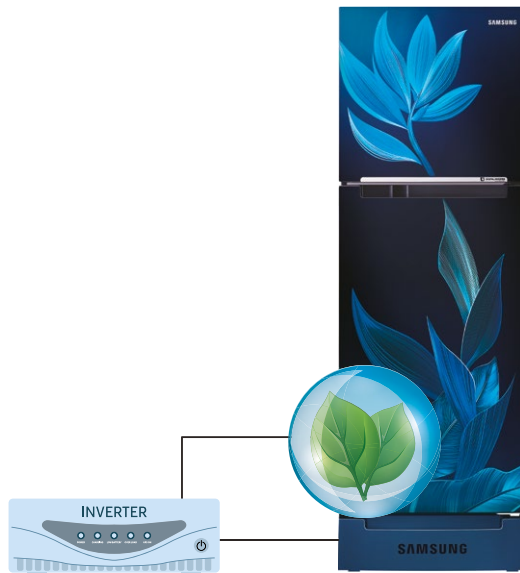

In India, power cuts are common across regions. So you need a refrigerator that works to the best of its ability even in these conditions. The Connect Inverter range of refrigerators run on the home inverter giving you uninterrupted cooling even when there is no electricity.

What are its benefits?

- ▶ Consumes very less energy and runs on home inverter
- ▶ The food remains fresh during power cuts
- ▶ Keeps on running 24x7 even during power cuts

Connect
Inverter

Runs on Home Inverter~

Connect Solar*

Powered by the sun

Concerned about the environment? We have the answer. Samsung brings to you its range of Solar Connect Refrigerators that run on Solar Energy. You leave no carbon footprint while saving yourself money.

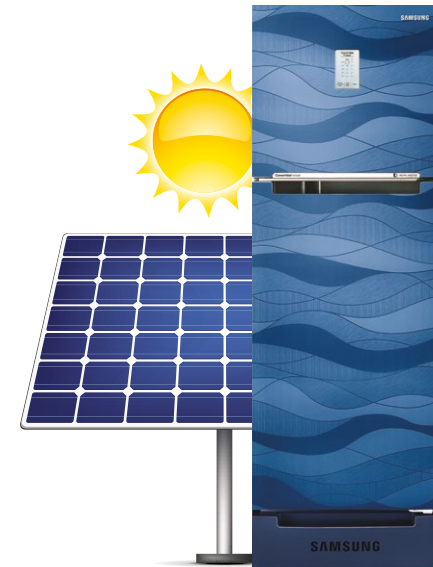

How it works:

Off grid system

- ▶ DC electricity is generated by solar panels and converted to AC electricity by the Solar Power Conditioning Unit (SPCU)
- ▶ Appliances can run directly on AC electricity but the voltage range should be between 100v - 300v
- ▶ Current and Voltage in the batteries is regulated by the solar charge controller
- ▶ In the evening, stored energy in the batteries is used by the SPCU to run appliances

Connect
Solar

Runs on Solar Energy*
